These old farts would let the boat sink if the signal wasn't sent they
way they want it sent. They're stubborn as hell.

yryryryryryryryryryryryryryryryryryryryryryryryryryryryryryryryryryryryryryryr

The quick brown fox jumped over the lazy dogs back.

NO linear needed! 5 Watts can do it. 100 watts is more than enough.

The very most interesting thing about BPL is that what goes on the
power lines is only the very last leg of the system. Power lines are not
particularly good at carrying digital signals. The signal gets mushed
up, and it won't survive the trip though the pole transformers. So they
carry the signal through the higher voltage lines, put a box that pops
the BPL signal onto the low voltage side of the transformer, then that

is what goes into your house.

But the big kicker is this. Since the digital signal has a lot of trouble surviving the trip on the power lines, fiber is run to the point where a tap is made to the HV-lines. It's a last block sort of thing. So unless you are on the end of the line, you will probably have a nice high-speed fiber going right past your place in a BPL scheme.

THAT'S the signal I want Fiber! Not a stinking, degraded, vulnerable, spectrum polluting BPL signal. I want Fiber - lots of fiber in my diet!

Besides, fiber is good for you! ;^)

Thank God that you're out of the radio communications business and only do it as a hobby. To think that someone would have to rely upon you for emcomms is frightening. Go back to working out of band Frenchmen on 6 meters.

Most of these not-so old-timers have lost it.

Just like Dave can't understand that "OSOSOSOSOSOSOSOSOS" just might be
a distress call. I pity the units that he supposedly served.

Conspiracy or just bad methods of record keeping?

... in the end the reason is not as important as facts, and one fact
is--dead hams are on the books...

But damn it all and get real, the USA population is 350,000,000+, if just
one percent of that population were hams, you would need 3.5 millons hams...

... the figure 600,000 is too ridiculous to even argue as meaningful, stop
eating lotus flowers, wake up!

To all:

My opinion is that .015%, or less (and probably much less) of the USA population are licensed amateurs, that is a crime!

That isn't a "hobby group", that is an insignificant number! Those who are responsible for this need to be set aside, immediately, I believe any sane man will find that proof without question... that number deserves to either gain sufficient members to be able to ask for gov't consideration and regulation--or go the way of the dodo--and die with dignity!

John

Why is it a crime in your mind?

> That isn't a "hobby group", that is an insignificant number!

I'd bet many other hobby pursuits have even lower
numbers. The reality of hobby interests within the
general population is that the great majority of people have
no hobby at all. Just ask any of your friends what,
if any, hobby or hobbies they may have. Some may say they
follow this sport or that, but they are only fans...not
participants.

> Those who are

The numbers are higher now (within 10,000 or so) than they were
25 years ago.

Cheers,
Bill K2UNK

I was speaking about comments, not polls. But you're right either way, in that the FCC can ignore the majority if it wants to.

> One very
> good comment can trump many "me toos".

Or one comment that FCC just happens to agree with.

Look at the BPL situation....

> Besides, the FCC isn't
> in the business of handing out gold stars. If a requirement
> serves no regulatory purpose, the FCC doesn't want to bother
> with it.

Or if FCC doesn't want to be bothered in the first place...

However, none of that is really what I was driving at.

My point is simply that the majority of comments on code testing (57%) on 98-143 were in favor of at least two code test speeds, including at least 12 wpm for Advanced and Extra. That fact is proved by KC8EPO's published results, right here on rrap back in March of 1999. (WA6VSE/WK3C posted them).

FCC ignored the majority opinion back then and reduced code testing to 5 wpm. The majority opinion was *not* acted upon by FCC.

Whether FCC did the best thing or not is a matter of opinion. But the plain simple fact is that the majority was *not* anti-code-test.

Now of course if the majority of comments on 05-235 are in favor of no more code testing, FCC will most certainly say they are simply doing what the majority wants.

73 de Jim, N2EY

>

> >> A strong signal mode? 8^)

Sure - that's predictable by Shannon's. It's not hard to
understand and explain, if you really understand what
Shannon is all about. (Some folks make a lot of noise
about it, acting as if it's some big deal, but it's really
quite easy to understand.)

Consider this situation:

Plain old on-off keying lets you send one unit of information
per unit time. Either a 1 or a 0, on or off. Digital and
all that.

But suppose we have a system (transmitter, receiver and connection
between them)that has four states - 100% on,
66% on, 33% on, and off (0% on). We can then apply a meaning to those
four states - say, 11, 10, 01, and 00, respectively - and send two
units of information per unit time in the *same* bandwidth.

We've just doubled the data rate without changing the modulation
method, bandwidth, or basic keying rate. But for it to work,
the system must have good enough signal-to-noise ratio to
determine the four states reliably.

That principle can be continued as far as our signal-to-noise ratio
allows. For example, a system of 128 states could be done,
if the system S/N is good enough, allowing the transmission of
seven units of information per unit time in the same bandwidth as
was previously used for one unit.

IIRC we had this conversation before, only it was about a PSK system
with many more states, rather than an AMK system.

And there's no reason multiple carriers can't be used, as well as
multiple ways of modulating the same carrier - say phase and amplitude
modulation at the same time.

Of course the entire system has to have adequate s/n to deal with
the tiny variations of phase and amplitude.

Telephone line modems make use of the predictable stability and
characteristics of the telephone lines. HF radio is a bit less
stable.

Of course if the taxpayers are footing the bill, all sorts of
things can be done.

> > Sure! Look at what the military folks did. Big rhombic and

> Just not too applicable for our purposes.

My Elecraft K2 has programmable memories that can be set for each band
and mode. Other rigs have similar features.

It would not be difficult to have it step through them (using the
RS-232 port and computer control) comparing each frequency with the
others. With suitable time synchronization between, say, you and I, the
rigs could step through the various preprogrammed QRGs, looking for the
spot with the best propagation and no QRM.

Of course we'd have to set it all up beforehand so we'd - or rather the
rigs - would know precisely where to send and listen.

The K2's ATU also remembers antenna tuner settings per memory.

It *is* efficient, Mike! It's very efficient at turning HF RF energy
into heat.

>
> I am a believer...

You can believe whatever you want, John, but that doesn't make it
so.

There are plenty of people who think the earth isn't much more than
6000 years old, despite all the evidence to the contrary.

There are plenty of people who technology can solve any problem.

There are plenty of people who think that change equals progress, and
so they push change regardless of whether it does any good
or not.

There are plenty of people who embrace simple, easy answers to
complex, tough problems - because such answers usually blame
some other group.

N2EY:

Text, with data compaction, is about a 10:1 compaction ratio (I usually average a 12:1 over a broad time period), that translates into sending one word for every 10, or 10X the speed of sending the data un-compacted.

> Or if FCC doesn't want to be bothered in the first place...

Indeed the FCC doesn't want to be bothered with much from the ARS, we
should count ourselves lucky to get any enforcement action
>
> However, none of that is really what I was driving at.

wonder what they do with transmision "ayday...ayday
...ayday...b9wdy...lling...ayday" the dots being static, something liek
sorry ole boy we migh help you when you fix your radio

Indeed If truely stuck and needing help but with a big batery Id just
send ...---...--- and hope for the best at interavals as long that
battery would still make sparks but Dave and prehaps a good many other
MMM would not help me

>keep one over the other, after it has kept morse in place a LOT longer)

Both SSB modulate-demodulate systems are compatible. Each
produces a SINGLE AM sideband. In the Phasing system one
needs two balanced mixers and a 0 degree and 90 degree
relative phase shift (commonly called 'quadrature') of BOTH
the audio AND the RF carrier. The two balanced mixer outputs
are then algebraically summed for the result.

The reason it works has to do with the relative RF phases of
the conventional AM sideband products. The upper sideband
components are differnt from the lower sideband components
even though the sideband magnitudes (and frequencies) are the
same. I could show how mathematically but this medium doesn't
show equations well and John Carson's formula is rather long.

The trick is to get a wideband audio phase shift network
that retains the quadrature (90 degree) difference all across
the desired audio bandwidth. The RF carrier can do that but
the percentage bandwidth is small so the RF quadrature is
relatively easy to do in hardware. The audio network is not
easy to do. It is the SELECTION of audio phase and carrier
phase into the mixers that determines whether or not an upper
or lower sideband is desired. The amount of rejection of the
unwanted sideband depends on the tolerance of holding the
relative phase shifts as close as possible to 90 degrees.

The "suppressed carrier" part of SSB is by virtue of the
mixers balancing out the RF carrier in their output.

The Gingell Polyphase Network takes 0 and 180 degree audio
in and produces four audio outputs, each in quadrature with
their adjacent output. The tolerance of exact quadrature is
so good one can use ordinary 5% tolerance resistors and
capacitors (relatively inexpensive) without matching them
in pairs/quads. Much better than half-century old tube
technique passive networks which required 1% or better R
and C and always had a finite relative phase error.

>I migt as well learn something, and I am not afraid to admit the limits
>of my knowledge that is of course the first step in increasing it

Absolutely. [few extras in here admit to gaps in knowledge
since they are Morsemen who don't need theory]

There's considerable data on phasing SSB generation-demodulation
in older textbooks and some on the Internet. A search on
"Phasing SSB" will turn up some interesting homebrewed-designed
phasing generators and a few complete transceivers.

My former boss and still my friend, Jim Hall, KD6JG, pointed me
to a very interesting circuit in the RSGB magazine Radio
Communication back in the early 70s. Jim did some early work
on "third method of SSB" that is referenced in the "Collins
SSB book" (familiar name) by Pappenfus, Bruene, and Schoenike
then with Collins Radio. I snitched a bit of mainframe time
and did a circuit analysis of it that got mentioned in Pat
Hawker's column in Radio Communication a few months after
Peter Martinez' circuit/experiments were featured. [the same
G3PLX that would go on to innovate PSK31 much later]

For others who were in early radar work, particularly avionics
weapons systems, "phasing systems" are the key ingredient to
"monopulse radars" that can determine elevation and azimuth
from a radar antenna boresight line without physical movement
of the antenna. Those started showing up in the 1950s. The
"phase shift networks" at microwaves (X and K bands) are quite
a bit diffeent than R-C ones at audio! :-)

>frequency do they operate at?...)

Geez, Coslo, you still don't know dink about BPL. Neither does
Heil apparently but then He can't be told anything...

The DATA signals carried on electric power lines are, effectively,
SIDEBAND components of a digital signal. Big wiiiiiide sideband
spectral content. [I have to simplify it in order to teach you
children sometimes] None of the systems have lil teeny
individual "HF channels" for subscribers. It is similar to,
but not the same as, the digital data stream coming down a
cable TV system.

> Seems like if it is HF already, we shouldn't have to use them.

You "shouldn't" or "should?" Be clear in your statements.

You CAN use them if your receiver bandwidth is as wide as
from 3 MHz to 80 MHz...AND you have the digital decoder...
AND you have the subscriber unlock code.

> I can see a little HF receiver hooked to my
>computer, and make a little antenna from what would ordinarily go into
>my Ethernet port. That should work, shouldn't it?

It will work as well as that aluminum foil hat you wear to
keep space aliens from reading your thoughts.

> Maybe it is a conspiracy to sell electronic parts?

No, books...like "Broadband Techniques For Dummies and
Simple-Minded Stupid Extras."

Ooops! There's your first falsehood, Mr. Carbon Obnoxide.

> ...and illustrating that with his saving-the-day actions from...

There's your second falsehood.

> ...Guinea-Bisseau in Africa for the Department of State, his
> employer at the time (in the "foreign service").

It is "Foreign Service", Leonard.

> That was in
> the 1980s.

The time frame was late 1987 through late 1989.

> He was then, as he is now, an Ultimate Authority
> on HF...

That's your third falsehood. I've never claimed such.

> ...from his many many years as a ham (probably working a
> minimum of 8 hours a day on his ham job)...

You are actually quite close to the truth in this statement. If you count weekends, there are many weeks when I put in more hours at amateur radio than I did at work, even if we include typical overtime. Did you have a point to make? Are you jealous? Are you perplexed? Have you a problem with how I spent my own time?

> and waded into the
> morse code testing arguments as Mister Morseman (a "foreign
> service" counterpart to "Captain Code").

That makes falsehood number four. I've never posted as, nor signed any posts as "Mister Morseman" or any similar moniker.

> Unfamiliar with this country of Guinea-Bisseau, I had to look
> it up. Found out it was NOT a prosperous country and that its
> chief export was cashew nuts.

I can understand your unfamiliarity with the country. Why not admit that you are unfamiliar with just about any African country?

> I stated that and Heil got very
> angry.

There's falsehood number five.

> [he was a "key employee" or something at State as a
> "communications officer"...blah blah blah]

Oh, that part came much, much later, Leonard. You actually made a statement saying that I was never a key employee at any embassy. I produced urls for several years of the U.S. Department of State's "Key Officers of Foreign Service Posts" listings. My name and job title appeared in each. You quickly dismissed the lists as some sort of a telephone listing (even though telephone numbers did not appear with the names listed). You ate large quantities of crow.

> How dare *I*

> by the U.S. Army of the 1950s...using mainly RTTY and TTY over
> (commercial format) SSB...NOT encountering these "bad
> conditions" where "only 'CW' would get through" (and saving-
> the-day).

Here we have your falsehood number six. I was not even pissed, much less "pissed and a half". You vastly overestimate your ability to motivate. I wrote nothing about CW saving the day.

> Heil tried to make the argument that "CW" was
> "necessary" and all that old snit.

The use of CW was necessary and mandated.

> Heil stated that "my
> station" (taxpayer owned, actually) "NEVER WORKED 24/7!"

There's your seventh falsehood. I stated that *you*, Leonard H.
Anderson, never worked 24/7. You'd claimed that you had.

> Tsk,
> four operating teams very certainly worked the 3rd largest
> Army station in ACAN-STARCOM then, using about 40 transmitters
> shooting across the Pacific south-east-west from Tokyo, all
> around the clock. NO "CW" (manual morse code) used by my
> battalion that served the Headquarters for the Far East Command
> then...none later...all on HF.

Bully for you, Leonard! Bully!

> Heil committed some small gaffes in his rationalizations on
> what he wrote...specifically that the "CW" was needed to
> "synchronize" the RTTY schedules.
> Any TTY is automatically
> self-synchronizeable, has been since before WW2 times.

TTY is "self-synchronizable" (did you mean synchronizing?) but schedules
are not.

> Heil
> then "explained" that "synchronizing" meant schedule times
> and so forth. Odd that such wouldn't have been worked out
> beforehand in operating orders, common to everyone else.

One may issue orders and make demands. Propagation doesn't seem bound
to comply.

> Heil got most disturbed on my descriptions of the Army net
> being BIGGER than what State had (it was) and said...

Wrong! That's falsehood number eight. I never cared what the Army net
had and did not dispute its size.

> "I didn't
> know anything about what State's radio had/did."

...and the fact is that you didn't and don't know anything about the
Department of State's communications methods or abilities.

> Tsk, I
> did and already possessed a great deal of documentation
> obtained from Army sources and a few items of contractors
> supplying the U.S. government (the RCA "RACES" mass
> memory on mag cards, two of which were installed in DC at
> State's headquarters).

None of those were any longer used at State by the mid-1980s.

> Heil did not realize that some of
> the Department of State messages were actually carried on

> Army and Air Force communications circuits...

None of the Department of State's record traffic is carried by either Army or Air Force circuits.

> ...more in
> Europe than in Asia.

None in Europe or in Asia.

> [I can identify the stations, the
> TTY ID, paths, and controlling hubs on all of ACAN-STARCOM
> from publicly-released information available before 1980,
> stuff that I have, obtained from a civilian engineer
> acquaintence who worked at "my" Army station]

Before 1980? Why don't you just do another recounting of your RTTY experience at ADA in the early 1950's?

> Heil engages in a lot of Gamesmanship in here, frequently
> citing his many State assignments (Finland, several
> countries in Africa).

Frequently? Not at all, Leonard. Your retellings of your single ADA experience in Japan have to outnumber any postings I've made about State Department postings by six or eight to one. Those experiences of yours date back more than a half century.

> He WAS DX to a lot of other hams,
> courtesy of the U.S. government...

Courtesy of the U.S. government? Excuse me, that's your ninth falsehood. The U.S. government did not purchase any of my radio equipment, make any amateur radio QSOs or subsidize my time spent on the air as a radio amateur.

> and complementary callsigns
> given to "diplomatic" personnel of the USA.

Your tenth falsehood appears above. I paid the going license fee at each post and requested a license under reciprocal agreements the host country had with the United States. No special agreements exist for those in diplomatic status.

> Problem is,
> Department of State radio is rather smaller than the U.S.
> military networks and the retirees from State's radio are
> a tiny percentage of "radio operators." Now the military
> networks' former members are also a small percentage...but
> they are larger than civil government "radio operators."

Nobody retires from State's "radio". Those in communications were "Support Communications Officers", now "Information Mangagement Specialists". They handle not only HF radio circuits, but satellite and

leased-line circuits. They are responsible for stand-alone PCs, unclassified and classified LAN's, embassy telephones, HF E&E radios, post VHF/UHF repeaters, handheld and mobile radios, secure telephones, and classified pouch. They also supervise the embassy receptionists and the mailroom staff. Those with HF radio expertise, listed as "CPO (Communications Programs Officer) or IPO (Information Programs Officer)-Radio" are an even tinier percentage of all of the Department of State's communications/information management employees.

> The more vocal hams with previous military radio
> experience seem to come from the USN and those mostly from
> ship "radio room" assignments.

The more vocal? Are the folks with Army, Marine, Air Force and Coast Guard experience just quieter by nature?

> Heil seems to be banking
> on his Department of State experience being rare, thus he
> can bullshit his way into posing as a Great Authority on
> What The Government Does In Radio among amateur radio
> hobbyists.

"Heil" knows that his Department of State experience is rare and there's no posing is necessary. You made a statement about government not using Morse. I corrected you. I knew something which was unknown to you. Deal with it.

> Heil shows no sign of having worked IN the
> larger military radio communications networks during his
> military service...yet he implies knowing all about them.

"Heil" has shown numerous "signs". "Heil" was in the U.S. Air Force for four years and worked as a radio operator. "Heil" served in Vietnam as a U.S. Air Force radio operator. Heil wasn't some maintenance type, leaning on an equipment rack.

> He knows little and all he can do is the BS implication
> that he does.

You really should write that it is your guess that I know little and that it is your guess that "all he can do..." There are quite a number of regular posters here whose time as professional communications types exceeds your own by several magnitudes. If you add their amateur radio experience, you're left in the dust. Deal with it.

> A shock to Heil must have been my appearance in here, an
> unlicensed-in-amateur-radio person who is no shrinking
> violet on opinions!

Not exactly, Len. What shocked me was your pompous and condescending manner toward radio amateurs. You're right about your not being a shrinking violet on opinions. You have one whether you know what you're talking about or not. If no one pays attention to them, you restate

them time after time in hopes of being noticed. Well, you've been noticed. You're still on the sidelines of amateur radio.

> Even worse, one who HAS documentary
> proof to counter most of the total bullshit spouted by
> this great "radio expert." [three such documents posted
> on http://kauko.hallikainen.org/history/equipment]

Just what is this documentary proof supposed to be, Leonard--that you were somewhere in uniform in the early 1950's? I've never denied that. I just don't know why I'm supposed to be impressed and I don't know how it is supposed to relate to amateur radio.

> Perhaps
> he was disturbed that I didn't polish the boots of his
> surplus Wehrmacht costume from Western Casting? Could be.

Godwin x 2.

> Heil, like Robeson, vents a lot of anger in here, always
> trying to verbally thrash his "opponents" on a personal
> basis. SUBJECT be damned, he wants to "fight" on a one-
> to-one basis anyone who speaks against his opinions.

You've pretty well described your own behavior. N2EY even did a finely-crafted profile of your likely response to any poster who disagrees with you. Would you like to see it again?

> In the last half year Heil has whittled a schtick about
> my "not being a participant in ham radio" etc. and thinks
> that is some kind of psywar "weapon." It isn't.

No, it isn't some kind of psywar weapon. It is plain fact and I've brought up up for nearly eight years. You aren't a participant in amateur radio, despite your boast of several years back that you were going for an "Extra right out of the box".

> Contrary
> to Fearless Leader's instruction-commands, I didn't get a
> ham license FIRST "to show an interest in radio."

You didn't get into amateur radio first, last or in between.

> The
> Army provided the opportunity to INCREASE my interest in
> radio (since 1947 along with lots of other interests) and
> I "disobeyed orders" by getting a Commercial First Phone
> in 1956 and then became an electronics design engineer.
> No, no, no, that was NOT the Order Of The Day...I should
> have dutifully learned morsemanship to become an amateur
> first according to Fearless Leader Heil. Screum.

I disagree. I don't care whether you obtain an amateur radio license at all. If you choose to sit on the sidelines for the few years you have

remaining, it bothers me not. What I won't put up with, is your endless sniping.

Yep, and Jesus his son had long hair.......I bet even God has a
pony tail and long white beard.

Saggytits is just upset since he went bald before he reached 18.

Your posts? It seems that way. You make a false statement and then dismiss anything which runs counter to it. As an example, you have a beef with my saying, "John Smith is not real". Well, "John", you aren't. There's nothing circular about it.

You complain over my opinion that anonymous posters shouldn't be given any credence. You don't provide a valid reason why anyone should give them credence.

You tried to put words in my mouth when you wrote (and put into quotes): "It is personalities which matter here and NOT facts!" but I didn't write that--you did. How do you account for that?

You start with a false premise and quickly veer away or become dismissive when someone confronts you with the falsehood.

> krist, no wonder your posts
> seems do dizzy!

I'm sure they seem that way to you, "John". My posts seem dizzy because they address specific things which you've written. Yet you don't address my points in response at all. That's the nice thing about being an anonymous troll.

> them credence.

But you clearly give credence by going on and on that they do not have
credence

you sound like Stevie, claiming he doesn't care what his targets say
and dreicting most of his output towards them

John need not, indeed can not provide a vaild reason, each person must
do that or not do it for themselves
>
> You tried to put words in my mouth when you wrote (and put into quotes):
> "It is personalities which matter here and NOT facts!" but I didn't
> write that--you did. How do you account for that?

it certainly the case you are not influenced by facts, few humans
really are, the matter is mostly one of personalities
>
> You start with a false premise and quickly veer away or become
> dismissive when someone confronts you with the falsehood.

you guys realy need to learn the difference beteween Falsehood and
simple difference of point of view
>
> > krist, no wonder your posts
> > seems do dizzy!
>
> I'm sure they seem that way to you, "John". My posts seem dizzy because

you don't have control over your world indeed no one does really merely
the ilusion of control

you come back to insiting on the same thing the right to control the
discussion, you can't, you can only influence it

> address my points in response at all. That's the nice thing about being
> an anonymous troll.

or simply in exercising Human choice
>
> Dave K8MN

not entirely sure what John is up to, which is of course part of the
fun in watching

indeed it does not do equations well but I have seen most of it back in
college, pity my Physics prof never mentioned use SSB as a tranmission
medium his lecture would have gotten my attention beter, but by then I
was more interested in Plate Techtonics and what my geology profs was
going on about

and the graphical analys made more sense anyway

Dave:

No dave, I dismiss your posts because there is nothing there of substance, usually. I find them usually just be contradictory just for the sake of contradiction, others may decide for themselves...

I don't argue what I know is fact, no sense in it, most times I would expect googling would provide anything necessary to prove it one way or another. Other times I suppose you would have had to have worked with the hardware and/or software to know... when you obviously have not, yet choose to argue something, which is obvious to me you have no clue on, I have no choice but to end it, arguing further would be pointless, you are free to carry on as you choose, just no longer at the expense of my time.

You may call all the names you like, hold any opinion you like, give any opinion you hold of me, or anyone else for that matter, in the end it just doesn't matter. You wish your opinions to matter to me--I cannot help you there, seems like life itself would have taught you about that...

You repeat you have an issue with my anonymity, perhaps anyones, so be it, get over it or set there and dwell upon, you don't need my company...

AOF:

I am sorry it seems like a mystery, what I am "up to", I am simply observing a time in radio history like has never been before and may never come again, at least in my lifetime... old barriers are falling, a new influence will soon find its' way on to the amateur bands. It is obvious to me antiquated technology dominates the ham bands, the old timers and not accepting the new equipment and the state of the hobby lies in stagnation... another phenomenon is that there seems to be a common factor to most of these amateurs, they resist change--like it strikes fear in them... certainly I am not the only one to see home this "group of old buddies" have banded together around this "common denominator?"

I am thrilled over the prospect of new hams entering in meaningful numbers, manufacturers taking note, and dynamic changes occurring which returns some of the excitement back to the hobby... surely everyone realizes that not even the manufacturers who make ham equip can get very excited about the sales potential of new ideas, new hardware and new software to this very small market...

... believe it or not, I am quite excited about all of this--watching it unfold. Seeing how a few personalities are able to influence others will and "fool" them along on this rather bizarre rut they have been stuck in ...

I have always been a "radio loner." Have always though it ridiculous to see the "high school feud" between hams and cb'ers. I have always enjoyed a good cb rig.

You know what the real difference is between hams and cb'ers? About a megacycle, a short jump from the 11 meter band to the 10 meter... about a single footstep.

Guess that is how I escaped the trap I observe here, I never seen a wall there. And, now with the elimination of code, I expect none to find a wall there at all...

It really ain't no big thang, 10-fer good buddie? <grin>

Anon:

To tell you the truth, I have had both long and short hair. I have much seen it as I do the difference between a conversation on 10 meters and one on 11 meters, they are both alright...

Some people lacking real self-esteem always find some element to which they can attach themselves to and feel superior or better than another or a group. This only appears very strange to one who views them on their interests, thoughts, ideas, motivations and ability to be interesting...

Like that old TV ad, "We don't want tuna with good taste, we want tuna that tastes good!" I'll be the judge of someone who "thinks his/her self interesting", what they think just isn't a concern of mine, in that area... strange they can consider it to be any other way...

## 1011. Re: Roger Wiseman is like a Slinky ...

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-09 09:49:59 UTC
From: Stagger Lee <SLee@houston-hunks.com>
Message-ID: <woger.saw.de.wheel.in.de.middle.of.de.air@houston-hunks.com>
Source record: 115361
Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.misc,rec.radio.amateur.policy

First, Woger tries to pretend that the mere idea of the existence of barbers during Jesus' time is laughable, by saying:

: BWHAHAHAHAHAHAHAHAHAHA..Yeah, barbers were so prevalent in his
: day! BWHAHAHAHAHAHAHAHAHAHAHAHA
: What a dumbfuck you are, Saggytits. Get that much needed Rogaine
: yet? Or are you going to get hair plugs?

And then, in a puzzling non-sequitur, Woger continues with:

: Oh, and you'd better upgrade your research skills yourself.
: According to http://www.barberpole.com/artof.htm, In Egypt, many
: centuries before Christ, barbers were prosperous and highly
: respected. The ancient monuments and papyrus show that the
: Egyptians shaved their beards and their heads. The [SNIP]

This latter statement underlines that fact that short hair (and barbers) had been around for centuries prior to the time of Jesus and St. Paul, making the reader wonder just what Woger's point could be?

It would seem that Woger was arguing with himself.

On second inspection, one can see that the last part of Woger's post is a cut and paste job which was tacked onto an earlier post. Apparently, Woger was too lazy to read the new, combined text, and he was completely oblivious to the actual meaning of what he had just created.

The post is therefore nothing more than a redemonstration of Woger's intellectual laziness.

Now we know why Woger never made the DeVry Correspondence School's Philosophical Debate Team, in spite of the fact that he resembles Ezekiel.

Hey Steve...Welcome back!

No...You got the attributes correct.

Brain just can't stand to have his errors pointed out or
corrected, and unfortunately he provides so many of them that need
correcting.

Also, he tends to "hang" with a less...uh..."reputable" crowd, so
when he sees yet another person redressing his mistakes, he just digs
in for more of his antics.

So how's things been with you?

73

Steve, K4YZ

> That was the link that makes the connection from Anonymous to Steve.

Steven J Robeson's posts only contain ONE yiddish word..."putz"...

Again, Brain, you grossly misrepresent the truth with such
exaggerations as "...postings are full of..."

Just one more remnder of why it's so easy to prove that you are
the deceitful creep I claim you to be.

> > How that can be construed as a rescue attempt should be left for those

Brain wishes there were "sessions at work" for himself,
Steve...Brian P Burke continues to lie, deceieve, and make
misrepresentations about the very radio service in which he's a
licensee

> > Again, if the attribute should be to Steve, my apologizes. I thought I

>
> You read them correctly.

It's just that Brain doesn't want to take responsibility for his
own posting errors.

> > The fact remains, there is no such thing as Yiddish wine.

What's a matter, Brain...?!?!

Someone with an anonymous screen name jumps in with "support" for
you and it's "OK"...

Someone see's I am correct and you're a lair, now you think it's
me doing it for my own benefit...

Pretty paranoid there, PuppetBoy!

I can see the needed s/n ratio going up with each addition.

And yet even here, I can remember paying extra for a modem line, which
was quieter than a regular phone line. I don't know if there are such
things any more - its been a long time since I've used dial-up.
Otherwise you slow to a crawl, as error checking struggles to keep up
with line noise s/n.

Of course! As a practical matter though, we have to assume amateur
radio conditions. A real limitation there.

One of the things that I wonder about with the need for huge s/n
handling ratios is that we obviously want a quiet reciever, with a
impressive noise floor. This means all of the "oomph" must be on the
strong signal handling side. We need an exquisitely sensitive and quiet
reciever, with exceptional strong signal handling capacity.

If newer is always better, I wonder why these vanguards of the brave new world aren't typing to us stodgy mortals in leet? After all, it's newer.

One of the biggest flaws of many people is that they have no appreciation of mature technology and people. They choose to concentrate on the limitations and foibles of both, not realizing that they are themselves full of their own foibles and limitations. They create for themselves great effort and even harm in their rush to discard the old, simply to reinvent it.

Whatta ya wanna bet that "Anon John" is not a licensed anything in
radio?

> > Doesn't matter - they have nothing practical to offer.

Well I dunno about that Mike, jeez, lookit all the leading-edge
"solutions" Sweetums has dumped in here over the years . . .

> >>>They're not about actually *doing* ham radio,
> >>>just arguing about it.
> >>
> >> Too bad they cant do a better job.
> >
> >
> > Indeed

CW provides a 10dB path gain over SSB with a simple twist of the mode
selector knob. Can't wait to find out what the path gain of CW will be
vs. all the furiously hyped HF digital modes. None of which actually
exist 10-15 years later of course. Big surprise huh?

RX front ends: One can sink thousands upon thousands of bucks into
current-tech xcvrs which, by current standards, are the masters of
front-end performance. IC-7800, Orion, FT-9000, etc. IF and ONLY if the
atmospheric + QRN noise levels are below the RX noise floor. If not a
kid with a "hopeless" $200 old crapper xcvr in a quiet location will
spank the pants off any of the aforementioned big boxes.

If the kid has also learned how to use his ears to duck around strong
adjacent signals and how to copy thru his crummy RX noise floor he'll
have another pile of dB gain over the clueless who only have money,
mouths and keyboards in some combiation or another.

Beyond this comes the subject of "operator skills". Oh Good Lord I
forgot again: Discussions about operator skills have nothing to do with
technical or policy "matters".

. apologies . .

These are the realities of REAL ham radio.

Fuggem, let 'em eat cake and rant on.

There are more people in prisons in the United States than
licensed Amateurs, however I fail to see the relevence to that, too.

Shall we allow those illegals to obtain Amateur licenses much the
same as some states are considering allowing illegals to obtain drivers
licenses, public assistance, etc? Perhaps we should go ahead and start
putting repeater ID's up in Spanish?

> 2) I believe there are more unemployed in the state of California, alone,

Maybe if we got the unelmployed to spend some of their idle time
getting an Amateur license those numbers would shift???

> 3) I believe almost ALL generals and extras are sixty years of age and
> above.

Hmmmmmmmm...I know of a COUPLE Extras who are over 60, but almost
everyone I know (myself included, obviously) are well under 60. Of
course those numbers change drastically depending on local
demographics. I am sure that there are more 60+ Extras in Miami than
Nashville, for example!

> 4) I believe amateur has become a group of self-serving old men of
> yesteryear and they impede progress, I am unclear if they realize they are
> doing this, or the extent which others see them as doing that.

I believe this is an inaccurate assessment.

The simple fact that FEMA and it's agents are pumping millions of
dollars INTO Amateur Radio training programs and providing Amateur
Radio facilities at it's comm centers alone disproves the assertion.

> 5) I believe MOST amateur gear is outdated, uses technology from
> yesteryear and manufacturers see hams as a minute group in regards to
> sales and expendature on research and development and retooling.

Judging on the capabilites of "modern" Amateur gear (ie: Icom
IC-756ProIII, etc) I'd say this is yet another inaccuate assessment.

Just picking up even one of the most basic 2 meter HT's and
comparing what they can do as opposed to thier forebearers demonstrates
that the move continues to be a forward one.

And if the manufacturers considered us so minute, why do the
manufacturers continue to "retool" and aggressively offer even newer
devices with expanded options and functionality? That retooling costs
money, and those expenditures must be justified to stockholders.
Obviously someone thinks the expenditure is worth the return.

> 6) I believe, right now as I type this, that this is all in the first
> stages of a massive change.

We have always been in a state of flux.

As a matter of fact, I think some of the biggest fluxers I have
ever known are fight here in this forum!

> 7) I believe amateur are a "Non-Issue" purely from these dismal numbers.

I refer back to my comments under Item #4 and #5. The investments
of trust and money by government, public and private agencies and
manufacturers doesn't support your contention.

Just because there aren't as many HT's hanging from beltloops as
cellphones does not negate our functionality or "worthiness".

> 8) I believe much more, and it all points in the direction of the
> above--amateur radio will change/adapt or die, and the oldsters would have

> great men in amateur radio died when the old guy who assisted me in
> getting tickets died, and I believe he would have been man enough to
> have stood up to the plate and called a spade, a SPADE!

If you read some of the Amateur journals from 20, 30, even 40
years ago there have been doom-sayers and gloomers throughout.

I say that Amateur Radio today is NOT Amateur Radio of 10 years
ago, let alone of the 30's as suggested by one rather poorly informed
participant of this forum.

Nor will the Amateur Radio of 2005 resemble anything like what our
kids or their kids will experience, assuming the commercial concerns
don't get their way with our allocations.

> I am a believer...

Ditto.

> so?

> > FCC ignored the majority opinion back then and reduced code
> > testing to 5 wpm. The majority opinion was *not* acted upon
> > by FCC.
>
> and No one ever promised or sugessted it would be

Sure it was.

It was called the Constitution of the Untied States.

That concept has been lost in the caucophony of
least-common-denominatior bar-lowerings.

> the FCC has a DUTY to the PUBLIC interest first and only then to the
> interests of the ARS and finaly to the WISHES of the ARS

"The "wishes" you refer to are by citizens of the United States
who told the government what they wanted.

The government ignored them.

> > Whether FCC did the best thing or not is a matter of opinion.
> > But the plain simple fact is that the majority was *not*
> > anti-code-test.
>
> so

So the wishes of the citizens were ignored.

The Consitution was violated.

> > Now of course if the majority of comments on 05-235 are in
> > favor of no more code testing, FCC will most certainly say
> > they are simply doing what the majority wants.
>
> Not likely

Absolutely. Watch.

> The FCC will simply issue it's report and order

And in that R&O they will say "...the majority of respondents..."

>
> A better question would be to ask what your motivation was to work out
> of band Frenchmen on 6 meters.

An ever better yet question (and one that's already been addressed
to but unanswered BY Brain...) is where was Dave ever responsible for
knowing what the allowed band limits by ANY foreign Amateur were?

Can YOU swear, with ABSOLUTE certainty, that EVERY foreign Amateur
you ever "worked" was operating within his/her allowed scope of
licensure?

For that matter can you swear, with ABSOLUTE certainty, that EVERY
domestic station you've ever "worked" was operating within the scope of
his/her license?

Can YOU show where in Part 97 it requires an FCC licensee to be
knowledgable of OTHER administrations licensing criteria...?!?!

Just wondering, since YOU keep making an issue of it...

Oh?

I hang glide. I can attest that the number of qualified hang
glider pilots is less than a fifth of the numbers of licensed
Amateurs...active pilots less than that....And NO licensure, let alone
Morse Code test is required!

Source record: 115398

K4YZ:

Yes. You are saying exactly what I am pointing out is at fault. A handful of hams have formed a protectionist group to keep amateur licenses to a minimum. They are quite content with the extreme low numbers of licensees. Their arguments will all revolve around an argument that, "A handful of hams is quite sufficient." They have chanted this insane mantra until it actually rings with the sound of truth in their own ears, it is only those outside this protectionist group, and those amateurs able to view this all in a "third person" frame of mind which see the real reality. And, of course, now the FCC has seen the light and pulled back the covers on what has been "the elephant in the china closet" for many decades.

However, with these dismally small numbers, protectionist amateurs are attempting to argue the bands are crowded--this we disagree on, vehemently! Arguments are even posed that the relatively small numbers of hams contesting nearly brings the bands to halt, from traffic and pileups, again we disagree on this point.

It is obvious, because of the above--and more, the protectionist/self-serving amateurs are arguing against new licensees, we vehemently disagree here also.

I think it quite apparent, we need drastic change and quickly. Old amateurs are going to squeal like fat hams (pun intended) over losing their closed little club which has been being ran at their selfish expense to american citizens.

No one likes change but a baby with a wet diaper...

Perhaps because the ARRL/W1AW actually provide a usable service to
Amateur Radio...Not to mention that at least W1AW keeps it's operations
close to the band edges where few folks venture...K1MAN plops down in
the middle of the band and other operations be danged.

> >
> > That's merely your interpretation.
>
> And the matter of regulations for foreces operating under UN
> authority on foreign soil.

You would have to speak to the feces under UN control. I wasn't part
of that game.

> > Given your propensity for lying...(SNIP)
>
> You mean my propensity for rubbing YOUR nose in YOUR lies,

> Brain...

No. I said your propensity for lying.

> > and not having seen you in Somalia for you to make such a judgement,
> > I'm highly suspicious of your statements.
>
> What's to be suspicious of?

You have no first hand knowledge of the situation, yet you make
judgements.

Face it, Steve, you were a non-participant, so your opinion just
doesn't matter (hi Len).

> YOU stated you operated from Somalia. (Your words)
>
> YOU stated your "commander" gave you permission to do so. (Your
> words)
>
> Unless your "commander" was appointed by appropriate UN authority
> to do so, that "permission" was inappropriately given.

My commander was appointed my the first Bush president. He does not
work for the UN. BTW, neither does his son.

> In short...You were illegal.
>
> Based upon YOUR words....

In short, you've got your head up your rectum. You must like the
view...

> > In fact, I'd say you are lying.
>
> Then if I am "lying", it's based upon bogus information YOU
> provided.

You assume that my unit was under UN control. That's where you went
wrong.

> > Nothing new there.
>
> Now THAT would be correct...Nothing new there when it comes to
> bogus information from Brian P. Burke.
>
> Steve, K4YZ

Your continued ignorance of the facts is what's not new.

## 1034. Everything Old Is New Again

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-09 16:32:33 UTC
From: N2EY@AOL.COM
Message-ID: <1123605153.231340.226310@g14g2000cwa.googlegroups.com>
Source record: 115383

The Space Shuttle made it back safely this morning. (Collective sigh of relief).

But it will be a while before any more Space Shuttles fly again. More problems to fix.

I noted that NASA made a point of referring to this mission as a "test flight"...

In any event, the Shuttle program is nearing its conclusion. NASA is already looking to the next generation of people-carrying space vehicles:

http://www.sfgate.com/cgi-bin/article.cgi?f=/c/a/2005/08/07/MNGJSE4CAS1.DTL&type=science

which is a lot less cumbersome as:

http://tinyurl.com/aevvs

The "new" designs are much closer to the old, one-time-use, pre-Shuttle rockets. Reusability, gliders and large cargo bays are out, simpler, one-shot capsules are in.

An interesting look at the Space Shuttle's history, ideology and lessons hopefully learned can be seen at:

http://www.idlewords.com/2005/08/a_rocket_to_nowhere.htm#school

which is less cumbersome as:

http://tinyurl.com/cws82

---

What does this have to do with ham radio? Plenty! For one thing, ham radio is mentioned in the second article.

But more importantly, there's the whole issue of "new" vs. "old" technology, fads and fashions, and politics vs. engineering and science.

The Space Shuttle was promoted as the "next big thing" in space travel - as a "space truck" that would cut the cost of getting to orbit, reducing the waste of one-time rockets, etc. We were told of turnaround times of a few weeks, and missions costing 10 to 20 million dollars total - none of which has ever come to pass, 30 years after the program began.

What wasn't promoted nearly so heavily was its planned role as a Cold War DoD resource, for doing things like snatching Soviet satellites from polar orbit, and setting up SDI platforms. Nor the predicted failure rate of about 1 in 100.

Most of all, the amazingly complex technology of the Space Shuttle hasn't been adequate to prevent two complete losses of vehicle and crew.

Now some may scoff at these words from a non-rocket-scientist. But it doesn't take a rocket scientist to understand what went wrong in the Challenger disaster, nor in the Columbia one. It doesn't take a Von Braun to see that if your mission-vital systems like the reentry heat shield are exposed to being hit at hypersonic speeds by anything from a bird to ice to foam, there's a good chance of damage on the way up that will result in big trouble on the way down.

None of this is meant to belittle the accomplishments of NASA or the bravery of the Space Shuttle crews. It does seem odd, though, that such bravery should even be needed after 30 years and billions of dollars spent on the Space Shuttle program.

Perhaps the most important legacy of the Space Shuttle will be the lessons learned from its problems...

BUZZZ wrong answer

>
> It was called the Constitution of the Untied States.

nope an other Stevie lie

That important document say nothing of the sort

It says nothing about govening rules by direct public referendum

Indeed it says nothing giving the FCC any power at all, except the
socalled supremacy clasue declaering itself and any TREATIES we sign
the supreme law of the land, that and the neccasary and proper clause
are all that allow the FCC exist to exist as a legal body, neither says
anything about governing the reags by referendum

>
> That concept has been lost in the caucophony of
> least-common-denominatior bar-lowerings.

not at all

what has been lost by you is the notion that Radio rules and regs are
there to serve the PUBLIC interest not you narrow cliquish whims

>

Source record: 115386

Please refer to the link below from AMATEUR RADIO NEWS by Doug Aiken,
K1WPM:

http://www.imsasafety.org/journal/novdec/node1.htm

Pay particular attention to the part entitled 'Background of Vanity
Call Signs.'

Just because the FCC is ostensibly ignoring what the majority (IMHO) of
U.S. amateur radio operators want for their service, it doesn't mean
we cant have a more meaningful say in the final outcome.

Now is the time to write or e-mail our elected representatives. Even if
they are not the folks you personally voted for or plan on voting for,
send them a simple note asking for their assistance in getting the FCC
to respect your (Our?) wishes. All that's really needed is for
someone who actually has some influence on matters affecting the FCC
budget to make an inquiry or two.

Write the folks that send you campaign material as well. It only takes
a moment or two, but the results can be gratifying.

Exactly! Point is, if you can get the S/N high enough, you can put lots
more data through the same bandwidth.

There's no one answer to "how much data can I put through a bandwidth
of X Hz",
because it's related to things like S/N and modulation method.
Tradeoffs,
ES101 stuff.

> > Telephone line modems make use of the predictable stability and

The 'phone companies have cleaned up their act so much that most lines
will not
only support 56k dialup, they'll also support DSL. Such improvements
are almost
invisible to the unsuspecting public. They happen over periods of
years.

> reciever, with exceptional strong signal handling capacity.

Not really.

In most situations, HF radio reception is limited by the noise picked
up by the antenna,
not internal receiver noise. Been that way since at least the 1930s. It
does no good to
have an HF receiver with, say, .05 uV for 10 dB S/N sensitivity if the
antenna picks up .5 uV of noise in the same bandwidth.

You don't need a noise generator, lab full of gear or an EE to know if
your receiver is sensitive enough. Just do this simple test:

1) Tune the rx to an unoccupied frequency, using the mode and bandwidth
you intend to use.

2) Turn off the AGC and turn up the gain until you hear the background
noise roaring away.

3) Disconnect the antenna.

If the noise drops way down, or disappears, you have all the
sensitivity you can use in that application.

> appreciation of mature technology and people.

Heck, some of them don't have any apparent maturity themselves...

> They choose to concentrate
> on the limitations and foibles of both, not realizing that they are
> themselves full of their own foibles and limitations.

You have to remember that in some folks' minds, newer *is* better,
regardless
of the reality. It's almost an ideology of constant change as being
morally
superior.

Remember Red China's "cultural revolution" in the 1960s? One of their
main ideas
was that there would be a constant, continuing revolution in everything
- that
all the old ideas would be tossed aside, to be replaced by the New.

In the process, however, they were unable to do even simple things like
feed
themselves, and large numbers of people died because of it.

Here in the West, the ideology of constant change has to do with
selling things.
Fads and fashions. In the process, all sorts of bad stuff and waste
come and go.
Worst of all, there's a sort of addiction to the quick fix rather than
real solutions.

> They create for
> themselves great effort and even harm in their rush to discard the old,

"essentially"

No, it's not.

> > And you continue to avoid answering my question..."What makes you
> > think that I'd hazard my freedom for a putz like you...?!?!"
>
> and I have answered it becuase you are nuts

That's an answer?

Where are YOUR credentials to determine the stabilty of anyone
else's mental health, Mark?

The fact that YOU are a mental health patient?

> > > > > > Yet here you are stirring the pot.
> > > > >

> harrasment unless I do as YOU say

What threats?

What 'outing (my) demands'...?!?!

You ARE gay, Markie. You stated so yourself in this forum.

> It is all blackmail

What blackmail?

In order to "prove" blackmail, you have to prove that I stood to
gain from some act or threat of violence against you.

No such "blackmail" was caused since no such threat was made nor
did any potential gain exist.

> > > your actions quailify
> >
> > Not in an AMERICAN court of law they wouldn't.
>
> sure do

Nope.

We will now await your presentation of credentials in
jurisprudence.

> > > you continue to black mail me
> >
> > You continue to utter unfounded and hillarious lies in a public
> > forum.
>
> nope
>

I never suggested to kill you.

That's your rampant paranoia.

> discsion of murder has nothing to do Radio or Morse Code

You're suggesting the "murder" of Morse Code usage in Amateur
Radio.

> > > Threating to speak to Todds folks is a threat
> >

Why do you continue to make and remake this assertion in the face
of evidence to the contrary?

> cuting another lies

Avoiding other issues you don't want to get your nose rubbed in
any more.

> > > Wether od not you ever had any intention on caring out your threats has
> > > nothing to do your making them
> >
> > I didn't make any, Markie.
>
> One shot on kill .. is a threat

Nope.

It MEANS, as it meant in the ORIGINAL CONTEXT, was that my
comments "squarely hit" what I "aim" for.

> you are lying in saying otherwise

You are lying in tryng to make it anything more than it was.

> that it was idle matters not

It wasn't a threat..."idle" or otherwise.

> > > You simply make Idles(so far) threats, but you make threats often
> >
> > Nope.
>
> abolsutely true

Absolutely UNtrue...

But don't let that slow you down...

> > > > > terorists and balckmailer need to be resited when possible

Nope. Just Markie Morgan lying in public again.

> Just Stevie squirming to evade the turth of his bulling personality

Nope. Just Markie Morgan lying in public again...and again...and
again...

> > > > > cuting a lie
> > > cuting another lie
> cuting speling cop

You just can't stand it, can you...cut, cut cut...

> > > yes you do you threatened Tood I saw that, you conitue to threaten me,

> cuting spelling cop
>
> > I didn't threaten Todd.
>
> you sure did
>
> you threatened to call his perants you threatened to contact his ISP
> (you carried out that threat but it was still a threat

It wasn't a threat.

Toddie violated the terms of his TOS. He refused to stop. He got
what he asked for.

> you are a bully and so juvi you can't even take responiblity for YOUR
> actions

Sure I do.

> you will now proceed to blame Todd for these threats

Nope. Toiddie is responsible for his own actions...And he had to
pay a price for them.

If YOU think that I have made all of these threats against you and
am the "stalker" you accuse me of, please, file a civil or criminal
charge against me, Markie..

It will be quite satisfying to have you served with the countersuit
and then see who's side holds up better in court.

> Nothing you do is YOUR responiblity

Sure it is.

And I've put my "hand out" with apologies or corrections where
appropriate.

Ask around.

> > > and you lie about it
> >
> > Nope.
> >
> > > > > threats to call a prosecuter for my lying online, threats to came to

> > > >
> > > your threats
> > >
> > What threats?
> >
> the threats typed above

What threats?

You keep saying "those threats" and I keep saying "cite them".

All YOU do is say "those threats".

There are NO threats.

> > > > > cuting stevie evasion
> > > > >
> > > > What evasion?
> > > >
> > > your evasion
> > >
> > WHAT evasion...?!?!
> >
> your eveasion

What "eveasion"...?!?!

> I have typed it often typed a few examples in this post and will not
> repeat just becuase Stevie the BULLY demands I do so

You've retyped nothing except "your threats" and "your evasion",
Markie.

You've not SUBSTANTIATED either...

> > > > You keep making accusations that I ask you to substantiate.
> > >
> > > yes you do, overlooking the fact it has been done in many case Years
> > > ago, and repaeted again and again

I love being called "stupid" in a sentence that is so fractured
that it takes several re-readings to figure out that I was "insulted".

> > > cuting another stevie evasion distrotion
> >
> cuting speling cop

"cuting"

"distrotion"

> > You couldn't have cut a distortion because there wasn't one there.
>
> sure was

Nope.

> > Oh?
> >
> > Exercising my rights to travel freely within the United States is
> > now a "threat"...?!?!
>
> when cuopled with your other behavoir certainly is

"cuopled"

"behavoir"

What "behaviour" do you refer to?

> > > threatening action with various parties
> >
> > What threats?
>
> asked and answered

Avoided and evaded by you.

> > > > > stop harassing people

Nope.

> > > why do you tell such obvious lies
> >
> > Why do you put words in others mouths and try to pass them off as
> > truthful?
>
> that is your gig stevie

Nope.

As usual, you're welcome to TRY and "prove" that, however you'll
not be successful.

> > > > "First Amendment", Markie...
> > >
> > > you don't have any right to threaten people
> >
> > I haven't threatened anyone.
>

Nope, nope and nope.

> when 4 people tell you are doing something an inteligent man would
> start to wonder if there wasn't something to it, but of course that
> lets you out

Any discussion group wherein YOU profess to be an "inteligent"
(intelligent) man is a conversation mispent.

> > >the 1st amendment does cover that
> >

> > assemble, and to petition the Government for a redress of grievances.
> >
> > UNQUOTE:
> >
> > What IS there:
>
> so what?

The assertions YOU cut from the quote were NOT covered by a single word of the First Amendment.

Let's put this BACK into context since you snipped all of that out...

QUOTE

> you don't have any right to threaten people

I haven't threatened anyone.

>the 1st amendment does cover that

No, it does not.

QUOTE:

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

UNQUOTE:

What IS there:

The GOVERNMENT is prohibited from establishing laws IRT the establishment of religion.

The GOVERNMENT is prohibited from abrdging one's freedom to exercise religion of choice.

The GOVERNMENT is prohibited from abridging freedom of speech.

The GOVERNMENT is prohibited from impeding the press.

The GOVERNMENT is prohibited from restricting peaceful assembly.

The GOVERNMENT is prohibited from making laws that impede the
people's right to seek relief of their grievances.

What's NOT there:

Any wording that says that, if I WANTED to, I couldn't threaten
you or anyone else.

Yes, there ARE laws that provide penalties for it...But the
Constitution, as you suggest, is NOT source of those laws.

UNQUOTE

Now, I'd appreciate it if you'd acknowldge your "respoinblty" to
TAKE "respoinblty" for your mistake.

> a key word in the ruling of the court is peaceably

The fact remains that the First Amendment does NOT say what you
alleged it to say.

> that is why threatening people ois ilegal that it why the hate speech
> have a legs to stand on

"ois ilegal"

What were you trying to say?

What "hate speech"...?!?!

> you are guilty of threats and hate speech

Nope. Not even close.

> cuting stevie off target rant

Proving that YOUR assertions were "off target"...?!?!

> > > > > > You're the one with the honesty issues...said so yourself on

> deem it proper, very calmly

Profanity is the tool of a violent mind, Markie.

> so another lie

Nope.

> I am not angery with I am disguted by you

You are disgusted by getting your nose rubbed in your mistruths
and deceit?

Then stop doing it.

> > > > > been doing it for years
> > > >
> > > cuting stvie distoring context
> cuting speling cop

"cuting"

"speling"

Nice going, Markie...66 2/3 % error rate in one sentence...If one
can accurately call that a "sentence".

> > > > > threats harrasment trying to intimadate people
> > > >
> > > > Your "threats" to "sue" were never deemed even remotely plausible.
> > >
> > > never made one
> >
> > Sure you did.
> >
> > Said you were going to use the ADA to force the FCC's hand to give
> > you a free ride on the code test.
>
> Lie I said a case could be made

A case CAN be made for your deceitfulness and dishonesty.

So as I said earlier, if you think a case can be made against me,
file it.

> I said it was a hard case at that time with the treaty lang in place

So what?

A M E R I C A N law allowed for alterations to the treaty as did
caveats IN the treaty that gave administrations some leeway.

> I also said It could be VERY expensive and more than I cared to venture

Then obviously not enough dedication.

> you don't understand the difference between saying something could be
> done and it will be done , or that it will be attepted

Sure I do.

> that you confuse tense and moods is part of the process where you so
> often distrot and twist a true stament someone has made, into lie of
> YOUR making

No lie made here.

You made threats of lawsuits under ADA.

> > > I have pointed that you are vulernable to one, never threatened to do
> > > it you have got anything worth talking
> >
> > I am not "vunerable" to any suit brought by you!
>
> sure are If Just filed it id would cost a fair amount of money

The cost would be yours twice over, Markie.

Your initial filing against me, then your defense expenses for the
countersuit.

> that applies to you or anyone for that matter

Yep...And they can countersue too.

> > You sure do like flattering yourself!
>
> more evidence that stevie does not have metal contact with the real
> world

There's no metal in my body, Markie.

How would I have metal contact withn the world?

> > > and of plausible to whom? You well that is more than likely right, a
> > > real crout that is another matter
> >
> cuting spelling cop

Congratulations. Only 33 1/3% error rate that time.

> > > > Your semi-literate dreck can be considered "harrassing" in it's
> > > > own way.
> > >
> > > really someone is making you read it?
> >
> > If I want to try an understand what you're saying.
>
> you don't want to understand you are just hunting for things you can
> twist

There's nothing to "twist". Your comments are twisted right out
of the box, Markie...I jsut ahve fun with them!

> > I think learning Serbo-Croation by braille might be easier.
>
> more bashing of the Disabled, the blind in this case

Nope.

Are you NOW alleging that only the blind can use Braille?

> with your clear lack of human compassion why did you become a nurse?

What "clear lack of human compassion"...?!?!

You mean not being a soft touch for every self-appreciating,
self-victimizing jerk that tries to take advantge of others compassion,
Markie?

If I were that, every hospital in every community would be filed
to the rafters 24/7 with no hope for ever seeing an empty bed again.

> was it another power play?

By saying "another" powert play, you're suggesting an ORIGINAL
"power play".

What would have been the first.

> > > > And people like you never "intimadate" anyone. Humor them,
> > > > sure...
> > >
> > > not trying to intimadate I would not horn on your territory steve, not
> > > that you arre any good at it
> >
> cutin spelling cop

Still 33 1/3%, however this time you ever mispelled your mispelled
word!

> > I'm not trying to intimidate anyone, Markie.
>
> liar you admited to it in the post I am responding to

No I didn't.

Quote the line where you alledge I say "I am trying to intimidate
you", Markie...

> > > > You've rendered more than your fair share of laughs here!
> >
> > But you HAVE left us laughing!
>
> comenting on your words

"Commenting"

> Haven't you haerd about what it means when you talk to yourself

"heard"

I am not "talking to (my)self"...

I am talking ABOUT you.

Steve, K4YZ

Doesn't matter, Interference, is interference. it doesn't matter if
they are providing a service or not.

>Read the rules yourself...And try to not drool on them as you do.

I have read the rules and there is a double standard on the definition
of what non-commercial is

>It's not vague to anyone except for those Junior D-J types, such as yourself, as to what
they are.

No, the one's don't understand are those who try to put more into the
rules then what is here. For example the idea that information
bulletins can be opinionated, yet there is no rule that states that,
nor is there any order from the FCC that states that.

Todd N9OGL

> licenses, public assistance, etc? Perhaps we should go ahead and start
> putting repeater ID's up in Spanish?

and here we see your paranoia, always seeing a "plot" to give away
licenses

OTOH I see nothing wrong with them having Ham licenses is otherwise
qualified, after if they got "back home" many of them could operate
legaly here, what is realy gained by excluding them

and you mean there is nowhere that they don't put repeater id also in
spanish, that would be suprising

>

yep the shuttle is and has been from its first launch a failure at
preforming the missions promised

that it has some use is of course true

>
> Most of all, the amazingly complex technology of the Space Shuttle

amazing complex I slikely part of the reason they were lost and NASA
refusual to listen to anybody else

now you are fibbing jim Challenger blew up becuase NASA decided that PR
was more important than safety, the problem was Oring, not the heat
sheild

> exist 10-15 years later of course. Big surprise huh?

Wow! 10 db? I knew it was superior. I didn't know it was that much
superior.

But I am firmly convinced that OOK CW coupled with the processing power
of "wetware", is the bottom line of getting the message through.

To argue otherwise is well, not that smart.

Now the worst conditions won't happen every time of course, but they
will happen some times.

Who in the hell (PMF) said THAT????

Operator skills are intrinsically a part of Amateur radio policy.
Otherwise why do we have people who are trying to remove operator skills
from the equation?

> . apologies . .

# 1047. The majority--well, ok, if that is the way you want it!

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-09 17:41:53 UTC
From: John Smith <assemblywizard@gmail.com>
Message-ID: <pan.2005.08.09.17.41.53.97584@gmail.com>
Source record: 115397

To all:

The majority of people who communicate use the internet (well, phones and cell phones too.) Email, Instant Messaging, blogs, newsgroups, webpages, IRC chat, etc, etc... and these communications take place on a worldwide scale and virtually touch the life of every citizen in first AND second world countries.

Since BPL would be a MAJOR GAIN to the majority of people communicating (using the internet) it would be one MAJOR MISTAKE to allow a handful of hams, an insignificant number of the people using communications (and then, theirs is only a hobby communication) to control the destiny of BPL simply because it interferes with an insignificant number of hobby users.

It will be nothing short of a crime to allow this insignificant number to influence BPL at all. The FCC and any public official(s) found doing so, and being so influenced, should be reprimanded harshly!

How this self-serving bunch of closed-membership hams even hope to stop tens of millions (hundreds of millions?) from these benefits, all so they can set and enjoy their little hobby, staggers the mind and leads one to doubt the sanity of those who would participate in this scam!

Amateur policy needs to get rid of its' self-serving element and demonstrate they have good judgment and will hold their self-serving interests above the interests and benefits of the hundreds of millions of american citizens. It the stark light of reality amateur radio is seen in the perverted state it has fallen into. This has happened by allowing men and women of question character to control the destiny of amateur radios' course--this needs to change direction and restore the dignity to this hobby which it once held, decades ago.

If there is not a clear rule, regulation or tradition in amateur radio which directs its members (licensees) to always behave in a manner which holds the interests, benefits and well being of the citizens of the united states in paramount importance, one SHOULD be placed there. However, it seems a natural principle educated men or worth, intelligence and caliber would hold to... and here, upon this simple test, you can weed the chaff from the grain...

Sure he has...in his repetitive insinutations that DAVE was
responsible for the transmitting frequency of the French stations. He
wasn't then and isn't now, yet Brain keeps making the same insinuation
over and over.

> > Can YOU swear, with ABSOLUTE certainty, that EVERY foreign Amateur

## 1050. chuck the shuttle, we need an alternative fuel source

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-09 17:53:52 UTC
From: John Smith <assemblywizard@gmail.com>
Message-ID: <pan.2005.08.09.17.53.49.900525@gmail.com>
Source record: 115401

We need to scale back NASA and any space plans, other then the pursuit of
maintaining military superiority in space, if needed and focusing on
developing a fuel source which is not harming the planet and threatening
to bring us to our knees from dwindling supplies.

A scientific project on the scale of NASA and designed to develop a new
fuel, or new fuels, would be in our best interests...

Priorities need to be examined here...

It's the receiving station's inerpretation of what "interference"
is.

Obviously a significantly higher number of people consider K1MAN to
be "interference" than they do W1AW. And for good reason.

> >Read the rules yourself...And try to not drool on them as you do.
>
> I have read the rules and there is a double standard on the definition

Nope.

The ARRL does not refer listeners to it's website for it's paid
services.

K1MAN does.

It really is THAT simple.

you threats
One Shot one kill...

your threats to contact UP officals and (do something)\

your threat to expose me as Gay in the newsgrup those many years ago

why do you need everything repeated and again and agian

>
> What 'outing (my) demands'...?!?!
>
> You ARE gay, Markie. You stated so yourself in this forum.

but not until after you outed me, you preceeded that action by
threatening to do so unless I complied with your demands

that your blackmail was unsucessfull has no bearing on whether or not
your prefromed it

>
> > It is all blackmail
>

Killing is killing

it was and remains a threat
>
> > you are lying in saying otherwise
> >
> You are lying in tryng to make it anything more than it was.

nope

if you were manere when it was brought you would have adknowledged the
words to have been illchoosen or something like that

instead when I did not react as you wish you added various threats of
legal action, repated the thret in various manner and generaly behaved
in a threatening manner

>
> > that it was idle matters not

no mistake

you keep trying to divert the issue

you have NO right to threaten people

you have NO right to harrass people

you have NO right to stalk people

The first amendent does not give the right to do ilgeal things

nor does any other part of the Constitution

>K1MAN does.
> It really is THAT simple.

The rules state and an amateur station cannot make money direct or indirect. when a shortwave listener hears W1AW their going to go to the internet and go to yahoo or google and look it up which leads them directly to the ARRL site. that's called INDIRECT as to K1MAN's DIRECT.

>You're the one trying to "...put more into the rules then (sic)
>what is here."

no I'm not, I have been stating there is no rule and regulation nor final order from the FCC that states an Information bulletin can not be opinionated. If the FCC didn't want Information bulletins to opinionated then they would of stated in the rules, they have that power.

> yea the shutle was and is a failure

Based upon WHAT data, Mark?

That people have been killed flying it? So what? People die on
commecial airliners on a monthly basis. Are airliners a failure?

E V E R Y future manned space mission, near or deep space, will
be predicated upon missions learned from the Space Shuttle era. That,
in-and-of iteslf makes the Shuttle Program a success.

> > What wasn't promoted nearly so heavily was its planned role as a Cold

>
> yep the shuttle is and has been from its first launch a failure at
> preforming the missions promised

The "shuttle" has never failed in performing it's mission.

Of the two catastrophic failures of Shuttle missions, one was due
to the boosters carrying it, and the other was due to damage inflicted
on the orbiter by its', ahem...booster. We can "implicate" NASA safety
deficits as a morbidly contributing factor.

> that it has some use is of course true

That is was and continues to be a scientific milestone of our age
is even more true.

That it's obviously in need of re-engineering is true too, but then what machine made by man was ever cast in one form then NOT "re-engineered" for better performance?

Can you imagine where the "Internet" would be if we were all still using Commodore 64's and TRS-80's...?!?!

To call the Shuttle program a "failure" is ludicrous.

> > Most of all, the amazingly complex technology of the Space Shuttle
> > hasn't been adequate to prevent two complete losses of vehicle and
> > crew.
>
> amazing complex I slikely part of the reason they were lost and NASA
> refusual to listen to anybody else

What, Mark?

As for Jim's comments, I ask WHAT transportation technology has proven itself 100% error free?

I just watched a special on Discovery Channel about a Canadian Airbus that had to deadstick into the Azores because there was a fuel leak and the crew absolutely refused to believe the technology (read that "the gauges") that were telling them they were losing fuel.

And there are countless "recalls" of motor vehicles due to design, engineering and manufacturing errors. They've been building motor vehicles for over a century now...the last Shuttle as finished in what...1992?

What "fibbing", Mark?

Jim said, quote:

> > But it doesn't take a rocket scientist to understand what went wrong in the
> > Challenger disaster, nor in the Columbia one.

Where is there a "fib" in there, Mark?

And there was no ONE fault in the Challenger tragedy...it was a compilation of errors that resulted in the mishap. Any positive effort to mitigate any of the contributing factors may well have resulted in a

different outcome.

> > None of this is meant to belittle the accomplishments of NASA or the

W1AW does NOT "make money", direct or indirect.

The American Radio Relay League does, which in turn funds W1AW.

But then you could also say that my employer "funds" K4YZ in the
same way.

> >You're the one trying to "...put more into the rules then (sic)

So far, no one has abused the rules in such a way as to argue what
"information" means. The FCC has pretty much assumed (erroneously,
obviusly...) that the average person knew the difference.

"Opinion" is not "information"...it's opinion. And offering your
opinion in a one-way transmission is broadcasting.

K4YZ:

Well there ya go, ya figured it out!

K1MAN (the licensee) does NOT make any money! Glen Baxter (the man) does!

Same thing, good argument you posed, the FCC shouldn't hassle baxter
anymore then they do arrl/W1AW.

For an alternate way to reach terrestrial orbit, one possibility
is shown in the August 2005 issue of the IEEE SPECTRUM. It is the
cover story. In the same issue (beginning page 12) is a story
where Europe is joining Russia in building the "next" space shuttle.

SPECTRUM is viewable on the IEEE website, www.ieee.org.

Len:

SPECTRUM? My gawd that just sounds impressive, I don't think I can even look, must be a project of "God Awful Proportions!"

Hey, they didn't get that idea from an old bond movie did they?

Isn't that what goldfinger was working on?

(I am partial to the "space elevator" constructed from carbon nano-tubes...)

Did I forget to say we had to have quiet RF conditions?

I don't doubt that we can increase the s/n ratio by all the methods we
spoke about, but isn't there some limit there? Or is there no limit, in
that we could get ~infinite bandwidth out of any frequency if we had
~infinite power?

N2EY:

No sense in attempting to efficiently send data anywhere, unless methods
are used which employ efficient data compaction and the use of CRC
checksums... it is only there that HS data transmission comes alive...

Encryption is good also, unless you want the whole world to know what you
are sending...

I would even suggest that the majority of radio amateurs communicate
via the internet.

Here's a fuller quote: "Doth not even nature itself teach you, that, if a man have long hair, it is a shame unto him? But if a woman have long hair, it is a glory to her: for her hair is given her for a covering."

That's not hard to understand at all, Woger, and yet you seem to be having difficulties with the ideas that St. Paul tried to convey in his letter. The quote is not out of context at all, unless failing to quote the whole New Testament is the context which you seek.

Also, the original Greek text used the word "ATIMA" when describing long hair. That word can be translated as "shameful" or "vile," where vile refers to the offensiveness of a dead body. In fact, "atima" is used in the latter way in several other biblical passages.

So it is likely that Paul would have thought that your hair reminded him of the unseemliness and offensiveness of a dead body

We, on the other hand, know that it only smells that way.

But, but, but....

We had to break a Treaty to attempt that. The no-servers don't like
that plan.

if needed and focusing on
> developing a fuel source which is not harming the planet and threatening
> to bring us to our knees from dwindling supplies.

and terrorist induced disruptions.

> A scientific project on the scale of NASA and designed to develop a new
> fuel, or new fuels, would be in our best interests...

The time for that was 1973 (1st oil embargo), 1977 (second oil
embargo), 1991 (first Gulf War), 2001 (WTC/Pentagon attacks), and 2003
(2nd Gulf War). In that time frame, we've only succeeded in developing
an -interruptable- power supply. ;^)

I support alternative fuel development from a national security
standpoint, not a global warming view.

> Priorities need to be examined here...

Ooops. Congress just re-examined those priorities and decided to
"Spring Forward." Huge effort, that, making people change their
clocks.

What would it have taken for the environmentalists Clinton/Gore to have
merely extended the EPA Fleet Mileage requirements for and additional
10 years??? What would it have taken for Clinton/Gore to tighten up
the standards and lessen our dependence on foreign oil???

Answer:

A $00.25 Bic pen.

Instead, there is no longer an EPA Fleet Mileage requirement. None.
Nada. Zip.

So let's buy behemoth V-8 and V-10 vehicles, raise the speed limit to
70mph, and roll them down the highway at 85mph on underinflated tires.
Talk about a highway to hell.

From that site:

QUOTE

We need something better, and that something is a space elevator-a
superstrong, lightweight cable stretching 100 000 kilometers from
Earth's surface to a counterweight in space.

UNQUOTE

I kept looking for the link to Todd's "Inventions" page but
couldn't find it.

Maybe we could anchor this "cable" at the center of one of Todd's
cryogenically cooled storage capacitors, using the resulting explosion
to force the "elevator" into orbit...?!?!

In all seriousness...I wonder if the resulting oscillations in the
cable from it hitting an object in space (or something hitting it...)
will be adequately dampened by the time it get's to the cable's
antipode...?!?!

Now we don't only have to worry about an aquatic earthquate
casuing a tsunami, we have to worry about The Cable falling.

And for the "counterweight" to remain in one place relative to
Earth's surface, it would have to be of considerable mass, sped-up to
phenominal speeds in order to reach station-keeping over the desired
target.

Now the eggheads at IEEE suggest we can orbit a counterweight to
support a 100K Km cable capable of supporting trans-orbital flight
loads...?!?!

Riiiiiiiiiiiiiiiiiiiiiiiiiiiiiiiight.

> knowing what the allowed band limits by ANY foreign Amateur were?

Steve, thanks for answering for David.

So at the time, David Heil was supposed to be a knowledgeable DXer in a faraway land, and I was supposed to lack knowledge about DXing. That was the setting for this embarassing exposure of his DXploits. The fact is that he saw nothing wrong with contacting as many out of band "amateurs" as he could, and even confirming the contact with a QSL card. And he'd do it again >>>even if he knew they were out of band.<<<

Perhaps he will stop demeaning fellow amateurs when he realizes that even a World Renowned DXer goofs on occassion. What do you think?

Based on the specs when the project started

The shuttle was supposed to take cargo to Geostationary orbit instaed
NASA settled for LEO
>
> That people have been killed flying it? So what? People die on
> commecial airliners on a monthly basis. Are airliners a failure?

as normal off target and not related

>
> E V E R Y future manned space mission, near or deep space, will

> in-and-of iteslf makes the Shuttle Program a success.

wrong again Stevie, your premise that learning from something means the
something was a sucess

Yes we have learned a great deal from the Shuttle, which we would
regrardless of wether it was a sucess or failure, Indeed we Likely will
learn more from it being a failure than we would have from a success
>
> > > What wasn't promoted nearly so heavily was its planned role as a Cold

> The "shuttle" has never failed in performing it's mission.

the Shuttle can't fufill the mission it was designed for

the Shuttle has falied utterly in being able to try it designed for
mission

The Shuttle is the best real world example of Dumbing down expectations

>
> Of the two catastrophic failures of Shuttle missions, one was due

>
> And you base this opinion upon what credentials or experience?

experence sure I got it I have folowed the Space program as far back as
I can remember

We started in 60 with the Goal of getting to the moon and we did then
we started to build a space born truck that was supposed to reach GEO
stationary orbit and be able to turn around in 2 weeks

we settled for LEO and months of turnaround

If you really look at BPL, it is not in the best interests of the potential customers. Since it will be transmitted on unshielded wires, it will be subject to interference from a wide range of natural and manmade sources such as lightning, atmospherics, faulty transformers that plague so many electrical lines, flourescent light bulbs, and plasma televisions. I can just see the results when Dad hooks up to the internet and loses the signal when other family members turn on the plasma TV! We already have several technologies far better than BPL.

I looked at a large sample of the comments filed and they are an
embarassment to the Amateur Radio Service. It appears that a simple
literacy test is a more urgent need than a 5 wpm code test. A first
course in English grammar and basic writing wouldn't hurt either.
I prefer not to comment on the logic (or lack thereof) displayed in all
too many of the comments. However I did note quite a number of comments
whose authors were clearly unaware of the last 15 years worth of
regulatory changes or had no idea of what modes were allowed where.

look like it but to give him credit that isn't quite a threat just a
sugeestion of violence

I don't have an "anonymous" persona, Brain.

And I couldn't tell a "kosher" wine from any other kind of wine if
I were bathing in it...

> That is what is known as a one to one (1:1) relationship.
>

>
> Are you suggest violence again?

Nope. Just one way to get your hair cut and make everyone here
happy at the same time.

Steve, K4YZ

If that photo is 'not' Roger as so claimed, why then is he going to the effort of having it removed?
A previous poster was right about Roger in that the more vehement the denial, the more veracity there is to the accusation.

On Tue, 9 Aug 2005 22:26:52 +0200 (CEST), Secwet Woger Swaggart wrote:
:
: To make it appear to sound like something it wasn't intended to
: do.
:
: He quotes 1 Corinthians 11:14, but fails to mention (as usual
: his sloppy, biased "research" is like him, flawed) that Chapter

Here's a fuller quote: "Doth not even nature itself teach you, that, if a man have long hair, it is a shame unto him? But if a woman have long hair, it is a glory to her: for her hair is given her for a covering."

That's not hard to understand at all, Woger, and yet you seem to be having difficulties with the ideas that St. Paul tried to convey in his letter. The quote is not out of context at all, unless failing to quote the whole New Testament is the context which you seek.

Also, the original Greek text used the word "ATIMA" when describing long hair. That word can be translated as "shameful" or "vile," where vile refers to the offensiveness of a dead body. In fact, "atima" is used in the latter way in several other biblical passages.

So it is likely that Paul would have thought that your hair reminded him of the unseemliness and offensiveness of a dead body

We, on the other hand, know that it only smells that way.

In article <woger.saw.de.wheel.in.de.middle.of.de.air@houston-hunks.com>
Saggytits Lee <S...@houston-hunks.com> made excuses and lied and whined:
>
> First, Woger tries to pretend that the mere idea of the existence of
> barbers during Jesus' time is laughable

Roger isn't posting this, stupid. The fact that you think everybody is Roger is laughable, fatass.

Barber in the modern sense did NOT exist, stupid. They cut hair with flint rocks and oyster shells.

Answer the question: Did you get those much needed hair plugs or is the Rogaine option more appealing to your chrome dome?

>
> And then, in a puzzling

"Puzzling" only to you, because I didn't take anything out of context like you do to make it fit what you are trying to say.

>
> This latter statement underlines that fact that short hair

Can't you fucking read, Saggytits? That says nothing about Jesus having short hair. Although it was long, women had longer hair. You shound bitter because you went bald at 18.

>
> It would seem

It would seem that Saggytits is backpedaling and lying and making excuses for his lack of scholarship.

> (lies about "Devry")

Poor Saggytits, Roger never attended Devry, but three very good colleges, unlike you, freshman year dropout.

K4YZ:

Don't forget the fact that cable will be traveling at over 1,000 miles
per hour, the centrifical force is going to add some force to "pull" it
out from the earth, also, it will be spinning in magnetic fields--you know
what happens when you spin a conductor around in a magnetic
field--however, most physicists say it looks very doable.

> >
> > What threats?
>
> you threats
> One Shot one kill...

Wasn't a threat seven years ago.

It's not a threat today, no matter how many times you repeat it out
of context.

> your threats to contact UP officals and (do something)

Why does it concern you that you might be brought to the attention
of

> your threat to expose me as Gay in the newsgrup those many years ago

I didn't threaten yoy with exposing your deviancy, Mark. Pardon
the choice of words, but you "exposed" yourslf all on your own.

> why do you need everything repeated and again and agian

Why can't you type the same word the same way in one sentence?

And I keep hoping that sooner or later you'll come up with a
viable reason for your unviable assertions.

So far, you haven't done it, so expect to keep getting that same
question asked until you pony-up something that sounds remotely
life-like.

> > What 'outing (my) demands'...?!?!
> >
> > You ARE gay, Markie. You stated so yourself in this forum.
>
> but not until after you outed me, you preceeded that action by

> threatening to do so unless I complied with your demands

Markie...I DIDN'T OUT YOU! Whoever you THINK was under your saddle
about your deviancy, it wasn't me...You did that
allllllllllllllllllllll by your self!

> that your blackmail was unsucessfull has no bearing on whether or not
> your prefromed it

I didn't blackmail you or attempt to blackmail you, ergo it's
irrelevent WHAT was "successful" or not.

> > > It is all blackmail
> >
> > What blackmail?
> >
> > In order to "prove" blackmail, you have to prove that I stood to
> > gain from some act or threat of violence against you.
>
> no I don't, however in this case you did stand to gain you demanded I
> stop posting in RRAP obviously you valued that

Nope.

And still no proof, Mark.

> > No such "blackmail" was caused since no such threat was made nor
> > did any potential gain exist.
>
> wrong you made the threat and stood to gain

Nope. The ONLY person here who stands to gain anything by you not
posting here is YOU, Mark. Because as long as you post here, you'll be
known as the illiterate lying gay pagan draftee...

> > > > > your actions quailify
> > > >

Not int he context of the comment I made, Mark. It meant then, as
it does now, taht I "hit" what I aim at...In the FULL CONTEXT of the
statement I amde in response to YOUR comments...

> it was and remains a threat

Nope.

Why do you continue to "force" this lie when it's apparent you're
not telling the truth, Mark?

> > > you are lying in saying otherwise
> >
> > You are lying in tryng to make it anything more than it was.
>
> nope

Absolutely.

> if you were manere when it was brought you would have adknowledged the
> words to have been illchoosen or something like that

If I was "marere"...?!?!

As for "illchoosen", perhaps YOU should have thought about the
response YOUR

> instead when I did not react as you wish you added various threats of

>
> but you threatened to do , and apealently did it

"apealently"...?!?!

I told him I wouldn't tolerate his violent, profane and
threatening behaviour towards me.

He thought rules didn't apply to him.

He found out different.

> have a reason to make a threat doesn't mean you are not threatening him
>
> you realy don't know english do you

I know it better than you. I employ it more accurately, too.

I know that English is capitalized.

I know that "realy" is actually spelled "really", but you keep
screwing that up too.

I know that a sentence is started with a capital letter and ended
with a period, except where a question is asked. You seem to have a
problem with that.

I am sure there was a point there.

Care to make it?

> > If YOU think that I have made all of these threats against you and

> I have sought to do so, and there is realy very little I can do short
> of traveling to Tenn. and doing so that is one of the problems with the
> internet

But...but...but...MARK!

All this past week you were telling us what great financial shape
you're allegedly in...two cars..house...investments...allegedly turned
down a $240K/yr job...

Guess that's yet ANOTHER lie we've caught you in.

> > It will be quite satisfying to have you served with the countersuit
> > and then see who's side holds up better in court.

>
> more threats

Nope.

A promise. You file any "charges" or "suit" against me, and your
ears will whistle for a week with the paper landing in your lap from
summons servers!

> > > Nothing you do is YOUR responiblity
> >
> > Sure it is.
> >

>
> still haven't adknowledged your mistakes about the Brothers Grim

It's "Grimm", Markie.

> > Ask around.
>
> No one answers yes you have

You've not asked the question. And I bet most everyone is
ignoring these posts...so ask them directly.

> > > > > and you lie about it
> > > > >
> > > > > Nope.

> > >
> > > There are NO threats.
>
> sure are

Nope.

> not going to retype them and retype em

You can retype the Magna Carta and it won't prove anything.

You'll still have no threats.

> threats to call a prosecuter for my lying online, threats to come to
> the UP where I live, threats against Todd, and Len and Brain

What threats?

> > > > > > > cuting stevie evasion
> > > > > >

I am not lying and I am not an agian.

> > You've not SUBSTANTIATED either...
>
> you have admited to typing "One shot on kill" that does it right there,
> the rest just piles on

That wasn't a threat.

Wasn't then...isn't now...won't be 100 years from now...

> > > > > > You keep making accusations that I ask you to substantiate.

> your make threats

What threats?

> by the way It is infact ilegal for you to came HERE since you have been
> informed your are unwelcome

It would be illegal for me to knock on your front door or violate
your privacy.

It would NOT be illegal for me to come to Michigan...ANYwhere in
Michigan.

Nor would it be illegal for me to speak with local law enforcement
or mental health case workers about you, being careful to express my
concerns as just that...concerns.

> > > > > threatening action with various parties
> > > > >

> > > > What threats?

> >
> > Then you've proven that you're "hearing voices", Markie.
>
> nope
>
> I have hear Hams call you a Papa Oscar serria on the air

"heard"

"Sierra"

I am sure you hear a LOT of voices doing that, Markie...

All part of your delusional mindset, Markie.

> > > > > > You post, I respond. Period.

> >
> > As usual, you're welcome to TRY and "prove" that, however you'll
> > not be successful.
>
> already have many times

No...you've CLAIMED that you have tried...

All you do is make sandlot taunts.

None of them effective or accurate.

> > > > > > "First Amendment", Markie...
> > > > > >
> > > > > > you don't have any right to threaten people
> > > > >
> > > > > I haven't threatened anyone.
> > > >

> > >
> > > Nope.
> >
> > yes One shot one kill is a threat

Nope.

A prosecuter won't touch your "claim" based upon the original
context and in response to your own words, Markie.

> > > I have seen you threaten Todd and BB and you have threatened me
> > >
> > > Nope, nope and nope.
> >
> > yep yep and yep

Nope, nope and nope.

And no matter how many times you wish to carry that one out, it
still won't be true.

> > > when 4 people tell you are doing something an inteligent man would

> > (intelligent) man is a conversation mispent.
> >

> more evasion

Nope.

You accused me of not being "inteligent". I corrected your error
and answerd the claim.

No evasion.

> > > > >the 1st amendment does cover that

>
> no mistake

A bit mistake...on your part. The one wherein you think you can
keep blustering your way through your inappropriate claims.

> you keep trying to divert the issue

No I don't.

> you have NO right to threaten people

I don't.

> you have NO right to harrass people

I don't.

> you have NO right to stalk people

I don't.

> The first amendent does not give the right to do ilgeal things

You again express your obvious misunderstanding of what is said in
the First Amendment to the Constitution, Markie.

> nor does any other part of the Constitution

And there is nothing in ANY part of the Constitution that is
"violated" by our exchanges here, Mark....

> > > a key word in the ruling of the court is peaceably
> >
> > The fact remains that the First Amendment does NOT say what you
> > alleged it to say.
>
> i was simply using your quoting of the text

You simply did not.

You tried to take ONE word from it and apply it contrary to it's
use in THAT Amendement.

You failed.

> > > that is why threatening people ois ilegal that it why the hate speech
> > > have a legs to stand on
> >
> > "ois ilegal"
> >
> > What were you trying to say?
> >
> > What "hate speech"...?!?!
>
> your bashing of people for being gay or pagan or just different

I don't "bash" you, Mark, and certainly NOT for any of those
reasons.

You keep getting your nose tweeked because you keep getting caught
lying.

And in fact you've LIED about all of those things.

You claimed you WEREN'T gay, but it's since been proven with your
own words that you are.

You claimed you weren't pagan, but it's since been proven with your
own words that you are.

And you've claimed that you're not "dffrent" when it's CLEARLY
evident that you are!

> > > you are guilty of threats and hate speech
> >

> > Nope. Not even close.
>
> sure are I posted awhile back some example form just your titles

And none of them were "hate speech" as defined by the Civil Rights
Act.

Try again.

>
> IYO

Nope.

In the opinion of those "pros" you always refer to.

> I do assert my free right to use such words as I choose as long I as I
> don't violate the rights of others

By re-titling these posts "stvie ####" you violate MY right to not
be called a profane word or to have my "intellectual property"
defiled...

Hence the "Markie Mularkie" posts in kind.

> > > so another lie
> >
> > Nope.
> >
> > > I am not angery with I am disguted by you

> >
> > You are disgusted by getting your nose rubbed in your mistruths
> > and deceit?
>
> No I am disgusted by your manner your hypocrazy, your stupidity

Then you're focusing on the wrong things. You should be disgusted
by the fact that you are a decietful liar who can't post a word without
errors being laid bare.

> > Then stop doing it.
>
> more off tager Bull####

What a "tager"...?!?!

> > > > > > > been doing it for years
> > > > > >
> > > > > > cuting stvie distoring context
> > > cuting speling cop
> >
> cutng spelling cop

"cuting"

It's "CUTTING", Markie. And at the beginning of a sentence, if
that's what that was, the "C" should be capitalized.

> > > > > > > threats harrasment trying to intimadate people
> > > > > >
> > > > > > Your "threats" to "sue" were never deemed even remotely plausible.

> If Thought It would yeild anything I would do so but I don't think you
> have to money to pay the judgement so it is not worth doing

Uh huh.

What you DON'T have are (1) sufficent grounds and (2) what it would
take to pay your OWN "judgement" for the false suit charge that would

be appended.

> > > I said it was a hard case at that time with the treaty lang in place

No it didn't.

If anything, the ADA made it EASIER to make your argument viable.

> > > I also said It could be VERY expensive and more than I cared to venture
> >
> > Then obviously not enough dedication.
>

In YOUR case it would be...

> > Your initial filing against me, then your defense expenses for the
> > countersuit.
>
> nope no doubling there I'd be handle one level on contingincy youd be
> paying out of pocket the whole way mostlikely, or at least in your
> defense

First of all, no lawyer is going to take a "he said/she said" case
"on contingency" unless it's against Wal-Mart, one of the Big Three in
Detroit, etc. In those cases they at least hope to win "shut up" money
and probably will.

Secondly, as I told you before, I have the resources to overcome
any legal case YOU could hopre to mount from Michigan. At the most,
I'd have to pony-up filing fees...No big deal...

> > > that applies to you or anyone for that matter
> >
> > Yep...And they can countersue too.
>
> yea never said otherwise

But you, like Toiddie, throw "I'LL SUE! I'LL SUE" around as if in
doing so you are the only one who can use legal resourse.

As I have clearly demonstrated here, however, you'll quickly find
out that you are NOT the only person who can bring a suit.

> It is easy to sue in America

Finally you get the idea...

> not so easy to collect

Bravo.

> > > > You sure do like flattering yourself!

>
> nope
>
> but you are of course bashing the disabled

Nope.

Serbo-Croation is a difficult language. I tried. Gave up.

And I can't differentiate the characters in Braille adequately to
use it.

No bashing occured.

> > > with your clear lack of human compassion why did you become a nurse?
> >
> > What "clear lack of human compassion"...?!?!
>
> your clear lack

Clear lack of what?

> > You mean not being a soft touch for every self-appreciating,
> > self-victimizing jerk that tries to take advantge of others compassion,
> > Markie?
>
> Nope I mean your mean sprited obcessive bulling

"sprited"

"obcessive"

"bulling"

The only one "bulling" anyone here, Mark, is you trying to bull
everyone else!

> > If I were that, every hospital in every community would be filed
> > to the rafters 24/7 with no hope for ever seeing an empty bed again.
>
> more lies this time about the number of hospital you could affect

It's got nothing to do with me.

It's got to do with Nurses not being a "soft touch" as I stated
above.

And trust me when I say that every ER I ahve worked in, East,
West, North and South has it's share of "frequent flyers"...system
abusers just like you, Markie.

> > > was it another power play?
> >
> > By saying "another" powert play, you're suggesting an ORIGINAL

Sheesh.

Where, Markie. WHERE did I say "I am trying to intimidate you",
Markie?

> > Quote the line where you alledge I say "I am trying to intimidate
> > you", Markie...
>
> no claim of such a an exact was ever made

Oh, but it was!

QUOTE

> > > > I'm not trying to intimidate anyone, Markie.
> > >
> > > liar you admited to it in the post I am responding to

UNQUOTE

So...where's this alleged admission, Markie?

No quote = Markie Lying.

> > > > > > You've rendered more than your fair share of laughs here!

Kelly:

There has been no challenge of data encryption on amateur bands "by
american citizens" that I am aware of...

It is quite obvious that data encryption on the internet is both legal and
in heavy use. How you can allow one medium and prosecute the same
activity on another is insane (the law was constructed for amateur radio
before they knew the internet would be developed, and it impossible to
stop.)

Indeed, I can place a digital voice encryption device on my phone
and a friends and hold private conversations (corporations used to do
this all the time--BEFORE the internet--now they use the internet), I can
also do it on a cell phone (as far as I have been able to determine it is
not a "crime.")

I am NOT a lawyer, but common sense says that "crime" would be hard to
prosecute to get a conviction... also, I'd say there are major
constitutional grounds the gov't would have to defeat to convict. I think
stand alone encryption is NOT a crime... treason, etc is...

Me, I have ignored and encrypted in the past, I continue to do so, but
only if it makes sense. Encryption does nothing to speed transmission, it
only places an increased burden on it. However, a data compaction
algorithm can be choose which naturally encrypts as a secondary effect to
compaction, however, not even close to PGP, etc encryption methods.
Someday there may come a court case to test if this is a "crime" which can
be successfully prosecuted... I feel I have a right to private
conversations, no matter what the medium is the communication takes place
on. But then, I believe in inalienable rights... one day a repressive,
evil gov't may be able to deprive me of those rights... not today...

This is simply a matter for each and every individual to decide for
themselves, they can act as they so choose...

John

>Call Signs.'
>
>Just because the FCC is ostensibly ignoring what the majority (IMHO) of
>U.S. amateur radio operators want for their service, it doesn't mean
>we cant have a more meaningful say in the final outcome.

Bert, the "majority" isn't always what you or your particular
group wants, so it is common practice to equate yourself and
your group to this nebulous "majority."

As of midnight EDT on 8 August 2005, the ratio of unambiguous
FOR-the-code-test-elimination-NPRM to the unambiguous AGAINST-
the-NPRM was 2.23:1.

While I know that you are against the NPRM - I've read every
single one of the 1210 Comments posted to WT Docket 05-235
which includes yours - it should be fairly clear that the
REAL Majority just doesn't want the code test for any class
license test. That's just how it is after the 14th day of
Comments.

>Now is the time to write or e-mail our elected representatives.

That is ALWAYS good advice for any citizen on ANY law
matter or law pending.

Elected officials (as well as just representatives) are often
included in the front pages of telephone "white pages." If
those are unavailable, government officials can be found via
the websites of cities, counties (or townships), and states.
For those officials in the federal government, those can be
found through the U.S. federal government home website and
its links.

Be aware and informed.

Close but not quite the cigar.

>Since BPL would be a MAJOR GAIN to the majority of people communicating
>(using the internet) it would be one MAJOR MISTAKE to allow a handful of
>hams, an insignificant number of the people using communications (and
>then, theirs is only a hobby communication) to control the destiny of BPL
>simply because it interferes with an insignificant number of hobby users.

Tsk, what started out nice became a Trollcast.

BPL is just another way to access the Internet. It has yet to
be proven "anywhere" for the simple reason that electric power
lines were NEVER characterized as HF-VHF signal transmission
lines nor was the electric power distribution gred. The
variability in characteristic impedance and an almost-random
set of discontinuities along any electric power distribution
installation makes it a strong - and unstandardizable - RF
EM wave launching area in many, many, many places along that
electric power grid.

Radio amateurs are NOT the only users of the HF and low-VHF
EM spectrum in the USA. To see who are, go into the NTIA and
NTIS Reports that were released in 2004. With a little searching
you can find the Access BPL Comments on the FCC website.

>It will be nothing short of a crime to allow this insignificant number to
>influence BPL at all. The FCC and any public official(s) found doing so,
>and being so influenced, should be reprimanded harshly!

Not quite. [way too much exaggeration for Trollcast copy]

What the FCC actually did was "allow" A NEW DATA DISTRIBUTION
system to EXIST IN THE FCC REGULATIONS. It's under the
"unintentional radiators" in the OET jargon...but it is ALSO
cognizant of the measured FACT that every "test" installation
of BPL HAS RADIATED RF in HF through low-VHF.

OK, first the FCC *recognized* that BPL exists, legally and
in public. [turns on a spotlight, pretty or not] Second,
the FCC has NOT ALLOWED EXCESS RADIATION BEYOND THE EXISTING
SPECIFICATIONS for unintentional radiators. That is muy
importante...the BPL folks just haven't got as free a hand
as they thought at first. Third, the FCC (and the BPL folks)
have a difficult mutual problem: An HF measurement method
that is ACCEPTIBLE to all parties for "near-field" HF
radiated power levels. That's most important to avoid years
and years of legal wrangling for any particular RFI case.

Actually, the FCC, while POLITICALLY approving Access BPL
as to its existance, has also (courtesy of the OET) STUCK
the BPL providers with a lot of *required* controls and
record-keeping and having to actually shut down part of the
BPL data spectrum if there are enough interference reports.

>How this self-serving bunch of closed-membership hams even hope to stop
>tens of millions (hundreds of millions?) from these benefits, all so they
>can set and enjoy their little hobby, staggers the mind and leads one to
>doubt the sanity of those who would participate in this scam!

John, have you been getting your peyote from Gilroy, CA? :-)

Internet access providers range from POTS (Plain Old Telephone
System) through "high-speed" DSL through TV cable providers'
two-way data paths to "Wi-Fax" low microwave links. BPL is
a newcomer and NOT a dependable one for data transmission
everywhere.

>Amateur policy needs to get rid of its' self-serving element and
>demonstrate they have good judgment and will hold their self-serving
>interests above the interests and benefits of the hundreds of millions of

"John Smith",

Have you ever listened to a K1MAN 2 hour "bulletin"???? His bad mouthing of his fellow hams, the FCC, the ARRL and "opinions" about his so called service to ham radio is nothing but a self aggrandizing pat on his own back.

He would plop down right on top of on going communications, then send out "felony affidavits" to those that told him to get bent. Fully indicating he had indeed been listening before the broadcast began. He should have sent himself one of those cheaply copied useless pieces of paper.

Mr. Baxter basically has made a total laughing stock of himself to any ham that has the ability to reason and think. Obviously Toad can't do either.

That's my opinion and I'm sticking to it.

Len:

The BPL modems I have seen go from the bottom of low audio freqs up to ~300Khz. I don't know where anyone ever got the idea this range was even going to go into the am broadcast band! At some of those freqs, a full wavelength can be measured in miles... and, the "transmission line" becomes a few small wavelengths...

I think they are doing, REALLY, what they say they are doing, they are now simply in the process of TESTING it, what the final results of all this are/"will be" ???

I am just stating amateurs and the interference it MAY pose to their HOBBY is NOT ANY REASON(S) to be given ANY consideration what-so-ever, it is not the majority--the greatest good for the greatest number...

John

And who says it can't?

The Shuttle does (and today proved) that is can and does operate
in the manner designed for...

And unless I missed something, this mission flew some part of
every profile that the Shuttle was envisoned doing.

> > That people have been killed flying it? So what? People die on
> > commecial airliners on a monthly basis. Are airliners a failure?
>
> as normal off target and not related

Sure it's "on target" and absolutely related.

YOU suggested, without explaining why, that the Shuttle was a
failure.

People have died on Shuttle missions. That is a fact. The fact
that people HAVE died on Shuttle missions IS a popular argument for the
program's termination by those who think that "space travel" ought to
be like flying on the Starship Enterprise of TV fame.

> > E V E R Y future manned space mission, near or deep space, will

> > in-and-of iteslf makes the Shuttle Program a success.
>
> wrong again Stevie, your premise that learning from something means the
> something was a sucess

Oh?

It seems to be an adequate-enough justification for every scientist
since the dawn of time. What's your rationale for stating otherwise?

> Yes we have learned a great deal from the Shuttle, which we would
> regrardless of wether it was a sucess or failure, Indeed we Likely will
> learn more from it being a failure than we would have from a success

I bet not.

We've learned more about orbital dynamics and extra vehicular
working than we would have in a million "deep tank" simulations.

> > > > What wasn't promoted nearly so heavily was its planned role as a Cold

>
> the Shuttle can't fufill the mission it was designed for

It can't fulfill what it's already surpassed, Mark?

> the Shuttle has falied utterly in being able to try it designed for
> mission

Oh?

"utterly"...?!?!

I take the word "utterly" to mean a nearly complete failure of all
designed mission parameters.

The Challenger and Columbia disaters notwithstanding, I'd say YOUR
suggestion is unsubstantiated at many, MANY levels.

> The Shuttle is the best real world example of Dumbing down expectations

Sure glad we have you to counter lots of REAL scientists who have
said otherwise, Mark!

> > Of the two catastrophic failures of Shuttle missions, one was due
> > to the boosters carrying it, and the other was due to damage inflicted
> > on the orbiter by its', ahem...booster. We can "implicate" NASA safety

What do you mean that there's no re-engineering planned?

They just got done with 2 years of it...

> > Can you imagine where the "Internet" would be if we were all still
> > using Commodore 64's and TRS-80's...?!?!
> >
> > To call the Shuttle program a "failure" is ludicrous.
>
> it is the plain and simple truth

Nope. What it is is a bit of failed argument on your part.

You need to be reading something other than "Pagan Monthly", Mark.

> > > > Most of all, the amazingly complex technology of the Space Shuttle

>
> Jim said the Chalenger was destroyed by a heat shiled related problem

No he didn't.

You didn't understand what he wrote.

Allow me.

QUOTE:

> > Jim said, quote:
> >
> > > > But it doesn't take a rocket scientist to understand what went wrong in the
> > > > Challenger disaster, nor in the Columbia one.
> >
> > Where is there a "fib" in there, Mark?
>
> taking stuff out of context ...again

Nope.

Mark, that was quoted line-for-line from YOUR post.

Are you now saying that YOU took it out of context?

Becasue there it is....

ONCE MORE FOR MARK'S EDIFICATION:

> > > > Now some may scoff at these words from a non-rocket-scientist. But it
> > > > doesn't take a rocket scientist to understand what went wrong in the
> > > > Challenger disaster, nor in the Columbia one.

END QUOTE.

Now...WHERE did Jim say Challenger's probelm was a heat shield
issue?

(Now patiently awating Mark to acknowledge he mis-read Jim's post
where he DID say that COLUMBIA'S problem was due to exposing the heat
shield to a foreign object strike)

> > And there was no ONE fault in the Challenger tragedy...it was a

>
> experence sure I got it I have folowed the Space program as far back as
> I can remember

I remember it back to BEFORE the first Mercury shots went up. I
got to follow each Mercury, Gemini and Apollo misison, INCLUDING
Apollo-Soyuz. That includes the Skylab missions.

> We started in 60 with the Goal of getting to the moon and we did then

We haven't "settled" for anything yet.

Dan:

I will be holding sales of my "Save K1MAN!" (on the front) and "Glen Baxter is a GOD!" (on the back) T-Shirts on as close a freq to 3.840 as I can find vacant... drop by when I am taking orders, you may wish to purchase one! <grin>

I think everyone just wants to see arrl/W1AW cease and desist, or toe the line... and glen is a good vehicle to bring that debate to a head...

yes you have

you sent the threat out in the gruops more threats in the NG and more
still by email

someone, possibly you called the Cops In illiopolas with some cock and
bull story

you have boasted of finding a picture of my home in those days here
recently

>
> > it is a plain and clear threat

>
> To a delusional paranoid persoanlity, perhaps...

no to any reasonable person, which of course lets you out

you are the delsuional paraniod

any questioning of the PR of the ARS is a personal attack on you that
is paranois and delusional,

it is also a sign of other mental problems

>
> > > > discsion of murder has nothing to do Radio or Morse Code

> >
> > what eveidence?
>
> E X A C T L Y ! ! ! !
>
> N O E V I D E N C E ! ! ! ! ! ! ! !

right you have presented no eveidence that you are not making threats

I have posted various bit of evidence

therefore you are lying when you say"Why do you continue to make and
remake this assertion in the face of evidence to the contrary?",
becuase you have present no evidence to contrary

>
> >>YOU<< have >>NO EVIDENCE<< of ANY threat!

I have your admission of sending the first threat, and then ore besides

what more do I need beyond an admission?

>
> > > > cuting another lies
> > >

> it does now, taht I "hit" what I aim at...In the FULL CONTEXT of the
> statement I amde in response to YOUR comments...

Nothing in the context had anything to do with killing, the threat was
out of the blue. The is never a reason to threaten to kill anyone over
the ARS

Indeed what you intended isn't relavant. The standard is would a
reasonable person think they were being threatened

>
> > it was and remains a threat
>
> Nope.

sure is

>
> Why do you continue to "force" this lie when it's apparent you're
> not telling the truth, Mark?

becuase I am telling the truth

The only reason you don't see it is that you are pretty sick

>
> > > > you are lying in saying otherwise
> > >
> > > You are lying in tryng to make it anything more than it was.
> >
> > nope
>

> response YOUR

unfinished thought here?

My response was to put you off guard with a simple and harmless lie to
deflect you from your threat, based on your nestfew posts it diverted
you for several days, till I returned home and could take other actions

>
> > instead when I did not react as you wish you added various threats of

but Stevie never admts to making mistake so accordoing to Stevie
nothing is Stevie fault

>
> So far you've not presented any "evidence" to the contrary except
> your childish sandlot "ya-HUH!" arguments.

I have your admissions

I guess a confession to all the elements of the crime isn't good enough
for you

>

and thereby threatened him

>
> He thought rules didn't apply to him.

you don't think they apply to you

>
> He found out different.

really?

you were claiming that you had nothing to do with what happened to todd
with his ISp awhile back now you admit it?

>
> > have a reason to make a threat doesn't mean you are not threatening him
> >

> you're allegedly in...two cars..house...investments...allegedly turned
> down a $240K/yr job...

good shape, yes, your point?

>
> Guess that's yet ANOTHER lie we've caught you in.

nope

you really don't read do you.

I have to travel to tennesse at some point to deal with you, spend a
lot of money that you are not worth , to obtain a judgement that you
would not likely be able to pay

I am in good shape because I choose my fights carefully

Unlike you I don't go in full bore without thinking things through

>
> > > It will be quite satisfying to have you served with the countersuit

>
> Nope.
>
> A promise. You file any "charges" or "suit" against me, and your
> ears will whistle for a week with the paper landing in your lap from
> summons servers!

that is certainly a lie my ears would not wistle at all

at one point you were going to make a phone call and have me arrested
like that

You realy don't know much about how the world works

>
> > > > Nothing you do is YOUR responiblity

> >
> > sure are
>
> Nope.

yep

you have admtted to making them, just denieng that they are threats

>
> > not going to retype them and retype em
>
> You can retype the Magna Carta and it won't prove anything.

you even blew that one Stevie it would indeed prove something but of
course Magna Carta has nothing to do with this matter so again you
evade the issue

>
> You'll still have no threats.

I have your admissions

>
> > threats to call a prosecuter for my lying online, threats to come to
> > the UP where I live, threats against Todd, and Len and Brain

>
> What threats?

the one you typed and admitted to typing

>
> > > > > > > > cuting stevie evasion
> > > > > > > >

wrong It is ilegal for you to come to my Land

and would allow me to use deadly force if I choose

>
> Nor would it be illegal for me to speak with local law enforcement
> or mental health case workers about you, being careful to express my
> concerns as just that...concerns.

HMM seem you were threatening me if I contacted Tennesse about my
concerns

those laws do work both ways

>
> > > > > > threatening action with various parties

> >
> > Nope.

sure is

>
> A prosecuter won't touch your "claim" based upon the original
> context and in response to your own words, Markie.

there is no context in which it isn't a threat

>
> > > > I have seen you threaten Todd and BB and you have threatened me
> > > >
> > > > Nope, nope and nope.
> > >
> > > yep yep and yep
> >
> > Nope, nope and nope.

sure have and I have posted and reported

>
> And no matter how many times you wish to carry that one out, it
> still won't be true.

Huh?

It is ture that you have threatened me, both publicaly and in private
email

it is ture that you have harrased me publicaly and privately

You have threatened Todd Her I have seen that.

You ahve harrassed Todd I have seen that myself

You have admitng to conducting what Len discribes as harrassing IMing
of him on AOL

You harrass and Threaten BB in this forum

>
> > > > when 4 people tell you are doing something an inteligent man would

> and answerd the claim.

not at all I questioned it I still do, since you do not ACT like an
inteligent human being

let alone an adult one

you also did not address the point

>
> No evasion.

Not addressing the point is an evasion stevie

>

> No it didn't.

sure did

>
> If anything, the ADA made it EASIER to make your argument viable.

Stvie you have lost it

ADA made the case possible, the treaty made the case harder

what your last stament has to do with the matter I don't know

>
> > > > I also said It could be VERY expensive and more than I cared to venture
> > >
> > > Then obviously not enough dedication.
> >
> > if you like
>
> Nope...If YOU like...Obviously you don't have the heart for it.

If it is what I like well I did not care to spend the money or time at
what I was sure would be won otherwise

indeed it apears that My discussing the possible case, may have
influneced NCI to include the ADA case arguement in there threat to the
FCC one they seem to caved on

So It seems other used the case as another wedge

>
> > > > you don't understand the difference between saying something could be

>
> Based upon WHAT data, Mark?

It's a fact that the Space Shuttle program has not reached *some*
of the goals set for it. OTOH it has reached and exceeded some
of the goals, too.

The Space Shuttle program is neither a complete success nor a total
failure. It's done many great things, but not everything
that was expected.

But that's not the point I was making.
>
> That people have been killed flying it? So what?

No Americans died flying the Mercury, Gemini or Apollo missions. The
Apollo 1 fire that killed astronauts Grissom, Chaffee and White
happened during a ground training/checkout session.

> People die on
> commecial airliners on a monthly basis. Are airliners a

> failure?

There's a big difference.

The chances of dying in a commercial airliner accident are extremely small. The failure rate of commercial airline flights (where "failure" equals "people died") is extremely small. In fact if you drive to the airport, fly around the world on First World commercial airliners (returning to your point of origin), and drive home, the most dangerous part of the trip is the drive to and from the airport, statistically speaking.

I've read reports that the reliability of the Space Shuttle (where "reliability" equals "chances there will be a total loss-of-mission-and-crew accident") was calculated to be between 1 in 75 to 1 in 250. Unfortunately those calculations have been quite accurate.

But that's not the point I ws making.
>

No, that's just one of the successes of the Space Shuttle program.

> on the orbiter by its', ahem...booster. We can "implicate"
> NASA safety deficits as a morbidly contributing factor.

We can also implicate the extreme complexity of the system, too. Also the basic design.

In the Mercury/Gemini/Apollo missions, the main rockets were all below/behind the capsule that had the people inside. Stuff falling off the rockets could not hit the capsule.

The reentry rockets and heatshield were hidden away under the capsule,
and not exposed to damage from outside until it was almost time to use
them. The Shuttle's tiles are out in the breeze the whole time.
>
> > that it has some use is of course true
>
> That is was and continues to be a scientific milestone
> of our age is even more true.

Yet it's less expensive to launch satellites using a one-use rocket
like the Ariane.
>
> That it's obviously in need of re-engineering is true too,
> but then
> what machine made by man was ever cast in one form then NOT
> "re-engineered" for better performance?

We're still driving cars that (mostly) use internal-combustion
gasoline-burning piston engines. The changes in them have been
evolutionary, not revolutionary.

> Can you imagine where the "Internet" would be if we
> were all still
> using Commodore 64's and TRS-80's...?!?!

If you're using a Wintel machine, you are basically using an upgraded
IBM PC AT.

> To call the Shuttle program a "failure" is ludicrous.

>
> Oh?
>
>And you base this opinion upon what credentials or experience?
>
Do not be distracted from the main point, Steve.

Here it is again:

The Mercury/Gemini/Apollo programs used "disposable" rockets and capsules. The Shuttle was a radical departure from that design philosophy, meant to be reusable and economic. But in reality, some of the Shuttle's goals have not been met, and never will be.

Now NASA is looking at the disposable-rocket/capsule idea again for the next generation of people-carrying space flights.

See the point?

73 de Jim, N2EY

# 1105. Re: Docket 05-235 Scorecard

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-10 02:44:35 UTC
From: LenAnderson@ieee.org
Message-ID: <1123641875.027221.92420@g49g2000cwa.googlegroups.com>
Source record: 115557

Today's Scorecard in the NCTA v. PCTA Amateur Championships!

As of midnight EDT on 8 Aug 05, WT Docket 05-235
Comments on Test Element 1 Elimination/Retention are:

Total 1215

Indeterminate/duplicates (note 1) 50

Unambiguously Against NPRM (note 2) 329 28.24%
Unambiguously For NPRM (note 3) 685 58.80%
Code test ONLY for Extras (note 4) 151 12.96%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, one foreign citizen submission.

2. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

3. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
midnight of 8 Aug 05 that Total would be 1165.

A growing number of keep-code-test-for-Extra entries prompted
a review of all entries up to 8 Aug 05 and revision of the
previous postings of Against and Indeterminate numbers.
This was exacerbated by 14 entries made into the various day
listings by the FCC after midnight of the days given. Total
entry numbers are correct to the FCC-given totals up to and
including 8 Aug 05. Having read each and every entry made
so far, new entries made in previous day's listings can be
spotted without fail and tallied groups corrected as need be.

8 August 2005 is the 14th day of submitted Comments. A notice
about FCC 05-143 or Docket WT 05-235 has NOT YET BEEN MADE in
the Federal Register so it is unknown if these 14 days of Comments
will be accepted by the Commission for decision on any Report and

Order. Stay tuned...the future of U.S. amateur radio is being made, like it or not.

>
> Sure it's "on target" and absolutely related.

Not really and it is unrelated

that Men died is bad of course but that men died isn't the reason the
shuttle is a failure, although it was supposed ot bring the men back
alive
>
> YOU suggested, without explaining why, that the Shuttle was a
> failure.

I certainly explained why

It can't reach the orbits it was designed for

that is failure

>

It can't deviler what it promised

BTW Id call the last mission f Chalenger and Colombia failures

>
> > the Shuttle has falied utterly in being able to try it designed for

only come 20,000 out of 23,000 miles short

I call that utterly
>
> I take the word "utterly" to mean a nearly complete failure of all
> designed mission parameters.

well a major mission was satelite repair, geo sat repair, It has never
manged that

it has never manged to reach teh desred orbit of its planers
>

> The Challenger and Columbia disaters notwithstanding, I'd say YOUR
> suggestion is unsubstantiated at many, MANY levels.

No It is on the record from NASA, they defined the mission mid ay
though building the shuttles to a new and lessor mission set

The Shuttle has always failed to met it original mission parameters

>
> > The Shuttle is the best real world example of Dumbing down expectations

not really and nothing on the board to suceed the shuttle in five years

they have tried to cover the failures and cobbled together nature of
the beast

>

Alun, it's through the Search buttons on the Home page. But, you can go direct via:

http://www.fcc.gov/cgb/ecfs

That gets you to the ECFS main page. On the left of that you will see several links which will supply you with the data page where you must fill in the required items...when that is done you have a choice of uploading a prepared file (WordPerfect, MS Word, or PDF) or to make your comment on-line (watch line length, no over-run or it will look funny). I use WordPerfect and convert it to PDF with Acrobat 4 (full version) and upload that.

If you want a copy of FCC 05-143, the document spelling out what the NPRM is, it is the very first document in the docket, entered on 15 July 2005.

You will get a data-begin page with every choice of links from the main ECFS page. To see all of the Docket entries, just enter 05-235 in the upper left corner box and press Return/Enter. That yields a list of EVERY entry under that docket. You can get to an individual day date entry by filling in the numeric date fields in the middle of the data-begin page...or an individual's entry if you know the exact spelling of their name used on their entry.

had fun

> superior.

Yup. Same net effect as adding an amp. Go to 20 or 40 and tune an ssb signal which peaks at S4 on ye olde S-meter. Then spin the knob counterclockwise and find a CW signal which also peaks at S4, crank in the CW filter and ponder the difference in intelligibilities. The 'ole power density thing at work.

> But I am firmly convinced that OOK CW coupled with the processing power
> of "wetware", is the bottom line of getting the message through.

You're there.

> Now the worst conditions won't happen every time of course, but they
> will happen some times.

Huge variable there Mike. The inherent gain of CW is a very big deal in weak signal work. But if if an op's jollies come from being able to kick his feet up on the desk and yak his buddies with his RX RF gain at half mast then S/N ratios, whizzy front end dynamic ranges and path gains are irrelevant. Depends on what the particular op is into.

RF gain knobs . . yessss . . "just in case" lemmee clue you about an HF dxers dirty little secret: The band is hot, big signals everywhere, yer ears are getting pounded and ya can't quite copy the new one in the muck. You have a big rig with DSP and hardware filters out the wazoo and a gazzilion buttons and knobs on the panel. Been there I dunno how

many times. Took awhile for me to finally get the message many years
ago but my best buddy in these situations is the lowly and usually
ignored RF gain pot.

We aren't talking about the in-building carrier-current kind of
thing. This is HIGHER SPEED stuff occupying HF and on up to
about 80 MHz.

>I think they are doing, REALLY, what they say they are doing, they are now
>simply in the process of TESTING it, what the final results of all this
>are/"will be" ???

It's primarily MARKET testing...plus ordinary Field Trials.
Seems to be very difficult to get some real guts-contents kind
of information but it IS broadband, much wider than the best
carrier-current stuff.

There's been several field tests for RFI on the installed Test
(Market) locales. That Testing began 3 years ago or so. It
has gone on longer in Yurp.

You can begin looking into BPL at the ARRL website and continue
on to some very large RFI testing reports by the government and
private metrology companies, checking out the links. FCC ECFS
has lots and lots and lots of Comments on it. Much of that has
been thrashed-out in words and figures in 2003 and 2004.

>I am just stating amateurs and the interference it MAY pose to their HOBBY
>is NOT ANY REASON(S) to be given ANY consideration what-so-ever, it is not
>the majority--the greatest good for the greatest number...

The "majority users" of HF may NOT be just radio amateurs.

Aeronautical Radio Inc., ARINC, contracts to do HF comms with
air carriers on long international routes. Those sites CAN
be interfered with, not a good thing with the "heavies" (747
and the like) carrying lots of passengers.

The U.S. government has about 2500 HF-capable stations in the
contiguous states, AK, and HI, plus PR and other U.S.
territories. Those are periodically netted as a SHARES

exercise. Most of those are equipped with ALE and can jump frequency as needed depending on local QRM.

There's still a couple of low HF freqs for maritime emergency comms. Maritime radio services still use HF especially on deep water; they've gone to single-channel SSB for voice and Teleprinter Over Radio for data in place of electromechanical teleprinter. There's the WWV and WWVH time-frequency standard stations; not everyone uses (or can get) the 60 KHz WWVB signal; still useful for medium-accuracy metrology.

The "low-VHF" band for PLMRS (Private Land Mobile Radio Service) includes freqs in high-HF as well as from 30 to 50 MHz. Lots and lots of those still working in USA.

"SW BC" can kiss some of their audience goombye wherever a BPL is running since it will effectively mask reception of both foreign and domestic stations. There are more SW BC bands than there are ham bands on HF.

The "occupiers" of HF can be found at the NIST site as reports and documents, going back two decades if you like that sort of thing. They and the NTIA work together to try future planning for the EM spectrum; FCC cooperates by using that information for decision-making on specific radio services. FCC OET (Office of Engineering and Technology) concentrates on Mass Media radio services (broadcasting) for BC standards, separation of stations by locale, and useful info on BC antennas.

In Yurp there's similar but their "BPL" (they use another acronym) is older. The first system was a test in Norway. Lots of info on the web for that, just not concentrated neatly as for the USA. Japan has done some trials and was NOT happy with the results.

Ackshully, the electric power transmission people have been using a BPL-predecessor longer for telemetry and control of the power lines they are controlling. Slower-speed stuff which may be what you've seen. Hasn't been a bed of roses for them, either, according to some of the Commentors in the FCC ECFS on Access BPL, a couple of those being P.E.s who were involved in that "pre-BPL" work. Electric power folks have the advantage that few other folk live close to the Kilo- and Mega-Volt electric power transmission lines; them MVe lines be ten kinds of noisy anyway.

Access BPL systems in Market Testing have been using the "medium" (around 4 KV) distribution lines. Those are the ones that connect to transformer primaries (such as on utility poles) so that the secondaries can supply 230/115 Volt drops to individual subscribers. Some kind of couplers

manage to get the KV line data to the drop lines for residential broadband service (two-way) with most systems but at least one uses a WiFax-kind of coupler to get to an individual residence. That sort-of isolates the data line from the KV. WiFax is a low end of microwaves or high UHF.

I would presume that the data rate of these BPL providers is similar to the broadband data supplied through wideband cable such as TV cable service. TV allows HF to 50 MHz for broadband data downstream since it doesn't interfere with present-day TV channel 2; that's a 40+ MHz wide path for fairly-good-rate data. TV itself uses about 1 GHz bandwidth (give or take) for analog TV; larger for digital TV through fiber optic main distribution (analog for the drops).

"Discontinuities" in transmission lines (for RF, data, etc.) are the culprit for high VSWR and thus reflected power which winds up spritzing out into space (around the lines). Discontinuities come from everything...jump to a different characteristic impedance, changes in conductor wires, weird loopy jumpers, pole-mounted circuit breakers. The electric power lines were NEVER characterized as RF or DATA transmission lines...ONLY for 60 Hz AC, never higher in frequency.

In r.r.a.p., there are a number of folks with limited abilities to
convey their thoughts. It is up to the writer to choose words which
will express his ideas. You, for example, express what you think with
only a few difficulties. I just don't happen to agree with much of what
you write. Now, is there something about French hams which you'd like
to add? Is there anything about any of my DX operations that you'd like
to know about?

Fine "John": Toss some encrypted traffic into the ham bands and get to
meet Riley the lawyer who will explain it all to you in excruciating
detail as he slaps you with an NAL and cancels yer ticket. Not that you
have a ham license of course.

Len:

I must admit, I am not aware of any of that, attempts to use HF on power lines, or even VHF... but I have not kept up at all... that doesn't sound wacky, it sounds impossible to me...

However, I would't even attempt to get a 1.750Mhz signal down power wiring, the capacitance between windings, shielding in all those xfrms along the way, underground power lines, ground shielding in between windings, wiring wound around in conduit boxes, etc, etc...

My first degree was in EE. From what I remember, take a damn idiot to expect those freqs to go any distance at all--the capacitive loading is going to start looking like a direct short to ground I would expect! Especially at 80Mhz! And that, even if the modem puts out a 1KW output! There are some remote 60Hz users out there. The inductance of that wiring is going to look staggering to multi-Mhz signals, I would think--no one is going to be able to control the impedance of that feedline. Really, I would have to see it to believe it, will keep my eyes open, now you have me interested.

Now, 300Hz to vlf is great, and there would be tolerable line attenuation due to impedance from line inductance, the resistance of the wire would then become one of largest losses, if not the largest. In special cases, where line length ended up being a resonate or near-resonate length, might even have a signal in need of attenuation at the ISP. I have no idea what-so-ever of how "long wire antennas" of that magnitude behave like... and as a transmission line! Krist, I am worried about how much signal I am getting though 250+ feet of aging coax!

bullshit")

That's the same verse I was referencing, DUMBASS. Learn to read,
kook.
All one has to do is push your buttons and you are so easy.

> That's not hard to understand at all

It must be, since you took the verse that follows out of
context. And no matter haow many times you say it, I'm still not
Roger, Saggytits the NostraDUMBASS! Now go take text out of
context like a good little Nazi, fake Xtian. The chapter is
still discussing what is worn (or not worn) during worship, not
at any other time.

> Also, the original (More lies flushed)

{original text restored, not some made up bullshit Saggytits
likes to do, as he did with his UN "International Radio
license".)

but fails to mention (as usual his sloppy, biased "research" is
like him, flawed) that Chapter 11 deals with the Covering for

the head at worship. They have several verses discussing what should not be worn during worship services, probably referencing those rags they wear on their head in the desert (like they do today). His taking the verse out of context shows how stupid he really is and like all fake xtains, wants to use it for something it was not originally intended. The Hebrews, like other Semitic people, regarded LONG HAIR on HEAD and chin as a distinctive MARK OF MANLINESS. Absalom's beauty was attributed to the luxurious growth of his hair (2 Samuel 14:25, 26). This symbol of pride and beauty was shaven as a token of mourning. Non cutting of the hair was part of the vow of the Nazarites (Judges 16:17)Black hair was especially prized (Cant. 5:11). The long hair of men, especially in New Testament times was gererally exceeded in length only by that of women. So looks like they did indeed have long hair, but not in the case of the Egyptians or the Romans.
(Source: Holy Bible, King James version)
{end restore}

> So it is likely

Prove it, kook boy. It's even more likely that Jesus, his leader had long hair, since he was born in Bethlehem. And following the Hebrew tradition of long hair and beard as a mark of manliness. (Unlike you, which you really should go get the rest of your sex change operation so you can be a true woman)

But you never back up what you say, do you, Saggy?

> projection snipped)
> We, on the other hand, know that it only smells that way.

Projecting again, Saggytits, since you never bathe? How would *you* know how another man's hair smells like? Some sort of freudian slip, or are you like Marky, Brian, bisexual? Sounds like you are jealous since your hairline (guffaw! what hairline?) is almost at the back of your scrawny neck.

>
> (Image restored after Woger had it removed. Not Woger, eh?)

Wrong again, Saggytits. But you do stay consistent in being wrong.

Kelly:

"Freebander mentality?" Hmmm, I have always taken keen interest in the unique, rare, unknown and unconventional. But, I imagine you might just be correct, and maybe I got all those traffic tickets, when I was younger, because of a "freebander mentality" (or, freethinker mentality--might have just been because of the foolishness of youth!) I am just wondering if I will have to consult a shrink or Sylvia Browne if I have to seek professional help on "freebander mentality?"

Unless I am gravely mistaken, there are others running compaction/encryption out there (I don't know what to do with those digital packets, I can't read them, by any algorithms I know!), must have the "radio police" on a constant run. Or, maybe they are going to get the "compacting encrypters" just after they finish rounding up all the illegal cb'ers and freebanders--if so, probably have at least another month before anyone has to worry.

Actually, you may not hear it that often, I suspect mainly because it must be all homebrew equip and helps to know a programming language, and ability to read schematics and run a soldering iron. But, it is there. Of course you can find it on the Ghz's--but it is not all that rare on VHF. Don't believe I have ever heard it on HF... could have a lot to do with ages you find on those freqs too...

Like I say, I think that law looks a bit ridiculous at this day and age... but then, in some areas there is a lot of that going around, ridiculous chit.

> : his sloppy, biased "research" is like him, flawed) that
Chapter
>
> Here's a fuller quo (more like "here's more Saggytits Lee
bullshit")

That's the same verse I was referencing, DUMBASS. Learn to read,
kook.
All one has to do is push your buttons and you are so easy.

> That's not hard to understand at all

It must be, since you took the verse that follows out of
context. And no matter haow many times you say it, I'm still not
Roger, Saggytits the NostraDUMBASS! Now go take text out of
context like a good little Nazi, fake Xtian. The chapter is
still discussing what is worn (or not worn) during worship, not
at any other time.

> Also, the original (More lies flushed)

{original text restored, not some made up bullshit Saggytits
likes to do, as he did with his UN "International Radio
license".)

but fails to mention (as usual his sloppy, biased "research" is
like him, flawed) that Chapter 11 deals with the Covering for
the head at worship. They have several verses discussing what
should not be worn during worship services, probably referencing
those rags they wear on their head in the desert (like they do
today). His taking the verse out of context shows how stupid he
really is and like all fake xtains, wants to use it for

something it was not originally intended. The Hebrews, like other Semitic people, regarded LONG HAIR on HEAD and chin as a distinctive MARK OF MANLINESS. Absalom's beauty was attributed to the luxurious growth of his hair (2 Samuel 14:25, 26). This symbol of pride and beauty was shaven as a token of mourning. Non cutting of the hair was part of the vow of the Nazarites (Judges 16:17)Black hair was especially prized (Cant. 5:11). The long hair of men, especially in New Testament times was gererally exceeded in length only by that of women. So looks like they did indeed have long hair, but not in the case of the Egyptians or the Romans.
(Source: Holy Bible, King James version)
{end restore}

> So it is likely

Prove it, kook boy. It's even more likely that Jesus, his leader had long hair, since he was born in Bethlehem. And following the Hebrew tradition of long hair and beard as a mark of manliness. (Unlike you, which you really should go get the rest of your sex change operation so you can be a true woman)

But you never back up what you say, do you, Saggy?

> projection snipped)
> We, on the other hand, know that it only smells that way.

Projecting again, Saggytits, since you never bathe? How would *you* know how another man's hair smells like? Some sort of freudian slip, or are you like Marky, Brian, bisexual? Sounds like you are jealous since your hairline (guffaw! what hairline?) is almost at the back of your scrawny neck.

>
> (Image restored after Woger had it removed. Not Woger, eh?)

Wrong again, Saggytits. But you do stay consistent in being wrong.

Original link (now dead, thanks to Woger's fear) restored to this
followup:

> http://img357.imageshack.us/img357/7599/ab8mq08033of.jpg

But, of course, we want to see not-Woger and his Yaesu wall chart, so
the image of not-Woger has once again been restored to the net and can
be found (until Woger has it removed again) at

http://img358.imageshack.us/img358/3138/ab8mq08033am.jpg

The fact that the image disappears only after it is mentioned here is
highly significant.

The image is also hosted elsewhere where it can't be removed, but the
Image Shack location is more fun to quote. Check with
images.google.com for the other locations.

And remember that the qoute of the week is: "If a man have long hair
it is a shame unto him." -- Paul, I Cor. 11:14

I have now entered my comment in favour of the NPRM. Of the last 50 comments, 24 are in favour, 17 against, and 9 want to keep a code test for the Extra only. I suppose that does mean that a slim majority (of the last 50) want to keep a code test for the Extra but not the General, but 48% want the code test eliminated. Unfortunately I don't have time to read all 1,319 comments!

I didn't answer for Dave.

I asked YOU seperate questions...None of which, I see, that you
answered.

> So at the time, David Heil was supposed to be a knowledgeable DXer in a

> band.<<<

Here's MY questions for you again, all of which will, if you ahve
the guts to answer them honestly, will answer YOUR questions:

QUOTE

An ever better yet question (and one that's already been addressed
to but unanswered BY Brain...) is where was Dave ever responsible for
knowing what the allowed band limits by ANY foreign Amateur were?

Can YOU swear, with ABSOLUTE certainty, that EVERY foreign Amateur

you ever "worked" was operating within his/her allowed scope of licensure?

For that matter can you swear, with ABSOLUTE certainty, that EVERY

domestic station you've ever "worked" was operating within the scope of

his/her license?

Can YOU show where in Part 97 it requires an FCC licensee to be knowledgable of OTHER administrations licensing criteria...?!?!

> Perhaps he will stop demeaning fellow amateurs when he realizes that
> even a World Renowned DXer goofs on occassion. What do you think?

He doesn't "demean" anyone.

YOU have MADE A POINT of trying to pass of as legitimate your Somalia "operation"...It was nothing of the sort. And that you keep getting your nose rubbed in yourfoolheartiness is do SOLELY to YOUR insistence on this mistruth about Somalia.

You try to "diss" Dave because he IS a "World Renowned DXer", and has far better insight to those matters than either you or I.

Now...How about those questions? Gonna ante up, or is this yet one MORE example of how Brian P Burke just makes crap up and expects people to take it as fact when indeed facts to the CONTRARY are evident?

Steve, K4YZ

Perhaps YOU shou;d be the one not doing the jumping, Markie.

Brain is trying to "diss" Dave Heil for allegedly doing something
"wrong" when he indeed didn't.

Brain has zero facts here, and zero justification in any article
of radio regulation to back him up...He's running his mouth off on this
issue for the sole purpose of hiding his own failings as a "DXer".

> nah will not happen stevie don't need to follow rules at least not in
> stevies mind

Hey Markie...I got something here that neither you or Brain
have...

The facts.

Steve, K4YZ

Poor amateur practice.

> Brain has zero facts here, and zero justification in any article
> of radio regulation to back him up...He's running his mouth off on this
> issue for the sole purpose of hiding his own failings as a "DXer".

Riley says that poor amateur practice is enforceable. Luckily, David
Heil was out of the country where Riley's opinions don't apply. David
was operating in a "lesser" developed country where infractions are
unlikely to be dealt with.

Absolutely ontarget and absolutely related.

There has hardly been a news item on the Internet in the last 6
months mentioning the Shuttle that didn't mention the COlumbia and
Challenger disasters.

I'll take those as more-than-adequate evidence that the comments
were germane.

> that Men died is bad of course but that men died isn't the reason the
> shuttle is a failure, although it was supposed ot bring the men back
> alive

I am sure you meant men AND women.

The Shuttle wasn't the problem. BOTH disasters were directly
related to the boosters or external fuel tank.

> > YOU suggested, without explaining why, that the Shuttle was a
> > failure.
>
> I certainly explained why
>
> It can't reach the orbits it was designed for
>
> that is failure

The Shuttle's flown 113 missions as of yesterday.

This is HARDLY failure.

> > People have died on Shuttle missions. That is a fact. The fact
> > that people HAVE died on Shuttle missions IS a popular argument for the
> > program's termination by those who think that "space travel" ought to
> > be like flying on the Starship Enterprise of TV fame.
>
> so what?
>
> again off target and ilrelavant

What's "ilrelavant"...?!?!

Of course it's RELEVANT, Markie. TV fantasy shapes people's
ideations of what REAL life should be.

For one example...You'd not beleive the number of people (some of
them very educated persons) who come to my ER thinking they are going
to be in-and-out in an hour. Why? Becasue that's the length of time
an episode of "E.R." takes to kix things...

> > > > E V E R Y future manned space mission, near or deep space, will

> > since the dawn of time. What's your rationale for stating otherwise?
>
> failure to meet it goals

"A" goal out of dozens...?!?!

BBWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHYAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA ! ! ! ! !
!

You have some very unique perspective out of what determines
"failure", Markie...

Of course you've made a life-long habit out of manufacturing
failure in order to have excuses for non-success, haven't you?

> that we have learned something from thsi failure is a good thing but it
> is still a failure
>
> and you realy don't undersatnd science stavie you just don't

"And"

"really"

"understand"

"Stevie"

Sure I understand it.

And I understand you.

You think you've found ONE issue that you can dig into and hold on
to, yet it's fleeting already. That the Shuttle program has had
"failures" is evident, but the Shuttle program overall is NOT a
failure.

> > > Yes we have learned a great deal from the Shuttle, which we would
> > > regrardless of wether it was a sucess or failure, Indeed we Likely will
> > > learn more from it being a failure than we would have from a success
> >
> > I bet not.
>
> you still owe me 500$ from your last bet

"$500"

Nope. Not even close, Markie. You actually have to have some
"proof" in order to get that...

You're a looooooooooooooooooooooooong way away from that.

> > We've learned more about orbital dynamics and extra vehicular
> > working than we would have in a million "deep tank" simulations.
>
> which has nothing to do with anything under discusion

?!?!?!?!?!?!?!?!?!?!?

Sure it is!

YOU claim the Shuttle is a failure based upon having never gone to
geostationary orbit.

I say you're bonkers because the Shuttle has MORE than fulfilled
it's rolls in supporting scientific missions, satellite repair, and
supporting both the MIR and ISS programs.

> > > > > > What wasn't promoted nearly so heavily was its planned role as a Cold

> > > > > > preforming the missions promised
> > > > >
> > > > > The "shuttle" has never failed in performing it's mission.
> > > >
> > > the Shuttle can't fufill the mission it was designed for
> > >
> > It can't fulfill what it's already surpassed, Mark?
> >
> It can't deviler what it promised

Sure it has "deviler(ed)"...And more...

> BTW Id call the last mission f Chalenger and Colombia failures

I didn't say there weren't failure IN the program.

I said the Shuttle PROGRAM is not a failure.

And as I have CORRECTLY pointed out before, the catastrophies were
both due to problems with the external fuel tank/boosters.

> > > the Shuttle has falied utterly in being able to try it designed for
> > > mission
> > >
> > Oh?
> >
> yep

You're making assertions that reknowned scientists say otherwise,
Markie.

> > "utterly"...?!?!
> >
> only come 20,000 out of 23,000 miles short
> >
> I call that utterly

I call your assertion utterly rediculous.

> > I take the word "utterly" to mean a nearly complete failure of all
> > designed mission parameters.
> >

> well a major mission was satelite repair, geo sat repair, It has never
> manged that

Uh...Hubble's not geostationary, but YOU call that a failue?

And what fo the multiple launches FROM Shuttls and satellites
recovered from and returned to orbit by the shuttle?

> it has never manged to reach teh desred orbit of its planers

Still focusing on ONE parameter, Markie...Still misses your mark
of "utter"

> > The Challenger and Columbia disaters notwithstanding, I'd say YOUR
> > suggestion is unsubstantiated at many, MANY levels.
>
> No It is on the record from NASA, they defined the mission mid ay
> though building the shuttles to a new and lessor mission set

Soooooooooooo! Even before it flew the mission had ALREADY been
re-taasked, so BY YOUR OWN ADMISSION the Shuttle's flying now were NOT
designed for geostationary flight.

> The Shuttle has always failed to met it original mission parameters

Nope.

It's met and exceeded almost evry one.

A looooooooooooooooong way from YOUR assertion of "utter" failure.

> > > The Shuttle is the best real world example of Dumbing down expectations
> >
> > Sure glad we have you to counter lots of REAL scientists who have
> > said otherwise, Mark!
>
> not really
>
> and it is the engineers that say so

Which engineers?

Names? URL's to discussions on the issue please?

> > > > Of the two catastrophic failures of Shuttle missions, one was due

> they have tried to cover the failures and cobbled together nature of
> the beast

What's getting "cobbled together" here is your story. You're
trying to design it as you're laying bricks...

> > > > Can you imagine where the "Internet" would be if we were all still

> >
> > No he didn't.
> >
> >
> cutinng more of stevie out of context rating

Putting what I said back in so Markie can face his foolishness one
more time:

ONCE MORE (AGAIN) FOR MARK'S EDIFICATION:

> > > > Now some may scoff at these words from a non-rocket-scientist. But it
> > > > doesn't take a rocket scientist to understand what went wrong in the
> > > > Challenger disaster, nor in the Columbia one.

END QUOTE.

Now...WHERE did Jim say Challenger's probelm was a heat shield
issue?

(Now patiently awating Mark to acknowledge he mis-read Jim's post
where he DID say that COLUMBIA'S problem was due to exposing the heat
shield to a foreign object strike)

END QUOTE

So, Mark...

You going to answer this, or can I just go ahead and start
appending it to every post of yours where YOU accuse others of
"evasion"...?!?!?

> > > > And there was no ONE fault in the Challenger tragedy...it was a

Where?

These questions will help YOU understand why Dave was not at fault
or even in violation of ANY regulation (assuming your wifey let's you
have enough testosterone to be a man long enough to answer them...)

QUOTE:

An ever better yet question (and one that's already been addressed
to but unanswered BY Brain...) is where was Dave ever responsible for
knowing what the allowed band limits by ANY foreign Amateur were?

Can YOU swear, with ABSOLUTE certainty, that EVERY foreign Amateur

you ever "worked" was operating within his/her allowed scope of
licensure?

For that matter can you swear, with ABSOLUTE certainty, that EVERY

domestic station you've ever "worked" was operating within the scope of

his/her license?

Can YOU show where in Part 97 it requires an FCC licensee to be
knowledgable of OTHER administrations licensing criteria...?!?!

UNQUOTE

Hans hasn't been paying attention.

> He's an idiot.

Oh, gee, Brain, after all we've meant to each other, you want to
go and be "that way"...

Of course pathological liars such as yourself have a need to hide
behind others...And you DO have a lot to hide...

As for the comments...It's not as if there hasn't been a seven
year plus history of this NG IRT the Code test, Hans...One might draw
the conclusion that this group had a predetermined interest in the
subject and had make decisions on what to say.

One might, or then again, one might not.

Since the Docket responds to 18 different petitions and runs to 30 pages in length with over 200 footnote references, one might take the time to thoughtfully review the FCC discussion in an unhurried (but timely) fashion.

Having done that, my comments have been submitted to FCC.

Poor Saggytits, almost as fucking stupid as Lardass Davies.
Still no proof that it is indeed Roger Wiseman, you incredibly
stupid dumbass.

Just because you and idiots like you say it is, doesn't make it
so.

> A small version

Let's leave discussions about your small genitalias out of this,
eh, Saggytits?

And the excuse that he had long hair at the time of the photo
was taken is still unsubstantiated.
Looks like you lose as usual.....

Chapter
>
> Here's a fuller quo (more like "here's more Saggytits Lee
bullshit")

That's the same verse I was referencing, DUMBASS. Learn to read,
kook.
All one has to do is push your buttons and you are so easy.

> That's not hard to understand at all

It must be, since you took the verse that follows out of
context. And no matter haow many times you say it, I'm still not
Roger, Saggytits the NostraDUMBASS! Now go take text out of
context like a good little Nazi, fake Xtian. The chapter is
still discussing what is worn (or not worn) during worship, not
at any other time.

> Also, the original (More lies flushed)

{original text restored, not some made up bullshit Saggytits
likes to do, as he did with his UN "International Radio
license".)

but fails to mention (as usual his sloppy, biased "research" is
like him, flawed) that Chapter 11 deals with the Covering for

the head at worship. They have several verses discussing what should not be worn during worship services, probably referencing those rags they wear on their head in the desert (like they do today). His taking the verse out of context shows how stupid he really is and like all fake xtains, wants to use it for something it was not originally intended. The Hebrews, like other Semitic people, regarded LONG HAIR on HEAD and chin as a distinctive MARK OF MANLINESS. Absalom's beauty was attributed to the luxurious growth of his hair (2 Samuel 14:25, 26). This symbol of pride and beauty was shaven as a token of mourning. Non cutting of the hair was part of the vow of the Nazarites (Judges 16:17)Black hair was especially prized (Cant. 5:11). The long hair of men, especially in New Testament times was gererally exceeded in length only by that of women. So looks like they did indeed have long hair, but not in the case of the Egyptians or the Romans.
(Source: Holy Bible, King James version)
{end restore}

> So it is likely

Prove it, kook boy. It's even more likely that Jesus, his leader had long hair, since he was born in Bethlehem. And following the Hebrew tradition of long hair and beard as a mark of manliness. (Unlike you, which you really should go get the rest of your sex change operation so you can be a true woman)

But you never back up what you say, do you, Saggy?

> projection snipped)
> We, on the other hand, know that it only smells that way.

Projecting again, Saggytits, since you never bathe? How would *you* know how another man's hair smells like? Some sort of freudian slip, or are you like Marky, Brian, bisexual? Sounds like you are jealous since your hairline (guffaw! what hairline?) is almost at the back of your scrawny neck.

>
> (Image restored after Woger had it removed. Not Woger, eh?)

Wrong again, Saggytits. But you do stay consistent in being wrong.

> the Shuttle?

In the 70/s when the project was funded

BTW you are changing your story in the middle of post now

a few lines ago you were dening that the shuttle could not get to GEO
orbit now you are impling it was never suposed to

>
> > > And unless I missed something, this mission flew some part of

>
> Absolutely ontarget and absolutely related.

nope nothing about the loss of life is related to why the shuttle is a
failure

>
> There has hardly been a news item on the Internet in the last 6

No I meant men in one of the senses in which english uses the word

>
> The Shuttle wasn't the problem. BOTH disasters were directly
> related to the boosters or external fuel tank.

well you see how far the shuttle gets without either of them

but then in calling the shuttle a failure I am not referring to loss of
either shuttle, although these event don't exactly imporve the shuttles
scorecard of sucess verus failure

>
> > > YOU suggested, without explaining why, that the Shuttle was a

>
> The Shuttle's flown 113 missions as of yesterday.

so?

>
> This is HARDLY failure.

sure is

None of them to the orbits promised.

No shuttle has been turned around in the time promised

No GEO sat captured and repaired

No more polar launchs at all

No Cheap launchs

The shuttle does NOT do what it is supposed to

Does not mean it is Useless, merely unsucessfull at it
designed/promised mission

I am gald that we have found mission for the multibillion dollar
shuttle, ifwe had not it would be a failure at it original mission, but
an absolute disaster

>

and failing to prefroms it designed mission

which has nothing to do with simulations

>
> I say you're bonkers because the Shuttle has MORE than fulfilled
> it's rolls in supporting scientific missions, satellite repair, and
> supporting both the MIR and ISS programs.

nope it has not repaired a single satelite of the the type promised,
(only the hubble in leo orbit

It has not provided chaep access to space

It has manged to find usefull propose in lessor roles

>

>
> Sure it has "deviler(ed)"...And more...

"What wasn't promoted nearly so heavily was its planned role as a Cold
War DoD resource, for doing things like snatching Soviet satellites
from polar orbit, and setting up SDI platforms. Nor the predicted
failure rate of about 1 in 100."

form the original post Jim words

the Shuttle doesand can't do these things

>
> > BTW Id call the last mission f Chalenger and Colombia failures
>
> I didn't say there weren't failure IN the program.

you said all mission acheieved thier goals or in your exact words "The
"shuttle" has never failed in performing it's mission."

>
> I said the Shuttle PROGRAM is not a failure.

not according to you

>
> And as I have CORRECTLY pointed out before, the catastrophies were
> both due to problems with the external fuel tank/boosters.

which are part and parcel of the shuttle program

>

> > manged that
>
> Uh...Hubble's not geostationary, but YOU call that a failue?

I call Hubble a cluster fuck, and I am amazed that any science has
surrvivied the stupidity involed in Hubble, but the Shuttle was the
subject not Hubble and the less said about a couple of recent Mars
missions the better

>
> And what fo the multiple launches FROM Shuttls and satellites

nope

you asserted that the Shuttle is cappble of Geo Orbit flight ay one
point in this thread then chnaged your story, proving you know very
little of the history of the program

>
> > > > We started in 60 with the Goal of getting to the moon and we did then

> > > >
> > > We haven't "settled" for anything yet.
> > >
> > we sure did
> >
> Nope.

sure did

the shuttle can only reach LEO we settled for that

Private hobbiests (abet really well off ones) can do reuseableflight
vechiles beter than NASA and its billions

Our space program is in sad shape, i really wish it wasn't, but them is
the facts

I'm using one of those lines here. A few years ago it was originally a
DSL line Ma Bell set up as a second line for Eric. Then he bailed away
from his DSL service and moved to Comcast thus I inherited Ma Bell's
former DSL line for my dialup connection. As dailup connections go the
thing screams. His cable TV connection is only 2-3 times faster than my
dialup connection but no more than that. He's paying something like
$50/month for his cable connection and I'm only paying $15/month. AND
my dialup connection is more reliable.

Gotta love it. And they're *everywhere*.

Hot air is free. Brains, innovation and bench time are not free. End
of.

Like all the bafflegab and excitement about DSP, SDR's, etc. Poke
around under the hood of any of the modern top-end ham xcvrs and you'll
find that their hot performance is directly dependent on their cascaded
xtal filters. Jumper the filters and put it all on their "firmware".
HA! As if. Xtal filters being at least seventy-year-old technology and
all that.

Eeeek! Yo, An HF RX with 0.05 µV sensitivity?! Not many of those
around!

I've done that and gotten some weird results. I get non-weird results
by A-B testing between the antenna and a dummy load instead. Impedance
matching issue.

> does the rest."
>
> your words
>
> and they are a confession to harrasment
No, they are not.

They are proof that it's far more effective to rub an idiots nose
in his own foolishness than it is to commit an act of violence against
him.

You're an idiot and you keep acting like a fool.

That I respond in such a way as to show you both is NOT
"harrassment".

If you don't like what you see, Markie, correct your idiotic and
foolish behaviour.

> > > > > > And you continue to avoid answering my question..."What makes you
> > > > > > think that I'd hazard my freedom for a putz like you...?!?!"

Your "cuting" is nothing more than self preservation, Markie.

QUOTE:
> cuting stevie rants

More "cuting".

But here it is re-installed:

> Where are YOUR credentials to determine the stabilty of anyone
> else's mental health, Mark?

> The fact that YOU are a mental health patient?

That wasn't a rant.

That was a question.

Why were you so embarrassed to address it?

> > > me the htreat s are violence, (one shot one kill..) outing Your
> > > demands I comply or youd tell everyone I was gay, your conitued
> > > harrasment unless I do as YOU say

> > What threats?

> you threats
> One Shot one kill...

Wasn't a threat seven years ago.

It's not a threat today, no matter how many times you repeat it out

of context.

> your threats to contact UP officals and (do something)

Why does it concern you that you might be brought to the attention

of mental health case workers or law enforcement if you're "OK",
Markie?

> It does not realy concern me other than it could prove anoying

I am sure that it would be. Most deviants and liars find having to
face thier problems head-long to be "annoying".

> but that of course has nothing to do with wether it is a threat on your
> part

It's not a threat.

> > > your threat to expose me as Gay in the newsgrup those many years ago

> you sent the threat out in the gruops more threats in the NG and more
> still by email

And you're still lying.

Why do you lie in public when it's already known that you're an
admtted liar, Markie?

How do you think all those admissions of lying are going to go
over in court...!?!

> someone, possibly you called the Cops In illiopolas with some cock and
> bull story

If it was a cock and bull story, it wasn't about you.

> you have boasted of finding a picture of my home in those days here
> recently

YOU posted it, Markie. It was on your GeoCities site, along with
your picture...

> > > it is a plain and clear threat
> >
> > To a delusional paranoid personality, perhaps...
>
> no to any reasonable person, which of course lets you out

Let's me in, Markie, and YOU out.

> > > > That's your rampant paranoia.

> > > one shot one kill is a threat
> >
> > To a delusional paranoid persoanlity, perhaps...
>
> no to any reasonable person, which of course lets you out
>
> you are the delsuional paraniod

Nope.

I'm not the one who thinks that someone is stalking him, trying to
kill him over flaming in a newsgroup, and who thinks sexual and
societal devaiance is OK.

> any questioning of the PR of the ARS is a personal attack on you that
> is paranois and delusional

No...LYING about Amateur Radio is an attack on licensed Amateurs.

> it is also a sign of other mental problems

Here we go with Dr Markie's diagnosis again...

> > > after all Morse code is not a person, only people can be murdered
> >
> > Then why are you accusing me of trying to murder you?
>
> not even accusing you of that, but of threatening too can't you keep
> anything straight?

Sure I can.

You've allegeded I threatened to kill (murder) you.

And yes, you've accused me of it.

> > > > > > > Threating to speak to Todds folks is a threat
> > > > > >
> > > > > > Nope.
> > > > >
> > > > > sure is
> > > >
> > > > How?

> the ARS

You continue this unhealthy rant about threats, Mark.

No threat was made.

> Indeed what you intended isn't relavant.

Sure it is. Ask a lawyer.

> The standard is would a
> reasonable person think they were being threatened

And as you said..."that leaves you out"....

> > > it was and remains a threat
> >
> > Nope.
>
> sure is

More evidence of self-delusional acts, Markie...

> > Why do you continue to "force" this lie when it's apparent you're
> > not telling the truth, Mark?
>
> becuase I am telling the truth

No, you're not.

> The only reason you don't see it is that you are pretty sick

No, actually I am in very good health.

> > > > > you are lying in saying otherwise
> > > > >

> > > > You are lying in tryng to make it anything more than it was.
> > > >
> > > nope

> > response YOUR
>
> unfinished thought here?

Nope. Computer hiccup. Oh well.

But here it is in it's entirety:

"As for "illchoosen", perhaps YOU should have thought about the
response YOUR words might elicit".

> My response was to put you off guard with a simple and harmless lie to
> deflect you from your threat, based on your nestfew posts it diverted
> you for several days, till I returned home and could take other actions

Again with this story about "putting me off" and "other actions".

Fiction, Markie...Nothing but fiction...

> > > instead when I did not react as you wish you added various threats of

But you're not that.

> > > nothing is Stevies fault
> >
> > It's only "Stevies fault" when Stevie does it wrong.
>
> but Stevie never admts to making mistake so accordoing to Stevie
> nothing is Stevie fault

You keep saying that but it's not true.

I keep suggesting you ask around but you refuse to do it.

> > So far you've not presented any "evidence" to the contrary except
> > your childish sandlot "ya-HUH!" arguments.
>
> I have your admissions
>
> I guess a confession to all the elements of the crime isn't good enough
> for you

No admissions.

No confessions.

No crime...at least one commited by me.

> > > apeartnly it seems an idle one
> >
> > To a delusional paranoid personality, perhaps...
>
> to any reasonable person

Then that leaves you out.

> > > > Toddie violated the terms of his TOS. He refused to stop. He got

> > threatening behaviour towards me.
>
> and thereby threatened him

Nope.

> > He thought rules didn't apply to him.
>
> you don't think they apply to you

Sure they do.

You just haven't proven where I've "violated" some "rules".

> > He found out different.
>
> really?

Yep.

> you were claiming that you had nothing to do with what happened to todd
> with his ISp awhile back now you admit it?

What happened to Todd was a direct result of Todd's violation of
his TOS with Consolidated Communications. Todd had it in his control
to NOT violate them.

> > > have a reason to make a threat doesn't mean you are not threatening him
> > >
> > > you realy don't know english do you
> >
> cuting speling cop ####

Let me put it back for you:

QUOTE:

> you realy don't know english do you

I know it better than you. I employ it more accurately, too.

I know that English is capitalized.

I know that "realy" is actually spelled "really", but you keep
screwing that up too.

I know that a sentence is started with a capital letter and ended
with a period, except where a question is asked. You seem to have a
problem with that.

UNQUOTE

See...it's still as true today aas it was yesterday.

> > > > > you are a bully and so juvi you can't even take responiblity for YOUR
> > > > > actions
> > > >
> > > > Sure I do.

> > > yep as expected and predicted
> >

> > I am sure there was a point there.
>
> indeed and you made it for me thank you

What point?

That Toiddie was responsible for his own actions...?!?! Then
you'd be correct.

> > Care to make it?
>
> I can't you did the job for me

What point?

> > > > If YOU think that I have made all of these threats against you and
> > > > am the "stalker" you accuse me of, please, file a civil or criminal

> good shape, yes, your point?

The point is you're lying about THIS, too...

You claim you can't afford to come to Tennessee.

> > Guess that's yet ANOTHER lie we've caught you in.
>
> nope

Yep.

> you really don't read do you.

Congratualtions on getting "really" right for a change. Now if we
can work on the capitalization and proper punctuation, you'll be well
on your way...

> I have to travel to tennesse at some point to deal with you, spend a
> lot of money that you are not worth , to obtain a judgement that you
> would not likely be able to pay
>
> I am in good shape because I choose my fights carefully

You're in good shape because the countersuit would leave you with
the clothes on your back, a pup-tent and a bicycle to get around on.

> Unlike you I don't go in full bore without thinking things through

Sure you do.

You're making ludicrous charges in a public forum EVERY day.

You've admitted to being a prolific liar and that's been archived.

Seems pretty "full bore" to me...

> > > > It will be quite satisfying to have you served with the countersuit

> > ignoring these posts...so ask them directly.
>
> not most everyone other coment on them,
>
> Again your claim you make it

Nope.

YOU claimed I never apologize or admit mistakes.

I've given you references to verify.

You refuse to do it.

> lazy bum

Coward.

> > > > There are NO threats.
> > >
> > > sure are
> >
> > Nope.
>
> yep
>
> you have admtted to making them, just denieng that they are threats

I can't "admit to making them" and then deny them, Markie.

I've stated all along, and correctly so, that I never made a
threat.

> > > not going to retype them and retype em
> >

> you even blew that one Stevie it would indeed prove something but of
> course Magna Carta has nothing to do with this matter so again you
> evade the issue

Nope.

> > You'll still have no threats.
>
> I have your admissions

I didn't admit to any wrongdoing, Markie.

You have nothing.

> > > threats to call a prosecuter for my lying online, threats to come to
> > > the UP where I live, threats against Todd, and Len and Brain
> >

> > What threats?
>
> the one you typed and admitted to typing

I never typed a threat.

Why do you keep lying about this? (And then snipping my questions
about WHY you lie about it...?!?!)

> > > > > > > > > cuting stevie evasion
> > > > > > > > >
> > > > > > > > > What evasion?
> > > > > > > >
> > > > > > > > your evasion
> > > > > > >
> > > > > > > WHAT evasion...?!?!
> > > > > >
> > > > > your eveasion
> > > > >
> > > > What "eveasion"...?!?!
> > >
> > yours
> >
> > WHAT EVASION...?!?!?
>
> yours

Still no evasion, Markie...

Just your tit-for-tat accusations that are patently false.

> > > > > I have typed it often typed a few examples in this post and will not
> > > > > repeat just becuase Stevie the BULLY demands I do so
> > > > >
> > > > You've retyped nothing except "your threats" and "your evasion",
> > > > Markie.
> > >
> > lying agian
> >
> > I am not lying and I am not an agian.
>
> You are lying, and I never said you are an "again"

Re-read the sentence above, IdiotBoy.

> so 2 lies one sentence

Nope...but we have YOU looking stupid over one of YOUR typos
again!

> > > > You've not SUBSTANTIATED either...
> > >
> > > you have admited to typing "One shot on kill" that does it right there,

> > > the rest just piles on
> >
> > That wasn't a threat.
>
> sure was

Why does Mark Morgan continue to lie?

> > Wasn't then...isn't now...won't be 100 years from now...
>
> will always be a threat

Only to a paranoid delusional mind, Markie...

> > > > I love being called "stupid" in a sentence that is so fractured
> > > > that it takes several re-readings to figure out that I was "insulted".
> > >
> > > then where is your thank you
> >
> > You flushed it after your last bowel movement, Markie.
>
> more ##### form you stevie

capitalize

"from"

No punctuation.

Looks like the #### was coming from you.

> > > your make threats
> >
> > What threats?
>
> yours
>
> admitted to and documented more than once

I've not admitted to ANY threats. Not a one.

> > > by the way It is infact ilegal for you to came HERE since you have been
> > > informed your are unwelcome
> >
> > It would be illegal for me to knock on your front door or violate
> > your privacy.
>
> it is ilegal for you to enter my land

That's what I said, IdiotBoy.

Now where's YOUR basis for stating that it would be illegal for me
to travel to Michigan...the UP or otherwise...?!?!

> > It would NOT be illegal for me to come to Michigan...ANYwhere in
> > Michigan.
>
> wrong It is ilegal for you to come to my Land

As I said above...

> and would allow me to use deadly force if I choose

Now THERE'S a THREAT ! ! ! ! ! !

Better read the law on what constitutes the VALID use of deadly
force, Markie.

Hint: Cutting across your front yard isn't it....

> > Nor would it be illegal for me to speak with local law enforcement
> > or mental health case workers about you, being careful to express my
> > concerns as just that...concerns.
>
> HMM seem you were threatening me if I contacted Tennesse about my
> concerns

Nope.

I just said if YOU file a suit, be prepared for the result.

> those laws do work both ways

As I have been telling YOU, IdiotBoy.

> > > > > > > threatening action with various parties
> > > > > >
> > > > > > What threats?

> > >
> > > I am sure you hear a LOT of voices doing that, Markie...
> >
> Only during a good opening to tennesse
>
> is it so hard to admit there are other hams that don't like you?

I am sure there are.

But unless YOU get on the air and say something, I doubt you'll
hear them...

> > All part of your delusional mindset, Markie.
>
> nope it is part of yours I fear

You have good reason to fear, Markie.

You're sick and need help.

> > No...you've CLAIMED that you have tried...
>
> that too of course
>
> but I have your repeated confessions that is about all I really need

You keep claiming THAT too, but you have no confession from me on
ANYthing.

> > All you do is make sandlot taunts.
> >
> > None of them effective or accurate.
>
> confessions are quite effective

They would be if you had one.

> > > > > > > > "First Amendment", Markie...
> > > > > > > >

> > > > > > > you don't have any right to threaten people
> > > > > > >
> > > > > > > I haven't threatened anyone.
> > > > > >
> > > > > > lying again
> > > > >
> > > > > Nope.
> > >
> > > yes One shot one kill is a threat
> >
> > Nope.
>
> sure is

Nope.

> > A prosecuter won't touch your "claim" based upon the original
> > context and in response to your own words, Markie.
>
> there is no context in which it isn't a threat

Sure there is...The original context in which it was stated and
the comments to which it was responding...YOUR comments by the way...

> > > > > I have seen you threaten Todd and BB and you have threatened me
> > > > >
> > > > > Nope, nope and nope.
> > >
> > > yep yep and yep
> >
> > Nope, nope and nope.

N o m a t t e r h o w m a n y t i m e s y o u w i s h
t o c a r r y
t h a t o n e o u t, i t s t i l l w o n ' t b e t r u e.

Was that better since I slowed down when I wrote it...?!?!

> It is ture that you have threatened me, both publicaly and in private
> email

No, it's not.

> it is ture that you have harrased me publicaly and privately

Nope.

> You have threatened Todd Her I have seen that.

Why are you calling Todd a "Her"...?!?! And I didn't threaten
Todd.

> You ahve harrassed Todd I have seen that myself

Gee, Markie...got "have" spelled wrong...'magine that.

And you're deluding yourself again.

> You have admitng to conducting what Len discribes as harrassing IMing
> of him on AOL

Lennie's another liar. Documented.

He lied then, he's lied since.

> You harrass and Threaten BB in this forum

S T I L L more mistruths, Markie!

When will it stop?

> > > > > when 4 people tell you are doing something an inteligent man would

> > the First Amendment to the Constitution, Markie.
>
> I understand it clearly your mind is fogged on that subject and many
> others

Your mind is the fogged one, IdiotBoy.

You're the one who said the First Amendment said things it didn't
say.

> > > nor does any other part of the Constitution
> >
> > And there is nothing in ANY part of the Constitution that is
> > "violated" by our exchanges here, Mark....
>
> never said that it was

Sure you did!

> What I said is that constitution does not give the right to threaten or
> harrass people

You said the First Amendment said that. You were wrong. I
re-posted the same thing three times over proving you were wrong.

Are you going to admit your error, or do we just throw this one on
the pile with the rest?

> > > > > a key word in the ruling of the court is peaceably
> > > > >
> > > > The fact remains that the First Amendment does NOT say what you
> > > > alleged it to say.
> > >
> > > i was simply using your quoting of the text
> >
> > You simply did not.

>
> sure did

You're NOW lying about the content of the First Amendment.

Is there ANY topic that you won't lie about, Markie...?!?!

> > You tried to take ONE word from it and apply it contrary to it's
> > use in THAT Amendement.
>
> nope not at all

Yep. Absolutely.

> > You failed.
>
> Not realy but then I wasn't doing what said I was doing and faling at
> it, this rambling on and on is part of your SOP here, wander all over
> the place

Nope...YOU are the one making FALSE references to the First
Amendment of the Constitution. I proved you wrong. Are you going to
admit your error?

> > > > > that is why threatening people ois ilegal that it why the hate speech
> > > > > have a legs to stand on

> > And in fact you've LIED about all of those things.
>
> nope

Yep.

> > You claimed you WEREN'T gay, but it's since been proven with your
> > own words that you are.
>

> well i ambisexual you are not up on the facts

Sure I am.

You're having sex with men. You're doing it right now. Why lie
MORE about it?

> > You claimed you weren't pagan, but it's since been proven with your
> > own words that you are.
>
> nope

Yep.

> > And you've claimed that you're not "dffrent" when it's CLEARLY
> > evident that you are!
>
> another lie stevie

Not in the least.

You're a proven liar, sexual deviate and untrustworthy.

All of it proven by your own word.

> > > > > you are guilty of threats and hate speech
> > > >
> > > > Nope. Not even close.
> > >

> > > > > > > cuting speling cop
> > > > >
> > > cutng spelling cop
> >
> cuting spelling cop

It's "CUTTING", Markie. And at the beginning of a sentence, if
that's what that was, the "C" should be capitalized.

And some punctuation at the end would be appropriate, too.

> > > > A M E R I C A N law allowed for alterations to the treaty as did

> > >
> > > Indeed
> > >
> > > but the treaty lang made the ADA case much harder
> >
> > No it didn't.
>
> sure did

Sure it did...that was the whole urpose of the ADA...to provide a
"one stop shopping" law that, in essence, said not matter what may be
written in any other law, the disabled have certain rights.

> > If anything, the ADA made it EASIER to make your argument viable.
>
> Stvie you have lost it
>
> ADA made the case possible, the treaty made the case harder
>
> what your last stament has to do with the matter I don't know

You "don't know" because you have a hard time comprehending
English and paying attention to the flow of the conversation.

> > > > > I also said It could be VERY expensive and more than I cared to venture
> > > > >
> > > > > Then obviously not enough dedication.

> > >
> > Nope...If YOU like...Obviously you don't have the heart for it.
>
> If it is what I like well I did not care to spend the money or time at
> what I was sure would be won otherwise

Not likely. Not with blind and deaf people passing Element 1
within the liberal guidelines that the FCC had already established.

Makes it pretty hard to establish a need for a change of federal
rules when one can point to people with the same disabilites you
suggest need the help who have already passed the exam you claim they
can't pass WITHOUT the help.....

> indeed it apears that My discussing the possible case, may have
> influneced NCI to include the ADA case arguement in there threat to the
> FCC one they seem to caved on
>
> So It seems other used the case as another wedge

Uh huh.....

Riiiiiiiiiiiiiiiiiiiiiiiiiiiight.....

> > > > > you don't understand the difference between saying something could be

> > Detroit, etc. In those cases they at least hope to win "shut up" money
> > and probably will.
>
> again you are misinformed

Nope.

You forget what "contingency" means...

It means the lawyer get's paid CONTINGENT upon winning ang getting
a settlement.

NO lawyer, unless he's "family", is going to take that he said/she
said case, Markie...

> > Secondly, as I told you before, I have the resources to overcome

Nope.

No delusions.

> > As I have clearly demonstrated here, however, you'll quickly find
> > out that you are NOT the only person who can bring a suit.

>
> more threats

Nope. A promise. "Sue" me and see what happens.

> > > It is easy to sue in America
> >
> > Finally you get the idea...
>
> no it has taken you several years to get that

I have no doubt that it takes you "several years" to get a lot,
Markie.

> > > not so easy to collect
> >
> > Bravo.
>
> which is why sueing you is not worth while

It's not worth "suing" me because the results to you would be
catastrophic financially.

> > > but you are of course bashing the disabled
> >
> > Nope.
>
> sure are

Nope.

> > Serbo-Croation is a difficult language. I tried. Gave up.
>
> not really Russian now that is one is bad

Obviously English is pretty hard, too, judging by that last
sentence of yours...

> > And I can't differentiate the characters in Braille adequately to
> > use it.
>
> you just didn't want to bad enough

Nope. Didn't need to.

> > No bashing occured.
>
> sure did

Nope.

> > > > > with your clear lack of human compassion why did you become a nurse?
> > > >
> > > > What "clear lack of human compassion"...?!?!
> > >

> > > your clear lack
> >
> > Clear lack of what?
>
> human compassion

Where do you get that?

Just because I don't buy your self-victimizing routine?

> > > > You mean not being a soft touch for every self-appreciating,
> > > > self-victimizing jerk that tries to take advantge of others compassion,
> > > > Markie?
> > >
> > > Nope I mean your mean sprited obcessive bulling
> >
> cutting more spelling cop

Then let me help you again:

"spirited"

"obsessive"

"bullying"

And there was none of it.

> > > > If I were that, every hospital in every community would be filed
> > > > to the rafters 24/7 with no hope for ever seeing an empty bed again.

> Your actions as VE in denieing a properly issued code waiver for one

I am under NO responsibility to sign an application if I feel that
the applicaiton would represent the submission of a falsified
application.

> your efforts to control the posting of Todd, BB, Len and Me

Oh make no doubts, Markie...I don't "control" them...

I just have fun pointing out the patent lies, deceit and mistruths
you four generate.

And lord knows you four generate a lot!

> > > > > > > > And people like you never "intimadate" anyone. Humor them,

>
> nope

Absolutely.

No quote means you were making it up all along.

It's not "talking to (my)self", Markie.

It was pointing out that you're STILL a laughing stock!

Alun:

I don't think "they" really see that much of a real need for a code test for extras as much as they realize the covers have been pulled and code will fall. And, they still want to fight and hang on to any little bit of "good old buddy club" they might be able to maintain.

It is not surprising to find people hanging on to their self-serving interests as a dog to a bone. You certainly get a good picture of the fabric of individuals characters as this all plays out... trouble is, in this "dumbed down society" you wonder how many can even realize the importance of peoples motivations.

Those who have sold their soul to the devil now go on grasping at straws, still convinced they have people fooled into thinking they are discussing real reason on why code is so necessary--and "they" are so intelligent no one can see their self-serving motives, they are just little selfish individuals wanting to have a little private hobby at the expense of the whole of society, gee, that is unique--isn't it?

The lies are the elephant in the china closet, and many are blind to its' existence... many are so old they realize they are on their way out, and what is their dignity compared to being able to "keep a private beach" on the radio bands.

At my company, there was a maintenance supervisor who was as stubborn and illiterate as Bruce. You either did things his way, or he would write you up for insubordination. Often times, his way would involve unsafe acts that violated safety practices and OSHA regulations. For whatever reason, he didn't think such rules applied to the people working under him. (Fortunately, he was put in his place for this before someone got hurt, and started abiding by safety procedures.)

The best part about this guy was the shift reports that he'd write. These were e-mailed to an intranet list server, and many people, including company executives, received them. The reports were full of spelling errors, terrible grammar, and looked like they were written by a second grader. Yet, no one cared or did anything about this because the man had been with the company for so long. It was more of a joke than anything else.

Even though the shift reports were internal, I had often wondered what would have happened if a customer would have seen some of these reports. Would they still shrug it off easily if they knew such an ignoramus was costing them money? Would they think it was such a big joke when they started losing orders? It's the same with Bruce. Do the newcomers to amateur radio see Bruce's rants, and think, "If this is what amateur radio has among its ranks, I want no part of it." Most of us ignore Bruce, or see him as a joke. However, his incomprehensible ramblings and insults against "CB Plussers" brand him as a hypocrite and a disgrace far beyond the people he derides, and that certainly is no joke.

Show where Dave commited a crime...Under US or Tanzanian law,
Markie.

> cuting of stevie red herring questions they are realy begining to smell
> you know

They smell because I have your nose down in them rubbing away...

Here they are again:

An ever better yet question (and one that's already been addressed
to but unanswered BY Brain...) is where was Dave ever responsible for
knowing what the allowed band limits by ANY foreign Amateur were?

Can YOU swear, with ABSOLUTE certainty, that EVERY foreign Amateur

you ever "worked" was operating within his/her allowed scope of
licensure?

For that matter can you swear, with ABSOLUTE certainty, that EVERY

domestic station you've ever "worked" was operating within the scope of

his/her license?

Can YOU show where in Part 97 it requires an FCC licensee to be
knowledgable of OTHER administrations licensing criteria...?!?!

> > That's five posts with the same questions posed to you, Brain.
> >
> > Are my assertions of your cowardice correct?
>
> nope but my charges of your bulling are being proved by you

Nope.

Brain alleges Dave did something wrong.

There is absolutely NO evidence of any such lawbreaking.

Avoidng the questions is an act of cowardice.

Uncle Ted:

Your point is well taken, and I do believe a variety of "tools" have been used to discourage new membership, and in subversive ways. Strange it has worked so well for so long. But in the end, when the pathetic end of all this is examined, it is hard not to see what has been occurring.

John

Why can't we have both?

And what constitutes military superiority in space?

> A scientific project on the scale of NASA and designed to develop a new
> fuel, or new fuels, would be in our best interests...

What's needed is a long-term path to energy independence that's not run
by
a large bureaucratic organization, nor that is politically beholden to
so many groups.

Which pretty much leaves government out of the picture.

--

The problem is bigger than fuel - it's all about how Americans live and
what they
expect life to be like. Also their isolation from cause-and-effect.

For example, it's easy to say the solution is to require better gas
mileage from
new cars. Right now the price of gasoline focuses attention on
gas-guzzling SUVs
and the like.

But if the price of gasoline drops to, say, under $2/gallon, too many
people
forget all about the problem, and buy themselves a Hummer.

Gasoline may seem expensive today, as the price nears $3/gal in some
places. But when you
adjust for inflation, the price isn't that high, compared to, say, the
late 1970s.

The problems go way beyond gasoline. The big question is whether
Americans will change
the way they live in order to achieve energy independence. From what
I've seen in the
past 20-25 years, the answer is pretty much "no". Or rather, "HELL NO!"

What's more, the solutions are complex. A 20 mpg minivan isn't the most efficient vehicle in the world - unless you have, say, six people aboard, who would otherwise be in separate vehicles. One 20 mpg van with six passengers is more energy-efficient than six 100 mpg supereconoboxes.

But will most people carpool? Will they pay for public transit, wind farms, and higher-efficiency appliances? Will they live in walkable towns and cities rather than sprawling into suburbia where every trip requires a car? How much are Americans willing to reduce their consumption of energy to balance the equation?

That's the real challenge. Much tougher problems than space flight, because if the solutions can't survive in the real-world marketplace, they'll disappear.

25 years ago I bought a new car that got 40 mpg city, 50 mpg highway, and met all the pollution and safety regs. The descendants of such cars still exist today. But how many are sold?

There *are* new processes out there, like TDP. Might be snake oil, might be the real thing. How do we separate the wheat from the chaff, and get the good systems working?

> Priorities need to be examined here...

Agreed. But do you think the current administration will deal with it in any way that will
result in energy self-sufficiency? Heck, Shrub thinks "intelligent design" (which is just "creationism in a cheap tuxedo") is real science - but that global warming isn't.

How much are *you* willing to change, spend, and give up for energy independence?

making yet another lie on your part

>
> > > > > > > > Put it back in context, Markie, because that's where it would be
> > > > > > > > taken from in court.
> > > > > > >
> > > > > > > it is in context Killing was never the subject
> > > > > >
> > > > > > I never suggested to kill you.
> > > > >
> > > > > liar
> > >
> > > Nope.
> >
> > yes you have
> >
> > you sent the threat out in the gruops more threats in the NG and more
> > still by email
>

> And you're still lying.

not about being threatened or blackmailed or harrass or defending
myself or..

>
> Why do you lie in public when it's already known that you're an
> admtted liar, Markie?

not lying about anything etc biographical detail that a stalker like
you could use to harm me

Indeed I have a mailing from the local school system set to everyone in
the district on interenet safety encouraging adults to teach children
to conceal their Identity in various ways, including out right lying if
being threatened

>
> How do you think all those admissions of lying are going to go
> over in court...!?!

they would prove inconveinant of course, but not fatal, your lies that
"One Shot one kill even in Illiopolis" is not a statement that a
reasonable person could consider threatening would be harder for you to
defend.

as would your various efforts at blackmail

>
> > someone, possibly you called the Cops In illiopolas with some cock and
> > bull story
>
> If it was a cock and bull story, it wasn't about you.

but it mentoned me by name yea right

>
> > you have boasted of finding a picture of my home in those days here
> > recently
>
> YOU posted it, Markie. It was on your GeoCities site, along with
> your picture...

again you are admitting to stalking me since you went looking for it
and other data for it with no legitimate purpose
>
> > > > it is a plain and clear threat
> > >
> > > To a delusional paranoid personality, perhaps...
> >
> > no to any reasonable person, which of course lets you out
>
> Let's me in, Markie, and YOU out.

your out I am in the FBI is in, the local prosecuter is in, as the
shiref

>
> > > > > That's your rampant paranoia.
> > > >
> > > > one shot one kill is a threat
> > >
> > > To a delusional paranoid persoanlity, perhaps...
> >
> > no to any reasonable person, which of course lets you out
> >
> > you are the delsuional paraniod
>
> Nope.

yep

>
> I'm not the one who thinks that someone is stalking him, trying to
> kill him over flaming in a newsgroup, and who thinks sexual and
> societal devaiance is OK.

never said you were trying to kill me only that you were threatening
to, you are stalking me and your are showing a preverts interest in my
sexuality

>
> > any questioning of the PR of the ARS is a personal attack on you that
> > is paranois and delusional
>
> No...LYING about Amateur Radio is an attack on licensed Amateurs.

no one has lied about amteur radio, they have expressed different views
than you agre with

deference in point of view is not falsehood

expressing disent is the Hallmark of America

>
> > it is also a sign of other mental problems
>
> Here we go with Dr Markie's diagnosis again...

never claimed to be a dr

>
> > > > after all Morse code is not a person, only people can be murdered
> > >
> > > Then why are you accusing me of trying to murder you?
> >
> > not even accusing you of that, but of threatening too can't you keep
> > anything straight?
>

> Sure I can.

then do so

>
> You've allegeded I threatened to kill (murder) you.

and you have threatened to kill me

>
> And yes, you've accused me of it.

no I have accsued you of trying I have accused you of threatening to
murder me

>
> > > > > > > > > Threating to speak to Todds folks is a threat
> > > > > > > >
> > > > > > > > Nope.
> > > > > > > >
> > > > > > > sure is
> > > > > > >
> > > > > > How?
> > > > > >
> > > > > by being one
> > > >
> > > "by being one" what?
> >
> > by being a threat
>
> How is talking to Todd's parents a threat unless he's doing
> something wrong?

By leing to his perents you certainly might be able to make trouble for
him

The same reason I am not pleased at the idea of you telling your lies,
half truths and distrtions, here in houghton county.

If you lie to Todd perants convincingly enough I am sure it could be
troublesome for him

If you lie to the officals here convincingly enough it could
troublesome for me

>
> > > Re-read what you wrote, in response to what >>I<< wrote, Mark...
> > >
> > > It doesn't make sense.
> >
> > sure does
>
> To YOU, perhaps...But English is my native tongue.

then USE english
>
> > > > > Why do you continue to make and remake this assertion in the face

> >
> > I have posted various bit of evidence
>
> You've posted nothing but your paranoid delusions.

Nope You psot all that I need

you have today admitted to all the elements of Blackmail

>
> > therefore you are lying when you say"Why do you continue to make and
> > remake this assertion in the face of evidence to the contrary?",
> > becuase you have present no evidence to contrary
>
> Upside down as usual, Mark!

that must be it you are siting on your head, well do let your brain out
for some air....soon

>
> Nice try, though!
>
> > > >>YOU<< have >>NO EVIDENCE<< of ANY threat!
> > >
> > I have your admission of sending the first threat, and then ore besides
>
> You have NO "admission".

I certainly do

>
> > what more do I need beyond an admission?
>
> Facts, Boyo, because you have no admission of ANYthing...

I have you admitting to typing the words "One Shot One Kill..." I have
you admiting to serching out pictures of Me, my former Home, I have you
admittin gthat you are trying to compel me to leave the Newsgroups

I have plenty

you are lucky no one takes the Usenet that seriously

>
> > > > > > cuting another lies
> > > > > >
> > > > >

> > out of the blue. The is never a reason to threaten to kill anyone over
> > the ARS
>
> You continue this unhealthy rant about threats, Mark.

it is quite healy Ignoring threats is what is unhealthy

>
> No threat was made.

liar

>
> > Indeed what you intended isn't relavant.
>
> Sure it is. Ask a lawyer.

I have

any statement that a reasonable person may view as a threat is a
threat, regradless of the intent of the speaker

try talking about hijacking a Plane in front of law enforement and then
try that you did not mean it, if you are a fool that is

>
> > The standard is would a
> > reasonable person think they were being threatened
>
> And as you said..."that leaves you out"....

You get can't your pronouns right Stevie

learn English

>
> > > > it was and remains a threat
> > >
> > > Nope.
> >
> > sure is
>
> More evidence of self-delusional acts, Markie...

indeed You are providing evidence of your delsuions, mostly your
delsuions of Granduer

>
> > > Why do you continue to "force" this lie when it's apparent you're
> > > not telling the truth, Mark?
> >
> > becuase I am telling the truth
>
> No, you're not.

Sure am

>
> > The only reason you don't see it is that you are pretty sick
>
> No, actually I am in very good health.

Very sick

>
> > > > > > you are lying in saying otherwise
> > > > > >
> > > > > > You are lying in tryng to make it anything more than it was.
> > > > >
> > > > > nope
> > > >
> > > > Absolutely.

> > > not at all
> > >
> > > if it were nothing you would have appologized for the misunderstanding
> >
> > You might try that now, but I doubt it
>
> You're the one with the misunderstanding, Mark.

nope

>
> Why should >>I<< apologize for YOUR misunderstanding?

you should apologize for making a statement that was seen as a threat,
and that any reasonable person might conclude is a threat

>
> > > > if you were manere when it was brought you would have adknowledged the
> > > > words to have been illchoosen or something like that
> > >
> > > If I was "marere"...?!?!
> > >
> > > As for "illchoosen", perhaps YOU should have thought about the
> > > response YOUR
> >
> > unfinished thought here?
>
> Nope. Computer hiccup. Oh well.

an unfinshed thought, meaning you are lying again

>
> But here it is in it's entirety:
>
> "As for "illchoosen", perhaps YOU should have thought about the
> response YOUR words might elicit".

what response.

No reasonable person would expect to exlicit a death threat from a
debate on Morse Code.

and yet that is exactly what you did

>
> > My response was to put you off guard with a simple and harmless lie to
> > deflect you from your threat, based on your nestfew posts it diverted
> > you for several days, till I returned home and could take other actions
>
> Again with this story about "putting me off" and "other actions".

it seemed to work you hardly posted for a bit and I got home to take
other precations, not going to elaborate on what security measures I
took of course

>
> Fiction, Markie...Nothing but fiction...

FACT nothing but FACT

>

> > evade the issue
>
> Nope.

yep It would prove that I had done so, but of course that would have
nothing to do with the issue at hand

>
> > > You'll still have no threats.
> >
> > I have your admissions
>
> I didn't admit to any wrongdoing, Markie.

you have admitted to all the element of the wrong doings you have been
accused of

>
> You have nothing.

I have your admission and you repeating and continuing your efforts at
black mail

>
> > > > threats to call a prosecuter for my lying online, threats to come to
> > > > the UP where I live, threats against Todd, and Len and Brain
> > >
> > > What threats?

more speling cop cut more stevie forgery

> > > > your make threats
> > >
> > > What threats?
> >
> > yours
> >
> > admitted to and documented more than once

>
> I've not admitted to ANY threats. Not a one.

yes you have

>
> > > > by the way It is infact ilegal for you to came HERE since you have been
> > > > informed your are unwelcome
> > >
> > > It would be illegal for me to knock on your front door or violate
> > > your privacy.
> >
> > it is ilegal for you to enter my land
>
> That's what I said, IdiotBoy.

not what you said and go on to repeat

>
> Now where's YOUR basis for stating that it would be illegal for me
> to travel to Michigan...the UP or otherwise...?!?!

I said HERE I did not say Michigan, or the UP or New jersy I said HERE

>
> > > It would NOT be illegal for me to come to Michigan...ANYwhere in
> > > Michigan.
> >
> > wrong It is ilegal for you to come to my Land
>
> As I said above...

and I did too

>
> > and would allow me to use deadly force if I choose
>
> Now THERE'S a THREAT ! ! ! ! ! !

Nope it is not

It is a fact That I may use deadly force in defense of myself or my
property

>
> Better read the law on what constitutes the VALID use of deadly
> force, Markie.

I have.

>
> Hint: Cutting across your front yard isn't it....

Violating posted no trespassing signs is

esp when you personaly have been wraned to stay away

>
> > > Nor would it be illegal for me to speak with local law enforcement
> > > or mental health case workers about you, being careful to express my
> > > concerns as just that...concerns.
> >
> > HMM seem you were threatening me if I contacted Tennesse about my
> > concerns
>
> Nope.
>
> I just said if YOU file a suit, be prepared for the result.

nope another lie

you must not bother keeping track of your lies

you said it was criminal to contact Childrens services about my
concerns that you are mentaly Likely mentaly abusing your kid

of course you were wrong about that

but that was your threat
>
> > those laws do work both ways
>
> As I have been telling YOU, IdiotBoy.

then act like like it

>
> > > > > > > > > threatening action with various parties
> > > > > > > >

nope

>
> > What I said is that constitution does not give the right to threaten or
> > harrass people
>
> You said the First Amendment said that. You were wrong. I
> re-posted the same thing three times over proving you were wrong.

no I said the 1st did not give the power to threaten or harrass people
I never made a stement about the text

and Indeed you ahve proven that nothing in that text gives you the
power to threaten or harass people

>
> Are you going to admit your error, or do we just throw this one on
> the pile with the rest?

your error in making up a stament close but not what I said

You conitue to claim you have the right under the first amdendment to
threaten or harrass the 1st gives you no such right

>
> > > > > > a key word in the ruling of the court is peaceably

> MORE about it?

I am certianly not having sex with any man right now. I currently have
no male partner, I have had them in the past and may well in the
future, but that in and of itself merely makes me not heterosexual, the
remaining possiblities are Homesexual or Bisexaul. I am Bisexaul

>
> > > You claimed you weren't pagan, but it's since been proven with your

> "one stop shopping" law that, in essence, said not matter what may be
> written in any other law, the disabled have certain rights.

you don't understand

the ADA is a LAW

the ITU treaty is the equal of the Constitution. the Provisions of the
ITU treaty or any other treaty for that matter (once the president has
signed and the Senate has advised and consented) outway the effect of
any law. That being said the fact the US could legaly dance around the
wording of s25.2 made the case still fightable

>
> > > If anything, the ADA made it EASIER to make your argument viable.

> > what your last stament has to do with the matter I don't know
>
> You "don't know" because you have a hard time comprehending
> English and paying attention to the flow of the conversation.

no I understand it fine

you don't know about the differences between the law of the land and
the provisions of the constitution, and the provisions of treaties

>

>
> Not likely. Not with blind and deaf people passing Element 1
> within the liberal guidelines that the FCC had already established.

well the problem is YOUR english

We have won the issue without going to court on the ADA issue

But today absent the treaty and ADA chalenge would have been very
likely to suceed, the blind and deaf are far from the only people
disabled in the country

>
> Makes it pretty hard to establish a need for a change of federal
> rules when one can point to people with the same disabilites you
> suggest need the help who have already passed the exam you claim they
> can't pass WITHOUT the help.....

a lie of course

I am disabled and am not disabled in the same way as the blind and deaf

>

ok no statement there that I said you said "I am trying to intimidate
you"

so you are lying again

>
> To "admit" to anything, I'd have to say or write it.

no you could also admit to preform the elements of the act, which you
have done
cuting stevie repeathimself

> > > No quote = Markie Lying.
> >
> > nope
>
> Absolutely.
>
> No quote means you were making it up all along.

No you ahve admitted to all the elements of Intimadation
as well as all elements of Blackmail

>

> him.

nope I have proven that your "method" is completely ineffective

>
> You're an idiot and you keep acting like a fool.

you are a liar a hypocrite, bully, stalker,Blackmailer and bigot

At least I am telling the truth when I say something like that

>
> That I respond in such a way as to show you both is NOT
> "harrassment".

It is harrassment

>
> If you don't like what you see, Markie, correct your idiotic and
> foolish behaviour.

you mean conform to your standards or else you will continue your
harrassment, that is Blackmail plain and simple

>

evading the issue again

>
> And still no "proof" of ANY wrongdoing, Markie.

all the proof I need

indeed your worngdoing is proven by the very post I am responding to
NOW

You prove therin that you are a Blackmailer

>

> > >
> > > Nope.
> >
> > yep
>
> Nope.

yes you have admitted to it in this very post "No...that would be more
like winning the lottery."

that would would view as such is proof that you would receive something
you value, therefore I have proven that I can prove you gain something
of value to you, by suceeding

>

>
> Sure it is.

Not at all

My lawyers are

making yet another lie on your part

>
> > > > > > > > Put it back in context, Markie, because that's where it would be

> > > Nope.
> >
> > yes you have
> >
> > you sent the threat out in the gruops more threats in the NG and more
> > still by email
>

> And you're still lying.

not about being threatened or blackmailed or harrass or defending
myself or..

>
> Why do you lie in public when it's already known that you're an
> admtted liar, Markie?

not lying about anything etc biographical detail that a stalker like
you could use to harm me

Indeed I have a mailing from the local school system set to everyone in
the district on interenet safety encouraging adults to teach children
to conceal their Identity in various ways, including out right lying if
being threatened

>
> How do you think all those admissions of lying are going to go
> over in court...!?!

they would prove inconveinant of course, but not fatal, your lies that
"One Shot one kill even in Illiopolis" is not a statement that a
reasonable person could consider threatening would be harder for you to
defend.

as would your various efforts at blackmail

>
> > someone, possibly you called the Cops In illiopolas with some cock and
> > bull story
>
> If it was a cock and bull story, it wasn't about you.

but it mentoned me by name yea right

>
> > you have boasted of finding a picture of my home in those days here
> > recently
>
> YOU posted it, Markie. It was on your GeoCities site, along with
> your picture...

again you are admitting to stalking me since you went looking for it
and other data for it with no legitimate purpose
>
> > > > it is a plain and clear threat
> > >
> > > To a delusional paranoid personality, perhaps...
> >
> > no to any reasonable person, which of course lets you out
>
> Let's me in, Markie, and YOU out.

your out I am in the FBI is in, the local prosecuter is in, as the
shiref

>
> > > > > That's your rampant paranoia.
> > > >
> > > > one shot one kill is a threat
> > >
> > > To a delusional paranoid persoanlity, perhaps...

> > no to any reasonable person, which of course lets you out
> >
> > you are the delsuional paraniod
>
> Nope.

yep

>
> I'm not the one who thinks that someone is stalking him, trying to
> kill him over flaming in a newsgroup, and who thinks sexual and
> societal devaiance is OK.

never said you were trying to kill me only that you were threatening
to, you are stalking me and your are showing a preverts interest in my
sexuality

>
> > any questioning of the PR of the ARS is a personal attack on you that
> > is paranois and delusional
>
> No...LYING about Amateur Radio is an attack on licensed Amateurs.

no one has lied about amteur radio, they have expressed different views
than you agre with

deference in point of view is not falsehood

expressing disent is the Hallmark of America

>
> > it is also a sign of other mental problems
>
> Here we go with Dr Markie's diagnosis again...

never claimed to be a dr

>
> > > > after all Morse code is not a person, only people can be murdered

> >
> > by being a threat
>
> How is talking to Todd's parents a threat unless he's doing
> something wrong?

By leing to his perents you certainly might be able to make trouble for
him

The same reason I am not pleased at the idea of you telling your lies,
half truths and distrtions, here in houghton county.

If you lie to Todd perants convincingly enough I am sure it could be
troublesome for him

If you lie to the officals here convincingly enough it could
troublesome for me

>
> > > Re-read what you wrote, in response to what >>I<< wrote, Mark...

> > right you have presented no eveidence that you are not making threats
> >
> > I have posted various bit of evidence
>
> You've posted nothing but your paranoid delusions.

Nope You psot all that I need

you have today admitted to all the elements of Blackmail

>
> > therefore you are lying when you say"Why do you continue to make and
> > remake this assertion in the face of evidence to the contrary?",
> > becuase you have present no evidence to contrary
>
> Upside down as usual, Mark!

that must be it you are siting on your head, well do let your brain out
for some air....soon

>
> Nice try, though!
>
> > > >>YOU<< have >>NO EVIDENCE<< of ANY threat!
> > >
> > I have your admission of sending the first threat, and then ore besides
>
> You have NO "admission".

I certainly do

>
> > what more do I need beyond an admission?
>
> Facts, Boyo, because you have no admission of ANYthing...

I have you admitting to typing the words "One Shot One Kill..." I have
you admiting to serching out pictures of Me, my former Home, I have you
admittin gthat you are trying to compel me to leave the Newsgroups

I have plenty

you are lucky no one takes the Usenet that seriously

>
> > > > > > cuting another lies
> > > > > >

> > the ARS
>
> You continue this unhealthy rant about threats, Mark.

it is quite healy Ignoring threats is what is unhealthy

>
> No threat was made.

liar

>
> > Indeed what you intended isn't relavant.
>
> Sure it is. Ask a lawyer.

I have

any statement that a reasonable person may view as a threat is a
threat, regradless of the intent of the speaker

try talking about hijacking a Plane in front of law enforement and then
try that you did not mean it, if you are a fool that is

>
> > The standard is would a
> > reasonable person think they were being threatened
>
> And as you said..."that leaves you out"....

You get can't your pronouns right Stevie

learn English

>
> > > > it was and remains a threat
> > >
> > > Nope.
> >
> > sure is
>
> More evidence of self-delusional acts, Markie...

indeed You are providing evidence of your delsuions, mostly your
delsuions of Granduer

>
> > > Why do you continue to "force" this lie when it's apparent you're
> > > not telling the truth, Mark?
> >
> > becuase I am telling the truth
>
> No, you're not.

Sure am

>
> > The only reason you don't see it is that you are pretty sick
>
> No, actually I am in very good health.

Very sick

>
> > > > > > you are lying in saying otherwise
> > > > > >

> > > if it were nothing you would have appologized for the misunderstanding
> >
> > You might try that now, but I doubt it
>
> You're the one with the misunderstanding, Mark.

nope

>
> Why should >>I<< apologize for YOUR misunderstanding?

you should apologize for making a statement that was seen as a threat,
and that any reasonable person might conclude is a threat

>
> > > > if you were manere when it was brought you would have adknowledged the
> > > > words to have been illchoosen or something like that

> > > response YOUR
> >
> > unfinished thought here?
>
> Nope. Computer hiccup. Oh well.

an unfinshed thought, meaning you are lying again

>
> But here it is in it's entirety:
>
> "As for "illchoosen", perhaps YOU should have thought about the
> response YOUR words might elicit".

what response.

No reasonable person would expect to exlicit a death threat from a
debate on Morse Code.

and yet that is exactly what you did

>
> > My response was to put you off guard with a simple and harmless lie to
> > deflect you from your threat, based on your nestfew posts it diverted
> > you for several days, till I returned home and could take other actions
>
> Again with this story about "putting me off" and "other actions".

it seemed to work you hardly posted for a bit and I got home to take
other precations, not going to elaborate on what security measures I
took of course

>
> Fiction, Markie...Nothing but fiction...

FACT nothing but FACT

>

> You're making ludicrous charges in a public forum EVERY day.

not at all

>
> You've admitted to being a prolific liar and that's been archived.

nope I Have admited to lying about my bio my name for reasons of self protection

Prolific liar is never something I have admitted too

>
> Seems pretty "full bore" to me...

when you make up stuff like you do Stevie I am sure it looks like a
bigger deal than it is

But then I deal in the REAL world

That isn't How I recall it, but In fairness maybe you are right. How
did that come off? the Investagtion you promised. Never got near enough
to me to notice.

>
> > You realy don't know much about how the world works
> >
> Seems you're the one with the perception deficits, Markie.

I miss a view things sure everyone does, but I, at least, have a
conection to the real world. You lack any contact with it, you exist
within and never seem to see it

>

>
> Nope.

yep It would prove that I had done so, but of course that would have
nothing to do with the issue at hand

>
> > > You'll still have no threats.
> >
> > I have your admissions
>
> I didn't admit to any wrongdoing, Markie.

you have admitted to all the element of the wrong doings you have been
accused of

>
> You have nothing.

I have your admission and you repeating and continuing your efforts at
black mail

>
> > > > threats to call a prosecuter for my lying online, threats to come to
> > > > the UP where I live, threats against Todd, and Len and Brain

>
> I never typed a threat.

and you just lied again

>
> Why do you keep lying about this? (And then snipping my questions
> about WHY you lie about it...?!?!)

You are lying you continue to lie.

You made threats

you have tried and continue to try to balcmail me in various ways

I can't answer a question about why I and doing that I am not doing

Why do you conitue to lie?

>
> > > > > > > > > > cuting stevie evasion

> >
> > wrong It is ilegal for you to come to my Land
>
> As I said above...

and I did too

>
> > and would allow me to use deadly force if I choose
>
> Now THERE'S a THREAT ! ! ! ! ! !

Nope it is not

It is a fact That I may use deadly force in defense of myself or my
property

>
> Better read the law on what constitutes the VALID use of deadly
> force, Markie.

I have.

>
> Hint: Cutting across your front yard isn't it....

Violating posted no trespassing signs is

esp when you personaly have been wraned to stay away

>

> > concerns
>
> Nope.
>
> I just said if YOU file a suit, be prepared for the result.

nope another lie

you must not bother keeping track of your lies

you said it was criminal to contact Childrens services about my
concerns that you are mentaly Likely mentaly abusing your kid

of course you were wrong about that

but that was your threat
>
> > those laws do work both ways
>
> As I have been telling YOU, IdiotBoy.

then act like like it

>
> > > > > > > > > threatening action with various parties

nope

>
> > What I said is that constitution does not give the right to threaten or
> > harrass people
>
> You said the First Amendment said that. You were wrong. I
> re-posted the same thing three times over proving you were wrong.

no I said the 1st did not give the power to threaten or harrass people
I never made a stement about the text

and Indeed you ahve proven that nothing in that text gives you the
power to threaten or harass people

>
> Are you going to admit your error, or do we just throw this one on
> the pile with the rest?

your error in making up a stament close but not what I said

You conitue to claim you have the right under the first amdendment to
threaten or harrass the 1st gives you no such right

>
> > > > > > a key word in the ruling of the court is peaceably

> MORE about it?

I am certianly not having sex with any man right now. I currently have
no male partner, I have had them in the past and may well in the
future, but that in and of itself merely makes me not heterosexual, the
remaining possiblities are Homesexual or Bisexaul. I am Bisexaul

>
> > > You claimed you weren't pagan, but it's since been proven with your

> "one stop shopping" law that, in essence, said not matter what may be
> written in any other law, the disabled have certain rights.

you don't understand

the ADA is a LAW

the ITU treaty is the equal of the Constitution. the Provisions of the
ITU treaty or any other treaty for that matter (once the president has
signed and the Senate has advised and consented) outway the effect of
any law. That being said the fact the US could legaly dance around the
wording of s25.2 made the case still fightable

>
> > > If anything, the ADA made it EASIER to make your argument viable.
> >

> >

> > what your last stament has to do with the matter I don't know
>
> You "don't know" because you have a hard time comprehending
> English and paying attention to the flow of the conversation.

no I understand it fine

you don't know about the differences between the law of the land and
the provisions of the constitution, and the provisions of treaties

>

> within the liberal guidelines that the FCC had already established.

well the problem is YOUR english

We have won the issue without going to court on the ADA issue

But today absent the treaty and ADA chalenge would have been very
likely to suceed, the blind and deaf are far from the only people
disabled in the country

N2EY:

Well, if you know a way to force some private corp or corps into starting now, go for it, I don't--but we can, as american citizens, fund development of alternative energy sources and hire employees to do it for us.

"Military superiority?" Simple, that is the ability to win any conflict another nation or nations may engage us in--or, if that fails, to totally destroy their country so that if there are any survivors here, we may at least begin to try to put things together again with out a evil foreign powers control.

Perhaps you have an alternative energy source you are working on in your garage, if so, step forward man, all I see are a bunch of kooks with "free energy devices", and while a free energy device may indeed be possible, all I have seen are scams!

I just love you east-coast liberals with your "feel-good conservation village" notions. Such societies exist (in Europe primarily) --- if you want to live in one, move there.

Personally, I prefer my fuel-inefficient 6.0L 32-valve turbocharged engine to your "50mpg highway" wimp-mobile. Since I'm willing to pay the price to run it, and enjoy the freedom it gives me, your "walkable towns" have zero appeal to me. Sooner or later, of course, the democrats will again ascend to power and attemp to social-engineer such crapola into the law of the land, rather than inconvenience a few reindeer with drilling rigs in the neighborhood.

## 1172. Glenn A. Baxter K1MAN

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-10 19:45:47 UTC
From: John Johnston <John.Johnston.1tkhc6@news.radiobanter.com>
Message-ID: <John.Johnston.1tkhc6@news.radiobanter.com>
Source record: 115529

Looks like Baxter may be in even deeper doo doo. Word is he's being investigated by the Maine and Illinois Boards of Professional Regulation. Seems they got word that Baxter lost his last job cuz he "allegedly" threatened his last boss while he was on the job as a professional engineer, and that's a no no.

What with that $21,000 FCC fine and trouble from two professional boards, what else could go wrong for the broadcasting Bozo?

Oops-- did I forget to mention the IRS?

Til next time,

-Johnny Johnston

PS: Toad, you are a LOSER!

Hydrogen fuel cells, bountiful, renewable resource.

The shuttle program does need to be phased out,though, it is mid-
70's and 80's technology. A much better system has to be
developed.

John,

Since you purport to have a ee degree, you might explain how some signals held below 300 KHz could possibly serve a number of users (say in a neighborhood) at 3 megabaud (or higher) rates? My $29.95 per month ADSL runs from 4,000 kbits to 7,000 kbits per second. I downloaded I.E. 6 at 695 kilobytes per second, so it is not a fluke. Will BPL do as well? BPL isn't going to be used in the countryside; they want to penetrate cities where the cost per user will be cheap. The problem is that cable (Roadrunner) and DSL are running $29.95 per month - oh, DSL is now available (high speed) at $24.95 per month. Of course, satellite can also supply high-speed Internet connections. Perhaps BPL can do it for $10.00 per month? LOL

For what it is worth, Len is correct; the BPL runs from just above the AM broadcast band (in the U.S.) to around 80 MHz. Even at, say, 1.8 MHz, there can be considerable radiation.

The easiest solution is simply to allow it, but not allow signals any greater than those currently permitted for unintentional radiators. If done, only a small number of amateurs would likely be affected.

If I recall properly (and anyone is free to correct these numbers), BPL proponents had argued that BPL, as originally proposed, would only raise the background noise some 10 dB. Ten decibels is, of course, 1 Bell, which is a 10 times increase in power (in this case, noise power). That is quite unacceptable. Period.

I know that a large number of folks would like to reduce testing (not just Morse) to as close to zero as possible.

My former employer discontinued apprenticeships a while back. Originally, they were 4 year apprenticeships; later, they became 3 year apprenticeships - but the 3 year apprenticeship conferred an associates degree upon graduation. So, the 4 year apprenticeship must have been a watered-down apprenticeship, right?

I see where one state in this country is now changing its' education system to take a strong stand against evolution and make some statements encouraging "intelligent design".

Speaking of that associate's degree apprenticeship, they stated that it includes a lot of electronic theory. I saw the books. I was surprised that they actually mentioned Norton and Thevenin equivalents, but they were sorely lacking in much detail. No ac theory (forget complex impedance). Simply series and parallel dc circuits. No bridges. No Delta Wye conversions. No multiple dc sources either. Perhaps a maximum of 4 resistors in an extremely simple "circuit".

Whilst you and others seem intent on reducing testing (I have no problem with Morse - either for or against), I cannot agree with simplifying the theory/operating/law sections of the testing. I see other areas of the country which are similarly intent on watering down much other than amateur radio.

Why, oh why, are we the number 16 nation in the world in broadband penetration (oh, BPL, right?)? We are far from number one with cell phones. We are down around number 20 in life expectancy.

Yep, better argue against Darwin. All those liberal left-leaning universities must be the problem. Perhaps we can chase away learned folks the way Germany did 70 years ago or so. Werner Von Bran sure was an asset to our country when he left Germany. Maybe we can return the favor and chase some folks out of this country.

I'm beginning to see why some of the hams argue so vehemently. I think it has something more than just Morse behind it.

Take a look at what is happening. Read some newspapers (best look outside the U.S. for less-biased reporting). Check some numbers (such as poverty, Internet penetration, life expectancy). No, we are not in bad shape, but nowhere near the top where most folks simply *think* we are. Just because the administration says were are doing well doesn't make it so.

Best regards from Rochester, NY
Jim AA2QA

Jim:

I don't think I have ever made a statement or post to "reduce testing" or even make it one question easier...

You are attempting to sneak in an argument of your own design and form a false to what is being argued. Most, if not all, this is about is dumping morse, an un-needed, under-used, ancient form of communication that a very good portion of amateurs never use...

If they have some way of using ~1.72 - 80Mhz for BPL, go for it, at the most they will only interfere with an insignificant number of hobby users... business/corporate america can adapt to other freqs, indeed, the boost on the whole to industry by updating the net will out weigh any negative effects. Military can use satellites...

# 1177. Re: Docket 05-235 Scorecard

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-10 21:08:02 UTC
From: LenAnderson@ieee.org
Message-ID: <1123708082.101302.23690@o13g2000cwo.googlegroups.com>
Source record: 115528

Today's Scorecard in the NCTA v. PCTA Amateur Championships!

As of midnight EDT on 9 Aug 05, WT Docket 05-235
Comments on Test Element 1 Elimination/Retention are:

Total 1316

Indeterminate/duplicates (note 1) 53

Unambiguously Against NPRM (note 2) 362 28.66%
Unambiguously For NPRM (note 3) 730 57.80%
Code test ONLY for Extras (note 4) 171 13.54%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, and one foreign citizen submission.

2. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

3. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
midnight of 9 Aug 05 that Total would be 1263.

A growing number of keep-code-test-for-Extra entries prompted
a review of all entries up to 9 Aug 05 and revision of the
previous postings of Against and Indeterminate numbers.
This was exacerbated by 14 entries made into the various day
listings by the FCC after midnight of the days given. Total
entry numbers are correct to the FCC-given totals up to and
including 9 Aug 05. Having read each and every entry made
so far, new entries made in previous day's listings can be
spotted without fail and tallied groups corrected as need be.

9 August 2005 is the 15th day of submitted Comments. A notice
about FCC 05-143 or Docket WT 05-235 has NOT YET BEEN MADE in
the Federal Register so it is unknown if these 15 days of Comments
will be accepted by the Commission for decision on any Report and

Order. Stay tuned...the future of U.S. amateur radio is being made, like it or not.

Way to go, Alun! And to Hans Brakob who appeared in the first 22
Comments I checked out for 10 Aug 05!

Everyone ought to make themselves heard to their government,
an essence of our democratic process rights in the USA.

> Of the last 50
>comments, 24 are in favour, 17 against, and 9 want to keep a code test for
>the Extra only. I suppose that does mean that a slim majority (of the last
>50) want to keep a code test for the Extra but not the General, but 48%
>want the code test eliminated. Unfortunately I don't have time to read all
>1,319 comments!

No? :-) I have the time...and I've MADE the time. Interesting
to watch the individuals instead of their opinions being filtered
(and usually 'modified') through some other organization.

Larry Klose looked at all 2300+ Comments on the 98-143 NPRM and
know I have a good idea of how he felt slogging through some
of the truly weird (and sometimes imaginative) writings of a
few folks. [see "LeRoy Klose III" exhibits of 25, 26 Jan 99
under Docket 98-143 on the ECFS...nice statistics work on a
lot more complex NPRM than 05-143 for Docket 05-235]

I am posting the "scorecard" as of midnight 9 Aug 05 today.
The number of Comments/individuals FOR the NPRM are 57%, a
majority. Even if those unambiguous FOR Comments are
percentaged against the total number of Comments to date,
they would still be in the majority.

for yes

I can understand all of that. However, the nature of
transmission lines is that they appear (to source and
termination) as extremely-long, quite-low-cutoff-rate
L-C lowpass filters. If the source output impedance and
the termination input impedance are the same as the
transmission lines' characteristic impedance, maximum
power flow happens.

The MAJOR problem with ANY transmission line environment is
DISCONTINUITIES...anything along the line path that upsets
the characteristic impedance, usually a physical size thing
but can be a change in conductor material, addition of a
dielectric in the Transverse ElectroMagnetic (TEM) field,
and similar. ANY discontinuity will produce a reflection
to the wavefront and increases the VSWR (Voltage Standing
Wave Ratio).

Note: I use "VSWR" where most hams use "SWR." That's
industry practice and relates to the method of measurement,
by voltage instead of some means of measuring power (for
direct SWR). All ham-used "SWR" meters really measure
RF voltage in/out, thus they measure VSWR, but indicators
are automatically converting the VSWR to "SWR" for some
odd kind of apparent tradition.

Well, I "cheated" in that I took two semesters (at night)
of microwave theory and techniques because that was what
I was working in at the time. Taught by an EE with teaching
credentials, himself a day worker in microwave engineering
at Hughes Aircraft, Culver City, CA. Gave me terrific
insight to the behavior of transmission lines, matching, etc.
Afterwards I found a McGraw-Hill Schaum's Outline Series on
transmission lines by Robert A Chipman (professor of EE at
University of Toledo) with many fascinating examples and
solved problems on everything from electric power transmission
at 60 Hz to waveguide power transmission at GigaHertzes.
[out of print now but the 230+ pages of 8 1/2 x 11 inch soft-
bound cost a mere $4.95 in the early 1970s] Made good use of
that Chipman text in later formal EE class work...saved
my mind from having to "re-invent the wheel" (as most beginners
do) in order to get the beloved academic *credits*. :-(

Most residential areas in the USA have above-ground electric
power distribution. With those, it is relatively easy to just
look and estimate the conductor size, their spacing, and get
a rough idea of the characteristic impedance of two-wire open
wire transmission lines. Then look along the 4 KV distribution
route and see where the spacings change, the connections to
step-down transformers occur (and at what intervals), the
cross-overs and half-loop jumpers as the line has to turn
corners, splices, whatever. Usually there will be places
where the line spacings deliberately come closer or spread
for whatever mechanical reasons. All are discontinuities.

At RF, most pole transformers present a high impedance to the
4 KV distribution line. Those can be thought of as "parallel
bridgings" (as in video signal distribution) or like the
common "capacitance tap" of older TV cable coax distribution.
They don't affect the main transmission line much at all.
From what I understand of BPL practice, the broadband
service couplers go around the pole transformer and go directly
to the subscriber drop with appropriate HV protection, etc.
How they do that is irrelevant...like the "capacity tap" of
TV cable subscriber drop pick-off, it won't affect the main
distribution route. ALL THE OTHER DISCONTINUITIES WILL affect
the "characteristic impedance" of this BPL transmission line.

Where discontinuities exist physically, there WILL BE RADIATION
of the BPL signal sidebands. That will happen on every single
RF transmission line ever built/installed/debugged/whatever.

>Now, 300Hz to vlf is great, and there would be tolerable line

>the ISP. I have no idea what-so-ever of how "long wire antennas" of that
>magnitude behave like... and as a transmission line! Krist, I am worried
>about how much signal I am getting though 250+ feet of aging coax!

Whether coaxial cable or open-wire line, ALL transmission lines
have attenuation increasing with increasing frequency. For new
cable the "db per 100 foot" column can be consulted for what it
was when new in your 250-foot case. Attenuation will increase
somewhat with aging but - for coax - that is due mostly to the
dielectric polymer material doing some weird polymerization
depending on its original quality and composition. Big difference
in polyethylenes, very little difference with tetrafluoroethylenes
(Teflon). Open-wire lines have the least problems with aging,
that due mostly to conductor surface oxidation (plating with
another, non-oxidizing metal helps that) and accumulation of
airborne dirt and crap (which can be cleaned off). Problem with
open-wire line is the characteristic impedance is so much higher
than coax and thus the RF voltages are proportionally higher.

For ANY transmission line ya gotta treat the line as essentially
broadband media (but with a slow rate of attenuation at higher
frequencies). When the line's characteristic impedance is
matched at both ends, everyone is happy. When it ain't, ya get
delivered power LOSS with the difference between input and
output power being either radiated or absorbed (in something).
Mostly that is excess RADIATION...which CAN be measured.

With an ideal transmission line (and ideal matching front/back)
there isn't any radiation. Power loss is confined to the loss
within the line itself (also measureable). The minute you put
a discontinuity in that line, there WILL BE RADIATION.

John, 60 meters is being tried for amateur use on a secondary basis - and will likely experience some interference for the primary users.

As Len mentioned, there still are a lot of services using HF. The cellphone and Internet set are likely not aware of them. Users like low-band VHF used for long-haul trucking (somewhere around 40 MHz; I'm not exactly sure). Also, Channel 2 television runs from 54 to 60 MHz. Channel 3 television runs from 60 to 66 MHz. That still falls below 80 MHz and can be interfered with. Not likely in the primary service area, but get near the fringe and forget the picture with BPL. Of course, BPL will likely try and run in the cities where the cost is lower. Of course, many folks are on cable and/or satellite, so that won't bother most.

One needs to look at the whole picture. There *are* services other than amateur radio in the HF spectrum. I hope you don't think that amateur radio has 50% or more of the HF spectrum ;)

Then you're reading what you want into this.

As usual, facts are of little concern to you.

> > > > And unless I missed something, this mission flew some part of
> > > > every profile that the Shuttle was envisoned doing.

> >
> > That was the ONLY mission for the Shuttle, Markie?
> >
> never said it was

YOU said the Shuttle is an "utter" failre. That means nearly
complete in current American use of the term.

Facts are that it's anything but.

> > > > > > That people have been killed flying it? So what? People die on

> No I meant men in one of the senses in which english uses the word

Then you grossly insulted the women who died on those missions
too.

Scumbag.

(SNIP)

> >
> > This is HARDLY failure.
>
> sure is
>
> None of them to the orbits promised.

Every Shuttle launched with the exception the last Challenger
mission made it to the orbit promised.

> No shuttle has been turned around in the time promised

Sure they have. Several.

> No GEO sat captured and repaired

None scheduled.

> No more polar launchs at all

Was one necessary? Was one scheduled?

> No Cheap launchs

No launch is cheap.

> The shuttle does NOT do what it is supposed to

Sure it does.

> Does not mean it is Useless, merely unsucessfull at it
> designed/promised mission

It does far more than it was inteded. That i may have not met
some of it's INITIAL parameters does NOT make it an "utter failure".

> I am gald that we have found mission for the multibillion dollar
> shuttle, ifwe had not it would be a failure at it original mission, but
> an absolute disaster

You've not proven your assertion of "utter failure" yet.

"Absolute disaster" is far and beyond that.

> > > > People have died on Shuttle missions. That is a fact. The fact

Sure it does!

> cuting more off topic crap

The "crap" is you cutting out those things you don't want to deal
with, especially when it provides a relevent example of facts:

QUOTE

For one example...You'd not beleive the number of people (some of
them very educated persons) who come to my ER thinking they are going
to be in-and-out in an hour. Why? Becasue that's the length of time
an episode of "E.R." takes to fix things...

UNQUOTE

Sure I do.

You've just not provided any so far.

> > Of course you've made a life-long habit out of manufacturing
> > failure in order to have excuses for non-success, haven't you?
>
> more stevie lies

More Markie WISHING he wasn't so transparent.

> > > that we have learned something from thsi failure is a good thing but it
> > > is still a failure
> > >
> > > and you realy don't undersatnd science stavie you just don't
> >
> cuting speling cop'

Allow me to put it back since you obviously didn't fix it the
first time.

"really" "understand" "Stevie" "cutting" "spelling"

A capital leter begins the sentence and a period or question mark
typically ends it.

> > Sure I understand it.
> >
> > And I understand you.

Nope. You've yet to prove a thing.

> > Nope. Not even close, Markie. You actually have to have some
> > "proof" in order to get that...
>
> you bet that an english of my chioce would flunk my sentence and give

> you an "A" you lost

Not of YOUR choice, Markie.

So let's go through THAT sentence and see WHY you are NOT entitled
to $500:

Sentence not started with a capital letter.

"english" not capitalized.

"chioce"

And every post you've made SINCE then has been just as terrible.

> > You're a looooooooooooooooooooooooong way away from that.

> and failing to prefroms it designed mission

It's performed all except one mission. Challenger never made
orbit. Columbia's mission was completed and it was coming home.

> which has nothing to do with simulations

Your lack of English comprehension is apparent again.

> > I say you're bonkers because the Shuttle has MORE than fulfilled

>
> form the original post Jim words

Jim's opinion.

Both NASA assessments and assessments of the scientific community
in general that have lauded the Shuttle say otherwise.

> the Shuttle does and can't do these things

Make up your mind, IdiotBoy.

> > > BTW Id call the last mission f Chalenger and Colombia failures
> >
> > I didn't say there weren't failure IN the program.
>
> you said all mission acheieved thier goals or in your exact words "The
> "shuttle" has never failed in performing it's mission."

The SHUTTLE itself has never failed.

The falures were directly related to the external tanks/boosters.

> > I said the Shuttle PROGRAM is not a failure.
>
> not according to you

There's that English comprehension problem again, Markie.

> > And as I have CORRECTLY pointed out before, the catastrophies were
> > both due to problems with the external fuel tank/boosters.
>
> which are part and parcel of the shuttle program

But the SHUTTLES were not the problem.

And even with the fuel tank/booster issues, the overall program is
STILL a success.

> > > > > the Shuttle has falied utterly in being able to try it designed for

BBBWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA ! ! ! !

Of COURSE you would call it a "cluster ####"

Because your profanity in place of reasonable argument is the sign
of a weak and feeble mind.

And again the Hubble is anything BUT the "cluster ####" you call
it!

> > And what fo the multiple launches FROM Shuttls and satellites

Nope.

Those press releases along with about a ton of documentation from
Scientific American, AW&ST, "Air and Space" magazine, etc.

Are you suggestiong that ALL "PR" on the Shuttle is fabricated and
controlled by NASA...?!?!

> > > > You need to be reading something other than "Pagan Monthly", Mark.

"Cutting" "Stevie"

Facts are facts.

WHY ARE YOU AVOIDING ACKNOWLEDGING YOUR ERROR OF FACTS?

> cutinng more of stevie out of context rating

Putting what I said back in so Markie can face his foolishness one

more time:

ONCE MORE (AGAIN) (FOR THE THIRD TIME) FOR MARK'S EDIFICATION:

> > > > Now some may scoff at these words from a non-rocket-scientist. But it
> > > > doesn't take a rocket scientist to understand what went wrong in the
> > > > Challenger disaster, nor in the Columbia one.

END QUOTE.

Now...WHERE did Jim say Challenger's probelm was a heat shield
issue?

(Now patiently awating Mark to acknowledge he mis-read Jim's post
where he DID say that COLUMBIA'S problem was due to exposing the heat
shield to a foreign object strike)

END QUOTE

Oh?

WHICH "hobbyists" have managed to put a multi-ton, multipassenger
spacecraft into Earth orbit, up to two weeks at a time?

Please include the answer to THIS question along with your
acknowledgement of your error vis-a-vis your claim of Jim's "fib".

> Our space program is in sad shape, i really wish it wasn't, but them is
> the facts

Out space program will only "suffer" if it's not allowed to grow
and mature.

Lying about it's accomplishments won't help it, so please stop.

Steve, K4YZ

Markie...I said SHOW WHERE DAVE COMMITED A CRIME.

I asked that in the questions I posed.

> > > cuting of stevie red herring questions they are realy begining to smell
> > > you know
> >
> cuting again they smell becuase they have nothingt o do with the issue
> at hand

SURE THEY DO!

They are DIRECTLY related to the issue, LiarBoy!

REQUOTE

An ever better yet question (and one that's already been addressed
to but unanswered BY Brain...) is where was Dave ever responsible for
knowing what the allowed band limits by ANY foreign Amateur were?

Can YOU swear, with ABSOLUTE certainty, that EVERY foreign Amateur

you ever "worked" was operating within his/her allowed scope of
licensure?

For that matter can you swear, with ABSOLUTE certainty, that EVERY

domestic station you've ever "worked" was operating within the scope of

his/her license?

Can YOU show where in Part 97 it requires an FCC licensee to be
knowledgable of OTHER administrations licensing criteria...?!?!

UNQUOTE

>
> sure are

Not even close.

> > Brain alleges Dave did something wrong.
>
> He does so allege

And his allegations do not meet the test of validity.

> > There is absolutely NO evidence of any such lawbreaking.
>
> Yes there is.

Nope.
>
> Dave does not dispute Brain describtion of the facts, and brian
> describes a crime

And again, I ask, was Dave obligated to know the allowable
allocations of the French stations? Was he obligated to know the
allocations of ANY foreign operator...?!?!

Here's a hint for you, Markie:

The ONLY time a US licensed Ham was required to know ANYthing about
a foreign operator's permissible activities is if they are (1) On the
list of "No Contact" nations, and (2) If they hold Third Party Traffic
agreements with the United States.

Period.

> > Avoidng the questions is an act of cowardice.
>
> No avoidance the questions were asked and answered, they merely had and
> contiue to have no meaning in context.

No...YOU have "answered" them.

Brain has not.

And according to YOUR answers, no "crime" was committed.

> Throwing out red herrings like this is fraud

Nope. Direct questions relative to the topic at hand.

Now...Let's see if Brain has the testosterone to answer them.

Len:

I think the amateurs who attempt to "control freak" the bands for their personal use and club have always been successful, I mean, isn't it obvious, look at the state of amateur radio.

I am thinking the FCC is giving a "thumbs down" to these "good ole boys" activities... we will see...

However, their squealing like stuck hams (pun intended) was expected, was it not?

It seems to me that your one of those amateur operators who doesn't like K1MAN; reason, you don't have a FUCKING LIFE. Your one of those pathetic licensed CB operators who can get it through their fucking head that IT'S A HOBBY. But no, instead you harass a person because simply put, you don't like what that person says or does, your fucking life circle around ruining this person's life. But hey after he's gone you can go out back and blow your fucking brains out. Because, once he is gone you will no longer have anything to live for because you're the one who is a LOSER.

Some folks say BPL should be subsidized for a time to "stimulate
competition".

> For what it is worth, Len is correct; the BPL runs from just above the AM
> broadcast band (in the U.S.) to around 80 MHz. Even at, say, 1.8 MHz, there
> can be considerable radiation.

It should be remembered that there are a number of different BPL
technologies being pushed. There's no one standard. Compare that to
competing systems!

> The easiest solution is simply to allow it, but not allow signals any
> greater than those currently permitted for unintentional radiators.

IIRC, that's what FCC allowed.

The problem is that the current standards were meant for point-source
individual radiators, like a computer monitor. IOW devices, not
systems.

One of the big problems with BPL is that you can't get far enough away
from it. If my neighbor has a noisy computer monitor, it cannot get any
closer to my ham radio stuff than the property line.

But if even one of my neighbors has BPL, and we're fed off the same
power-company transformer, all of *my* house and service wiring becomes
a BPL radiator, whether I'm a BPL user or not.

> If
> done, only a small number of amateurs would likely be affected.

That depends on how effective the power lines are as antennas. A noisy
point source device like a computer monitor is not a very good antenna,
and it's normally inside a building, with various things around it that
provide some shielding/attenuation. Aerial power lines are up where

they can do a good job of radiating!

IMHO, one of the big reasons BPL is so new, with no previously-existing regulations addressing it, is that it used to be that nobody would dream of even proposing a system using HF on power lines, because they *knew* FCC would shoot them down big time.

> If I recall properly (and anyone is free to correct these numbers), BPL

Allegedly. According to their models.

> Ten decibels is, of course, 1 Bell, which is a
> 10 times increase in power (in this case, noise power). That is quite
> unacceptable. Period.

To us radio types, yes. But to an administration looking for a silver bullet, HF radio is a legacy-mode of communications, as opposed to "the internets"...

> I know that a large number of folks would like to reduce testing (not just
> Morse) to as close to zero as possible.

Yup. One of the good things about 05-235 is that FCC turned down all such proposals. No free upgrades. No easier entry level license.

Not this time, anyway.

Did you read the "Amateur Radio in the 21st Century" paper that led to the second NCVEC proposal? Pretty scary.

> My former employer discontinued apprenticeships a while back. Originally,

> country which are similarly intent on watering down much other than amateur
> radio.

Because it's 'too hard'

You watch - when the Morse Code test is gone, there will be a flurry of
upgrades and some new licenses, but it won't last. Then there will be
renewed efforts to reduce the written tests still more. And they will
use the same
arguments that were used against the Morse Code tests.

> Why, oh why, are we the number 16 nation in the world in broadband
> penetration (oh, BPL, right?)? We are far from number one with cell phones.
> We are down around number 20 in life expectancy.

There's a bunch of reasons for that:

1) Lots of old infrastructure
2) Low population density
3) Lack of exercise, unhealthy lifestyles, lack of access to routine
medical care (how many people use the ER as their family doctor?)
4) Poverty, ignorance, lack of community
5) Diverse population
6) Misplaced priorities
>
> Yep, better argue against Darwin. All those liberal left-leaning

I've already been told here that I should leave, rather than even
suggest that
energy independence might require some hard choices....

> I'm beginning to see why some of the hams argue so vehemently. I think it
> has something more than just Morse behind it.

BINGO!

For about 30 years I've watched the standards erode, a little at a
time. At each step I was told it was "no big deal", I was an "old head"
and had to "accept change". I was told it was unreasonable to expect
people to
learn stuff like Morse Code or most of what was on the writtens.

Yet the growth in amateur radio was greater under the old standards.
Look how
US ham radio grew in the 1970s, then the 1980s, and finally the 1990s.

> Take a look at what is happening. Read some newspapers (best look outside
> the U.S. for less-biased reporting). Check some numbers (such as poverty,

> nowhere near the top where most folks simply *think* we are. Just because
> the administration says were are doing well doesn't make it so.

I think a big part of that is due to the export of good jobs, like manufacturing, out of the USA. Each step is sold to us as "no big deal", but the overall effect is staggering.

Remember Ross Perot and the "giant sucking sound" over NAFTA? Now we have CAFTA!

I tried to buy a new power drill today. Just a plain 3/8' chuck VSR drill with a cord. Try to find one that's not made in China!

Check this out:

http://tinyurl.com/c9txx

You see the leading edge of it because you're in Rochester, a city that was manufacturing- and technology-heavy. Kodak, Xerox, etc. Plus educational institutions to feed those industries.

of course so

The loss of those shuttles which certainly doesn't help one make a case
that the shuttle is a sucess has little else to do with wether the
shuttle can, when working properly do its designed mission

>
> > > > that Men died is bad of course but that men died isn't the reason the

well crew death is kida serious don't you think. I was being generous
but leaving out the NASA negliance with humna life but since you insist

>
> > which has nothing to do with simulations
>
> Your lack of English comprehension is apparent again.

nope

>
> > > I say you're bonkers because the Shuttle has MORE than fulfilled

> > It has not provided chaep access to space
>
> But it's provided access where access wouldn't have been had,
> including the flying of various educational experiements

so that wasn't the mission, yea somebody did agood job of covering up
for the failure of the shuttle to prefom as planned, and I am glad they
did

>
> > It has manged to find usefull propose in lessor roles
>
> Funny how your miniscule mind tries to minimize everything that

>
> But the SHUTTLES were not the problem.

"I said the Shuttle PROGRAM is not a failure."

your words

the shuttle program inludes the Bosster and feuls tank, their failures
are failure of the shuttle program

you don't get it both ways

>
> And even with the fuel tank/booster issues, the overall program is
> STILL a success.

not according to the design specs

>

>
> Such as "...the shuttle is an utter failure..."

find an engineer at Morten (or any NASA) that says the shuttle's
preform accroding to the design

>
> > > > > "utterly"...?!?!

nope

you don't know what the NASA promised when they sold the shuttle you
did ntknow the shuttle could do in point of fact

>
> > > > > > We started in 60 with the Goal of getting to the moon and we did then

strawman again red herrings
>
> > Our space program is in sad shape, i really wish it wasn't, but them is
> > the facts
>
> Out space program will only "suffer" if it's not allowed to grow
> and mature.

"Out Space program"

what needs to happen at NASA is a good house cleaning. The space
program is not being allowed to grow right now. It needs goals it can't
refine, it needs real money. It needs some vision a bit of leadership

I don't see much of this in the near future, some maybe, but not a lot

we are stuck with the ISS and its bills, paying the shuttles bills tile
we finsish the ISS and then developing something new, hopefully with a
purpose in mind

the Euros developed their rockets having a goal and made it the
chinesse are doing the same

we are still fucking around with old tech that does not do the jobs we
need done

>
> Lying about it's accomplishments won't help it, so please stop.

I adknowledge what it has done, it just is not what it was supposed to
do

> "...legaly (legally) bound to ignore..."
>
> I don't think so.

In this case, the truth is in the middle. FCC is not required to follow
majority opinion, but neither are they supposed to ignore it.

The main point is that the majority opinion on 98-143 wanted more code
testing than 5 wpm. But that opinion was ignored by FCC. The majoriy
wanted 5 wpm for General but *not* for all code-tested licenses.

KC8EPO's analysis proves it.

> > > > One very

> > and No one ever promised or sugessted it would be
>
> Sure it was.
>
> It was called the Constitution of the Untied States.

That's not what the Constitution promises.

What the Constitution does is to set the structure of our govt. and
limit its power. What that means in specific cases is what keeps the
Supremes busy.

Note that the Constitution is particularly concerned with protecting
the rights of the individual and the minority against those of the mob
and the majority. That's why we have trial-by-jury instead of
trial-by-public-opinion-poll.

And it takes a 2/3 vote to amend the constitution, not just a majority.
The Equal Rights Amendment (ERA - remember that?) failed to be enacted
because of the lack of a 2/3 majority, even after a time extension.
>
> That concept has been lost in the caucophony of
> least-common-denominatior bar-lowerings.

It's called checks and balances. The wishes of the majority are
balanced against the rights of the individual.
>
> > the FCC has a DUTY to the PUBLIC interest first and only then to the
> > interests of the ARS and finaly to the WISHES of the ARS
>
> "The "wishes" you refer to are by citizens of the United States

> who told the government what they wanted.
>
> The government ignored them.

Yep, they did.

Actually, the only time the govt. is required to submit to the will of
the majority of the people is in certain elections and referenda. (In a
presidential election, the candidate with the majority of votes can
still lose - it's already happened).

Yup.

> The Consitution was violated.

Nope. There's no requirement for FCC to do what the majority of
commenters want.

> > > Now of course if the majority of comments on 05-235 are in

Of course!

Because FCC has to include verbiage justifying its actions.

I was very careful NOT to say to which side of the argument I was referring
to since it clearly refers to both. So the first reply immediately attacks
a poster from one side - I guess it is no more than I expected.

Whether or not you agree with the comments I filed, I hope you agree
that at least they are in English.

To all:

The DOT (department of transportation), DMV (department of motor vehicles), etc. DO NOT require me to have a "Mechanics License" to work on the brakes of my car--yet, if I work on the brakes, don't do it correctly, I might kill someone. If I don't "work on" my radio correctly--no one is going to die...

I can work on the transmission of my car, under the same risks... and CW is a LOT LESS important...

Just because amateurs exist in an "echo chamber", within a "good ole boys club" and damn lies have gained a "truth" of their own is no reason for anyone but fools to fall for these lame arguments!

John

And that someone might be *you*.

> If I don't "work on" my radio correctly--no one is
> going to die...

Not necessarily true.

If you work on your car's brakes and do it wrong, the defect is usually
obvious: the car won't stop.

If you work on a radio and do it wrong, the defect may not be obvious
at all. For example, suppose the radio puts out a strong signal on an
aircraft frequency - all sorts of bad things could happen, but you
wouldn't know it until too late.

> I can work on the transmission of my car, under the same
> risks...

But if you mess up, the car just won't go.

--

You seem to be arguing to get rid of the *written* test.

> and CW is a LOT LESS important...

Do you ever actually listen to the HF ham bands? Down at the low end,
where the hams using Morse Code usually operate?

Morse Code is an operating skill. It's like knowing how to drive at
night or in bad weather. Or with a manual transmission.

> Just because amateurs exist in an "echo chamber", within
> a "good ole boys
> club" and damn lies have gained a "truth" of their own is no
> reason for
> anyone but fools to fall for these lame arguments!

I see. You assume you are right, rather than proving any points.

Typical.

John Smith, CBer blathered:

The majority of people who communicate use the internet (well, phones
and cell phones too.)

drivel snipped-----flushed!

Sorry Mr. CBer,

If BPL emissions interfere with amateur radio signals BPL will be in
violation of FCC regulations. Hams are all for improved technology, we
are not in favor of FLAWED technology. Cable and Satellite technology
already runs rings around anything BPL could dream of. The future is in
Wi-Fi Johnny Cornhole. Get used to it.

bullshit")

That's the same verse I was referencing, DUMBASS. Learn to read,
kook.
All one has to do is push your buttons and you are so easy.

> That's not hard to understand at all

It must be, since you took the verse that follows out of
context. And no matter haow many times you say it, I'm still not
Roger, Saggytits the NostraDUMBASS! Now go take text out of
context like a good little Nazi, fake Xtian. The chapter is
still discussing what is worn (or not worn) during worship, not
at any other time.

> Also, the original (More lies flushed)

{original text restored, not some made up bullshit Saggytits
likes to do, as he did with his UN "International Radio
license".)

but fails to mention (as usual his sloppy, biased "research" is
like him, flawed) that Chapter 11 deals with the Covering for

the head at worship. They have several verses discussing what should not be worn during worship services, probably referencing those rags they wear on their head in the desert (like they do today). His taking the verse out of context shows how stupid he really is and like all fake xtains, wants to use it for something it was not originally intended. The Hebrews, like other Semitic people, regarded LONG HAIR on HEAD and chin as a distinctive MARK OF MANLINESS. Absalom's beauty was attributed to the luxurious growth of his hair (2 Samuel 14:25, 26). This symbol of pride and beauty was shaven as a token of mourning. Non cutting of the hair was part of the vow of the Nazarites (Judges 16:17)Black hair was especially prized (Cant. 5:11). The long hair of men, especially in New Testament times was gererally exceeded in length only by that of women. So looks like they did indeed have long hair, but not in the case of the Egyptians or the Romans.
(Source: Holy Bible, King James version)
{end restore}

> So it is likely

Prove it, kook boy. It's even more likely that Jesus, his leader had long hair, since he was born in Bethlehem. And following the Hebrew tradition of long hair and beard as a mark of manliness. (Unlike you, which you really should go get the rest of your sex change operation so you can be a true woman)

But you never back up what you say, do you, Saggy?

> projection snipped)
> We, on the other hand, know that it only smells that way.

Projecting again, Saggytits, since you never bathe? How would *you* know how another man's hair smells like? Some sort of freudian slip, or are you like Marky, Brian, bisexual? Sounds like you are jealous since your hairline (guffaw! what hairline?) is almost at the back of your scrawny neck.

My own comments

To the persons reading comments for the FCC greetings,
With regard to main body of the NPRM I am a favor of dropping all code tests at once, however there are a few points concerning related matters I wish to discuss and respect insist that FCC made something on these points clear when the R&O is issued.

The privileges of the entry class, Technician, after this action are frankly unclear to me. As perhaps one of the few members of that class making comments it is a subject near and dear to my heart. It is also a question vital to the future of the ARS, and thus in some degree the safety and future of the USA.

I believe the privileges should be what was known as Before the 1998 NPRM as Tech plus, this si because I have frankly observed that many new Techs tend to get struck on FM repeaters, a fine mode but hard to break out of, and being hard to break out tends to depress the chances that they will, ( I refer the FCC to prices on allmode rigs with VHF frequencies compared to FM rigs) In addition to issues of cost with the propagation of VHF there are many times that there is no one out there that a novice operator can find and work. From personal experience, I can tell you that this is a hard thing to do, and thus tends to imped the progress of the Techs and separate them from the rest of the ARS. This separation is not god for the ARS or it abilities to serve in the public interest .

OK folks, you read it right here!

FCC Docket 98-143 is unconstitutional!

The FCC proceeding has been struck down by the County Court of Franklin County Tennessee, the Honorable Judge Steven J Robeson presiding. Hope the VEC's didn't throw away their 13 and 20WPM testing materials.

Now Steve claims to know all amatuer law worldwide.

Yet a moment ago he couldn't tell us the law in the country where the
poor amateur practice occurred. Hi!

Dave:

"Jims' points" are mostly a ploy to inject points which are not even at issue.

Some "crystal-ball papers?" I have never seen "futurists" as being any more accurate then Sylvia Browne, and I am just about as likely to consult with their forecasts (people with the futurist papers) as I am Sylvia Browne, history is created by participating, not reading what others will think it is, or forecast it as being.

On CW being dropped? Well, the FCC is asking for logical, reasonable, meaningful, coherent, comments on that subject right now--anyone can read the comments and decide for themselves. Hopefully, the final decision is made without someone hiding in the woodpile with vested interests... and purely on the basis of what is good for american citizens, the hobby of amateur radio and society as a whole... I think someone has woken up to that fact that there is a stagnant air about it now, and it is becoming of such insignificant numbers that the level of regulation it now has is becoming difficult to justify.

On BPL? Well there are a lot of test blocks where that is being technically tested, evaluated and data is being recorded. I don't think one needs futurist papers, Sylvia Browne, or some hams opinion--technical data will make it a reality or not... that final data is not available yet... I don't think a bunch of aging hams are going to block a multi-billion dollar a year industry, if it is technically feasibly, I know some of them think so, but rational men viewing them only grin behind their backs--but, as long as they only pay attention to their "net buddy's" they will not have to suffer the embarrassment of coping with reality...

On amateurs? I think a noticeably number of existing amateurs will be SK before this year is out, more next year, even more the following year, I think that is a graph which points towards the bottom, and will drag the number of general and extra licenses in an almost 1:1 ratio.

On what he thinks of me? He can hold any opinion he likes, indeed, if I understand my forefathers meanings and intent, I am supposed to uphold that right of his (and all other americans, even including myself) even if it costs my life and those of my family, neighbors and friends--so why would I then, understanding these principles put forth by those men, move even my little finger to halt him in his pursuits of happiness?

Or, perhaps there is something of deep meaning and paramount importance which I am failing to see here?

To assist Mark? No way. He had a pool of trained typists at his beck
and call and has turned down a job paying nearly a quarter million per
year. I'd have thought that he'd have run his comments through his staff.

A bunch of aging hams who are federally licensed trumps Part 15 users
each and every time. Some of those supposed rational, grinning men have
had to yank their BPL systems down because of interference.

> Or, perhaps there is something of deep meaning and paramount importance
> which I am failing to see here?

"Since you purport to have a ee degree, you might explain how some
signals held below 300 KHz could possibly serve a number of users (say
in a neighborhood) at 3 megabaud (or higher) rates?"

There you go.

John,

If you have been around this group for over a year, you would have seen links to some of W1RFI's work. There are different BPL standards (apparently) now. A link had been posted in this group quite some time ago (perhaps a year?) which allowed folks to view the video of some of W1RFI's work. What he found was a tremendous amount of interference caused by BPL. Interference that did not stop at the ends of the amateur bands.

I have not seen W1RFI post in quite some time. I suspect he is tired of the tirades of some uninformed individuals as well as promises of some as to how advantageous certain unlicensed bands are. Not that information was incorrect, just that much was omitted.

A lot of good folks have left this group as the bickering keeps getting worse.

You continue to miss the fact that at least some of the BPL that was demonstrated *does* cause harmful interference. You suggest that the fact that it interferes with amateur radio means nothing whilst you neglect that it *does* interfere with other licensed services (I believe I mentioned channel 2 and 3 television, but there are many more services that it can affect).

It is posts such as yours that seem more intent upon trolling than engaging in meaningful discussion that tend to upset some folks. By trolling I mean that you post with a leading subject line and ignore a lot of facts (as if BPL couldn't cause a problem with other services).

With all due regards,
Jim AA2QA

N2EY:

Well, fire up your crystal-ball and plug-in the CD where I have used an
old and cracked brake line--and right when I am breaking for a poor old
ham at the red light, it fails and I end up guilty of negligence and in a
court rooms... then put down that fictional novel and realize CW just
isn't a big deal, except to ancient hams... time to judge it on its merits
to the hobby, and making it available so that we can have some fresh
personalities to chat with... CW is starting to look like a dodo bird, I
expect in the next decade we will still be seeing it--only in museums...

First off I'm not a "fag" nor do I live in my parent's basment. Next asshole, and I know it will be hard for you to understand with what little to no brains you have, it was my LPTV applications that were dismissed because they were not filed during the filing window. The problem is I had a waiver with all my applications and there is no filing windows for waivers. Waivers can be filed at anytime and the courts have stated repeativly that the FCC MUST CONSIDER WAIVERS. So believe what you and bitches want, the FCC are a bunch of lying assholes. They go to court claiming all a person has to do is apply for a license and ask for a waiver, but those SCUMBAGS AT THE FCC don't consider waivers and as I've stated a BUNCH OF LYING ASSHOLES!!!!!

Jim:

Here is what I think:

1) NO standards have been established.
2) BPL is in a testing phase, we will NOT know anything until this is completed by independent testing laboratories--NOT HAMS--NOT THOSE HOLDING THE LICENSES, PATENTS, MANUFACTURING RIGHTS, ETC, ETC....
3) Amateurs are over-reacting BEFORE data has been had.
4) All will be decided on its merits.
5) Amateur hobbyists may have to tolerate some interference for the benefit of tens or hundreds of millions.
6) I think they would be idiots to tell us exactly what they were working on and details of the methods, freqs and hardware... if they do, why not just give the technology away?

Sorry, that is just how it all looks to me...

Frankly, as I have stated, when BPL hits mhz instead of khz--I think it is unworkable--but I AM NOT even knowledgeable enough to know for sure, I think there are guys there working with BPL which will figure it out just fine without us hobbyists interfering...

What are the byproducts of converting seawater to hydrogen and oxygen?

Hydrogen is seen as some sort of saving angel in the energy issue.
Producing the hydrogen is a bit of a problem though. It takes a lot of
energy to produce it. It has a pretty low volumetric energy density.

Interestingly enough, a gallon of gasoline contains more hydrogen than
a gallon of liquid H2 - it's a great way to store hydrogen.

But to the problem at hand, a somewhat practical method of producing H2
would be to electrolyze it, using Nuc power. The electrolysis plant
would probably be set up near the ocean (let's not even talk of fresh
water production - just ask the folks on the left coast about fresh water)

So now we have an extraction plant that is powered by an unpopular
power source, and has one big nasty polluting byproduct.

Or we can use the other methods of generating H2. Of course, they cause
as much pollution producing the fuel as if we just used the fuel in the
first place.

And I wan't talking about the byproducts of burning Hydrogen. I was talking about the byproducts of producing hydrogen. Specifically making H2 from seawater.....

You don't need to be a treehugger to have a problem with that one.

BPL is proven to interfere with amateur radio services. Proof is
available to anyone who seeks it. The idea that it doesn't is a
political one, such as faith based science ("Toto, I think we lost
Kansas!") global warming (If the world isn't warming up, fine! I'll
accept that. Now tell me *how* the atmosphere is coping with the
greenhouse gas load) and other bafflegab. Give me scientific reasons,
not accuse me of being a liberal or something because I don't agree with
your bad politically motivated science.

Well, yeah Jim! Lets see we have an "anony- mousie" who is pretty good at spouting off. Lot's of opinions, and ridicule to all who might disagree with (him?). Sounds like a major troll to me.

I wonder why Len doesn't have any trouble with this anony-mousie? Seems all the others arouse his ire..... ;^)

Ironic...Coming from a lifeless twit living in mommy and daddy's
basement, bombarding newsgroups with "inventions" and playing junior
disc jockey on the Amateur Bands.

And by the way...I didn't see where "Johnny Johnson" signed an
Amateur callsign to his name or tagline.

> Your one of those pathetic licensed CB operators...(SNIP)

CB doesn't require a license anymore, Toiddie.

> (UNSNIP)...who can get it through their ####ing head that IT'S A HOBBY.

No it's not.

It's a federally regulated radio service that many participate in
AS a hobby.

There are NO radio services in the United States chartered as a
"hobby radio service".

> But no, instead you harass a person because
> simply put, you don't like what that person says or does, your ####ing

> >
> > Nope.
>
> sure seems to be

Nope.

Where?

Cite ONE line of US or Tanzanian law (which he was operating under
at the time) that even REMOTELY suggests it was HIS responsibility to
know the OTHER operators band limits...

> > > Dave does not dispute Brain describtion of the facts, and brian

OK.

SHOW US where that "poor operating practice" was established.

Start by answering the above questions as a test of whether or not
Dave's actions met the test of culpability.

Nope.

With an open mind.

YOU show US where the alleged violation of law on Dave's part
occured, or where this alleged "poor amateur practice" was established.

Dave does not dispute that he Knew they were out of band , that he knew
and choose with disregrard for the law to act is the test of his
culpability.

Your questions do not relate to his culpbility

No one has argued that he was required to know band limits ofr other
hams, merely that he DID know by what ever means, and for whatever
reason

> you are lying again

I'm not lying "again" because I didn't lie in the first place.

> > > I have the proof and carefully in a file
> > >
> > cuting Stevie sexaul libel of His Holiness the pope

Now you're a Catholic...A Pagan Catholic...THAT'S got to hurt.

Huge Snip of Markie rants.

> > > you have boasted of finding a picture of my home in those days here
> > > recently
> > >

> > YOU posted it, Markie. It was on your GeoCities site, along with
> > your picture...
>
> again you are admitting to stalking me since you went looking for it
> and other data for it with no legitimate purpose

Who needs a "legitimate purpose", Markie..?!?!

YOU were the one who tagged it to YOUR newsgroup posts!

If you didn't want anyone to see it, why did YOU post it...?!?!

> > > > > it is a plain and clear threat
> > > > >
> > > > To a delusional paranoid personality, perhaps...
> > > >

> shiref

Well goodie goodie for the "shiref". (Sheriff)

Lotsa Markie self-grandizing stuff there!

More snippage.

Same Markie tit-for-tat ignorance of reality anyway....

> > I'm not the one who thinks that someone is stalking him, trying to
> > kill him over flaming in a newsgroup, and who thinks sexual and
> > societal devaiance is OK.
>
> never said you were trying to kill me only that you were threatening
> to, you are stalking me and your are showing a preverts interest in my
> sexuality

Sure you said I was trying to kill you! Even put it in your
signature line for months as if it were some "apology" for your other
misconduct!

> > > any questioning of the PR of the ARS is a personal attack on you that
> > > is paranois and delusional
> > >
> > No...LYING about Amateur Radio is an attack on licensed Amateurs.
>
> no one has lied about amteur radio, they have expressed different views
> than you agre with

No...Brian has lied. Repeatedly.

Lennie has lied. Repeatedly.

YOU have lied...REPEATEDLY!

> deference in point of view is not falsehood

"Deference" is to yield to the opinions or judgements of others,
Markie.

> expressing disent is the Hallmark of America

No...Hallmark makes gift cards and curios.

> > > it is also a sign of other mental problems
> >
> > Here we go with Dr Markie's diagnosis again...
>
> never claimed to be a dr

But you DO render diagnosis here. As has Brain and Lennie.

I've stated that all of you have abnormal behaviour and need help,
but that's not a diagnosis, just an observation.

> > > > > after all Morse code is not a person, only people can be murdered
> > > > >
> > > > Then why are you accusing me of trying to murder you?
> > >
> > > not even accusing you of that, but of threatening too can't you keep
> > > anything straight?
> >
> > Sure I can.
>
> then do so

But I do!

> > You've allegeded I threatened to kill (murder) you.
>
> and you have threatened to kill me

No, I've not.

That's paranoid delusional behavour.

> > And yes, you've accused me of it.
>
> no I have accsued you of trying I have accused you of threatening to
> murder me

No, you've directly accused me of trying.

Said so in your rants about some alleged phone call to the
Illiopolis PD to "track you down".

> > How is talking to Todd's parents a threat unless he's doing
> > something wrong?
>

> By leing to his perents you certainly might be able to make trouble for
> him

But I don't have to "LIE" to his parents, Markie.

Todd >>IS<< a foul mouthed little punk who's on-line bahaviour got
his only access to broadband ISP service pulled.

Todd DOES violate Part 97 rules and regulations by BROADCASTING
from thier residence, and that could implicate them in a federal crime.

> The same reason I am not pleased at the idea of you telling your lies,
> half truths and distrtions, here in houghton county.

But I wouldn't have to lie, Markie! That's the beauty of the
whole thing! All I have to do is show them YOUR posts and YOUR
admisisons of lying, deceit and deviancy to "make a case".

> If you lie to Todd perants convincingly enough I am sure it could be
> troublesome for him

Again...I wouldn't have to lie to them! All I have to do is show
them copies of HIS on-line behaviour!

> If you lie to the officals here convincingly enough it could
> troublesome for me

But I wouldn't have to lie, Markie! That's the beauty of the
whole thing! All I have to do is show them YOUR posts and YOUR
admisisons of lying, deceit and deviancy to "make a case".

You just don't get it, do you?

People like you and Todd are your OWN worst enemies!

Steve, K4YZ

red herring

He knew in the case cited what the limits were, he choose to assit them
in violating them

No claim has been made that it was his responsility to know, merely
that he know
>

Yes I have you insulting and harrasing means of operating on the USENET
have resulted in more not less of the mataerail you find objectionable

To achieve result directly opposed to the stated goal, is proof of
failure
>

not lying

what is really that simple is the fact you view everything that
disagrees with your preconceived notions a lie

>
> Getting help for your English comprehension and grammar would
> help.

nothing I can do will change the basic fact, that being the facts you
do not accept there is any other view than your own

you mean conform to your standards or else you will continue your
harrassment, that is Blackmail plain and simple

>
> > > > > > > > > And you continue to avoid answering my question..."What makes you

because I choose too

I need NO further reason

>
> > > of mental health case workers or law enforcement if you're "OK",
> > > Markie?
> >
> > asked and answered
>
> Avoided and evaded.

nope answerd and not repeting the answer

indeed the Answer is in the next line from 2 cycles ago but here it is
again"It does not realy concern me other than it could prove anoying"

>
> > > > It does not realy concern me other than it could prove anoying
> > >
> >
> > back to cuting your remarks when you go on your sexaul rants

> Nope. I answered the item directly.

nope you evaded it

you threatened
I called
you posted
I never deined and you expressed shock and outrage

>
> > > And still no "proof" of ANY wrongdoing, Markie.

sure is

you threaten to do something unpleasent if I don't do as you demand
that is blackmail

cuting setvie imporper medical statement

> > > > > > why do you need everything repeated and again and agian
> > > > >

>
> But you DO render diagnosis here. As has Brain and Lennie.

yes as do you

I have the same previledge as YOU

But you Falsely claim you have the Degree and License to back it up

cuting more lies by stevie

> > > > > > after all Morse code is not a person, only people can be murdered
> > > > > >
> > > > > Then why are you accusing me of trying to murder you?

>
> But I do!

nope

quote

> after all Morse code is not a person, only people can be murdered

Then why are you accusing me of trying to murder you?

unquote

clearly shows that you are keeping your lies straight

>
> > > You've allegeded I threatened to kill (murder) you.
> >
> > and you have threatened to kill me
>
> No, I've not.
sure have

simple truth

your words, your threat, your respoiblity
>
> That's paranoid delusional behavour.
>
> > > And yes, you've accused me of it.
> >
> > no I have accsued you of trying I have accused you of threatening to

>
> No, you've directly accused me of trying.

nope

more distortion

>
> Said so in your rants about some alleged phone call to the
> Illiopolis PD to "track you down".

nope

said someone seemed to a trying, or trying to make me think your were
trying

I also said is was most likely the poster known as MD or Mad Dog, but
that I did not exclude you as a possiblity

>

> But I don't have to "LIE" to his parents, Markie.

you sure do

you have to lie all the time on here

no evidence that are cappable of telling the truth or even of knowing
what it is

cuting your libel of someone else

> > The same reason I am not pleased at the idea of you telling your lies,
> > half truths and distrtions, here in houghton county.
>

I said "Lies, half truths and distortions", and none of them concern
any possible matter of local ordenance of Houghton county.

It is not a crime to lie to bullies and bigots like you

>
> > If you lie to Todd perants convincingly enough I am sure it could be
> > troublesome for him
>
> Again...I wouldn't have to lie to them! All I have to do is show
> them copies of HIS on-line behaviour!

you don't know the truth

as is eveidenced by tyour statement that you are going to "show them"
over a phone line

>
> > If you lie to the officals here convincingly enough it could

Steve there something I have missed in your threats to call Houghton county

Just what crime are you aleging I am comiting, that falls within their perview?

Being Bisexual is not a crime in Michigan.

Being pagan is not a crime in Michigan

Lying when not under oath is not a crime in Michigan

Believing that honesty is not always a good idea is not crime in Michigan

# 1263. Re: An Answer For Markie

I didn't say you've commited a crime, Markie.

> Being Bisexual is not a crime in Michigan.

Nope.

> Being pagan is not a crime in Michigan

Nope.

> Lying when not under oath is not a crime in Michigan

In some cases it is. Misrepresenting yourself to be a
Commissioned Officer of the United States other than for legitimate
cinematic or other valid theatrical purposes, under oath or otherwise,
is illegal.

> Believing that honesty is not always a good idea is not crime in
> Michigan

Nope. But it's stupid praactice. Nothing good ever comes of it.

It's your paranoid delusional conduct that is manifest in some
aspects of the items you cited.

You're not stable. You present a danger to society and yourself.

Rational people do not promote overt mistruthfulness.

Rational people do not make unfounded allegations of stalking or
blackmailing.

Rational people do not overtly suggest that teaching children to
lie and deceive is acceptable societal behaviour.

Clear enough?

Steve, K4YZ

Here's the short answer.

Dave is responsible for proper operation of >his own< station within the bounds of the regulations of his country.

The French guys are responsible for the proper operation of >their own< stations within the bounds of the regulations of their country.

Their is no reciprocal responsibility.

Next case, please.

You really are an ignorant fuckwit, aren't you, fake pilot's
licence boy?

Hydrogen can be produced using a variety of energy sources
including nuclear, fossil resources such as coal, natural gas,
and petroleum, and renewable resources such as biomass,
sunlight, wind, hydropower, and geothermal. Researchers are
developing a wide range of technologies for producing and
delivering hydrogen economically and in an environmentally
friendly way. The DOE is funding activities in the following
areas:

Solar Electrochemical Water Splitting (Photoelectrochemical)-
Photoelectrochemical hydrogen production systems integrate a
semiconducting material and a water electrolyzer into a single
monolithic device, to produce hydrogen directly from water,
using light as the only energy input. Simple in concept, the
challenge is to find a material that can drive this one-step
process. Two basic criteria must be met-the light harvesting
system must have suitable energetics to drive the electrolysis
reaction and the system must be stable and durable in an
aqueous/electrolyte environment. Materials and components now in
development build on the multijunction cell technology developed
by the photovoltaic industry over the last 25 years. A variety
of surface treatments are also being evaluated to address
energetics requirements and corrosion. New catalysts for the
water-splitting reactions are being designed. Research is
underway to identify efficient, low cost materials and systems
that are durable and stable in an aqueous environment.

Solar and Nuclear Thermochemical Water Splitting -
Concentrated solar energy can be used to generate temperatures
of several hundred to over 2,000 degrees Celsius at which

thermochemical reaction cycles can be used to produce hydrogen from water (nuclear energy can also supply the needed high-temperature heat). These multi-step thermochemical cycles offer potentially attractive paths for generating hydrogen. Current R&D efforts are focused on understanding the kinetics and mechanisms of high-temperature chemical reactions and optimizing solar thermal reactor design concepts. Increased understanding of the underlying chemical mechanisms and advancements in technology could eventually lead to practical direct, high-temperature water-splitting processes.

Solar Biological using Microorganisms-
Certain photosynthetic microbes—green algae and cyanobacteria—produce hydrogen from water in their metabolic activities using light energy. In these photobiological systems, arrays of light-capturing antenna chlorophyll (Chl) molecules absorb sunlight, electron transport components convert light into chemical energy, and enzymes catalyze the dissociation of water to generate hydrogen and oxygen. Photobiological technology holds great promise, but because oxygen is produced along with the hydrogen, the technology must overcome the limitation of oxygen sensitivity in enzyme systems. In addition, the hydrogen production rate from photosynthetic microorganisms is currently too low for commercial viability. Furthermore, under bright sunlight, Chl antenna absorb much more light than can be utilized, resulting in the loss of up to 80% of the absorbed light. Researchers are addressing these issues by screening for naturally occurring organisms that are more tolerant of oxygen, creating new genetic forms of organisms that can sustain hydrogen production in the presence of oxygen, and increasing the light absorption and conversion efficiency of the microorganism. Long-term R&D efforts will be required to fully understand and develop photobiological hydrogen production technologies.

Small Scale Natural Gas and Bio-Derived Liquid Reformers-
Most of the hydrogen used in the U.S. today is produced by steam reforming of natural gas in large centralized reformers. A network of small scale distributed production facilities may offer a viable approach for introducing hydrogen as an energy carrier. Distributed production requires less capital investment for the smaller volume of hydrogen needed initially and does not require a substantial hydrogen transport and delivery infrastructure. One option now under investigation is the use of small-scale (i.e., 100 - 1,500 kg/day or 20 to 300 cars per day) distributed reformers that can produce hydrogen from natural gas or biomass-derived liquid fuels at the point of use, i.e., refueling stations and stationary power facilities. Bio-derived liquids include ethanol, sugar alcohols, and "bio-oil". Bio-oils are produced from biomass resources—agricultural residues,

consumer wastes, or biomass specifically grown for energy uses via fermentation, gasification, or pyrolysis conversion processes. The reforming technology used to convert bio-derived liquids to hydrogen builds on the commercial processes used to reform natural gas today. Key research issues are to increase the efficiency and decrease the cost of hydrogen production. In particular, research is needed for better heat integration, durable and active reforming catalysts, efficient purification technology, efficient and low cost single-stage water-gas shift reactor technology, and other unit operation integration.

Electrolyzers-
Electrolyzers are another approach for producing hydrogen either at large central facilities or distributed at the point of use. An electrolyzer uses electricity to separate or split water into its components hydrogen and oxygen. Today, two types of electrolyzers are used for the commercial production of high-purity hydrogen alkaline and proton exchange membrane (PEM). But these approaches cannot currently compete, on an economic basis, with hydrogen produced by natural gas steam reforming. Reduced capital cost and increased system efficiency of electrolyzer systems will be required to be commercially viable. Advanced electrolyzers designed to operate at high pressure and at high temperature could make these systems more cost-effective by eliminating the need for a compressor and reducing the electricity required to drive the electrolysis process. Integrated co-production of electricity and hydrogen from wind turbines and other renewable resources also offers some promising opportunities for improving the efficiency and economics of renewable hydrogen production using electrolysis.

Biomass and Hydrocarbon Gas Separation Technologies-
Thermochemical conversion processes produce hydrogen from hydrocarbon and biomass-derived gases. There is a need to separate the hydrogen from other gases and purify the hydrogen as part of these thermochemical conversion processes. Advanced separation technologies are being researched to reduce cost and to increase efficiency. Significant cost reductions can be achieved by combining separation and chemical reaction processes thereby eliminating process steps and their associated capital and operating costs. Research efforts are being conducted to develop more durable separation materials with reduced system capital cost.

> >
> > No...Brian has lied. Repeatedly.
>
> name one and prove it, with real evidence

Sure.

Brain has insisted that "unlicensed communications devices play a
major role in emergency communications planning".

Are they USED..?!?! Of course. We even use them in CAP.

Are they a part of PLANNING or play a "MAJOR" role?

Absolutely not.

You may refer to any of Brain's evasions on the subject.

We can even refer to his "ARES overblown" comments, his assertions that ARES cannot respond to major incidents due to over-extension of member's obligations, or his assertions about the validity of his Somalia HF operations.

> > Lennie has lied. Repeatedly.
>
> nope

Yep.

> > YOU have lied...REPEATEDLY!
>
> at times yes
>
> never denied it

Well there you have it.

Now...

Having been ACCUSED of being a liar...

Having been PROVEN a liar...

And having been ADMITTED a liar...

Just how do you expect ANYone to have even the least little bit of respect or acceptance of ANY of your posts, even where the content IS reasonably valid...?!?!

> > > deference in point of view is not falsehood
> >
> cuting stevie paying speling cop again

"Deference" is yielding to the opinion or judgement of another.

That wasn't about "spelling" cop, Markie.

It was about how stupid YOUR comment looked with that word (even though it was an unintentional application of a REAL word) in it.

I see you STILL didn't get the point.

> > > > Here we go with Dr Markie's diagnosis again...
> > >
> > > never claimed to be a dr
> >
> > But you DO render diagnosis here. As has Brain and Lennie.
>
> yes as do you

Nope. I've said you exhibit abnormal BEHAVIOUR that fits certain patterns.

YOU, on the otherhand, have specifically expressed a diagnosis, as has Brain.

> I have the same previledge as YOU

No, you don't...On several levels...

> But you Falsely claim you have the Degree and License to back it up

I never said I ahve the degree, albeit I DO have the license.

More bandwidth snippage of usual Markie tit-for-tat.

> > Said so in your rants about some alleged phone call to the

>
> It is not a crime to lie to bullies and bigots like you

But it is a matter of public trust to make them aware that a
potentially unstable person in sin thier midst.

And you do meet that criteria.

I don't have to make an accusation. Just express my concerns.

You've already acknowledged that you have been in the mental
health system and your conduct here manifests certain personality
dysfunctions.

You bear watching.

> > > If you lie to Todd perants convincingly enough I am sure it could be

> more threats stevie

Nope.

> geting old and tiresome

Yes, you are.

Anything happening here is a direct result of your own silliness,
Markie.

> > You just don't get it, do you?
>
> no you don't get it
>

> You are a betrayer of the nation you swore to serve.

Nope.

And no where in my USMC oath did I say that by swearing to uphold
the Constitution of the United States that I relinquished my OWN rights
to express my own opinions, nor to allow lying, deceitful worms to go
on lying and deceiving uncontested.

> You are a loathsome foul minded creep

Nope. You just think so becasue I won't leave you to lie
uncontested.

> > People like you and Todd are your OWN worst enemies!
>
> another lie stevie

Nope.

Proven.

Archived.

> > Interference that did not stop at the ends of the amateur bands.

He and the ARRL staff have produced detailed reports based on
observations and
measurements as well as simulations and models.

He's also gone around the country banging the drum about BPL. W3RV got
him to come to Philly and do his presentation here, to a packed house.
I had the pleasure of metting Ed and seeing the presentation.

BPL has one and only one selling point: If you have BPL service, you
can plug your computer into any power outlet in your house - or your
neighbor's house, if it's served - and get a highspeed connection. It's
a 'last mile' delivery system, nothing more.

> > I have not seen W1RFI post in quite some time. I suspect he is tired of the
> > tirades of some uninformed individuals as well as promises of some as to how
> > advantageous certain unlicensed bands are. Not that information was
> > incorrect, just that much was omitted.

He's also busy as all get-out. Plus too many folks assume that since he
works at Hq., that he must march lockstep with ARRL policy. That's not
the case at all,
but after a while it's clear that some folks are immune to certain
facts.

> > A lot of good folks have left this group as the bickering keeps getting
> > worse.

Naw, the bickering has always been here. You can find posts five and
more years
old - from both sides - that look the same as today's. WA6VSE used to
among the worst - then he mellowed and became quite well mannered even
if you disagree with him totally. I think the change was due to his
upgrading to Extra and getting a vanity call....;-)

> > You continue to miss the fact that at least some of the BPL that was

Shall I tell the lightbulb joke again?

> > It is posts such as yours that seem more intent upon trolling than engaging
> > in meaningful discussion that tend to upset some folks. By trolling I mean
> > that you post with a leading subject line and ignore a lot of facts (as if
> > BPL couldn't cause a problem with other services).

Better yet, there's the technique of tossing in stuff that's provably
wrong. Like
misquotes of what people wrote, errors of fact, etc.

> Well, yeah Jim! Lets see we have an "anony- mousie" who is pretty good
> at spouting off. Lot's of opinions, and ridicule to all who might
> disagree with (him?). Sounds like a major troll to me.

Please don't feed the trolls.

> I wonder why Len doesn't have any trouble with this anony-mousie? Seems
> all the others arouse his ire..... ;^)

Because he's against the code test, against the ARRL, against
conventional ham radio, and because he *never* disagrees with Len.

All anyone has to do is disagree with Len, and they get the treatment.
Worse,
if the actually prove him wrong about something (like whether it's
legal to
operate with an expired-but-in-the-grace-period license) he really goes
ballistic. So predictable it's not worth bothering about.

What's "amatuer" law?????

Most "amateurs" know that they are responsible for proper
operation of their station.

Michael Coslo wrote:
>
> What are the byproducts of converting seawater to hydrogen and oxygen?

Mostly salt.

> Hydrogen is seen as some sort of saving angel in the energy issue.
> Producing the hydrogen is a bit of a problem though. It takes a lot of
> energy to produce it. It has a pretty low volumetric energy density.

Which means it is compressed and your fuel tank becomes a highpressure
canister. Not only is the stuff flammable, like gasoline, but it's
under high
pressure.

Two ways to go boom.

> But to the problem at hand, a somewhat practical method of producing H2
> would be to electrolyze it, using Nuc power. The electrolysis plant
> would probably be set up near the ocean (let's not even talk of fresh

> power source, and has one big nasty polluting byproduct.
>
> Or we can use the other methods of generating H2. Of course, they cause
> as much pollution producing the fuel as if we just used the fuel in the
> first place.

Maybe. There are all sorts of possible technologies to extract,
transport and store hydrogen. For example, there's work being done to
store the gas in metal hydrides. It could be extracted by using
electricity made photovoltaically. Etc.

The big question is whether such processes can be made economically
competitive. How much will a hydrogen car cost? How much will they cost
to drive per mile? What are the maintenance costs?

The big problem is that there's probably no single magic long-term
solution. Rather there are a bunch of small solutions that add up.

Here's two favorites of mine:

Imagine a tall (couple of hundred feet) hollow tower, in the desert. A
vertical pipe, as it were, with holes around the bottom.

Around its base is a large circular greenhouse whose roof slants toward
the tower.

When the sun is out, the air under the greenhouse roof is heated, and rises. This creates an artificial wind towards the tower. The warmed air goes up the tower, which contains a wind-driven generator. Works whether or not there is a breeze. The generator and its impeller are near ground level. Etc.

also

There's a process called TDP (Thermal Depolymerization Process) that can supposedly break down various types of waste into fuel oil, gas and other usable products. For example, there's a pilot plant here in Philadelphia that takes sewage sludge (ugh) and breaks it down into a type of fuel oil, methane gas, water, and some other things that are usable as fertilizer. The result is also
sterilized.

Another plant in Carthage, MO, takes the waste from a turkey-processing plant and extracts oil, gas and some other products from it.

The company claims that many other feedstocks can be used. Old tires, a chronic disposal problem, can allegedly be broken down into oil, gas, steel, fiberglass and carbon black.

The process supposedly uses 15% of the product to run itself.

Of course the above pilot plants produce fuel at the rate of a few hundred barrels a day.

It's doubtful that either of the above will solve all our energy problems. It's also unclear as to whether they are economically feasible on a large scale.

But if they are doable, they can sure help. In the case of TDP, a big part of
the waste-disposal problem can be dealt with.

absolute truth

Phones are unlicensed and seeking to maintian them is plays major role
in emergency communications planning.

Maintianing Lan links another unlicensed service play a major role in
emergency communications planning
>
> Are they USED..?!?! Of course. We even use them in CAP.

>
> Are they a part of PLANNING or play a "MAJOR" role?
>
> Absolutely not.

Bullshit

Fema uses Phone system and the internet in making their plans

therefore they are part of the planning of emergency comms.
>
> You may refer to any of Brain's evasions on the subject.

I need not

you are simply wrong,

>
> We can even refer to his "ARES overblown" comments,

True statement

<cut>his assertions

She shares you with a guy?

You and Markie DO have a lot in common!Q

But I am certain they've had plenty of opportunity to see your
other comments in other forums.

> > That they denied your license was in the best public interest on
> >soooooo many levels.
>
> Well stebie, I know for a fact that you butt buddies (FCC) didn't even
> look at my application. try again

First of all, other than speaking with Phil Kane in this forum, I
don't have ANY kind of "buddies" at the FCC.

Secondly, how do you know they didn't "look" at your application?

In order to have dismissed it as being out of the filing window,
they had to know when it was filed.

Maybe Carnac the Magnificent read it through the envelope?

> > And again, I bet they DID consider your license AND waiver, and
> >then came to the conclusion that all of us here have...That you're a

> >with the public interest.
>
> Which raises the question how you got a ham license?

It certainly wasn't by calling the FCC names in public forums, nor
was it submitting an application in crayon with "GIMME MY ####ING
LICENSE YOU MOTHER####ING ###HOLES" written on it.

> a picece of
> pondscum low life who sits on a newsgroup spreading his lies, harassing
> people and threatening them

I haven't lied, nor have I harrassed or threatened anyone.

You, on the otherhand, have threatened numerous lawsuits, acutally
threatened violence (Markie would be embarrassed...) used gross
profanity, defamed a deceased child, and otherwise have acted
irrationally and irresponsibly.

Not to mention your "inventions" were some of the silliest and
most idiotic concepts to hit the wire!

And you don't know what you're talking about.

Todd's 37.

Todd lives with mommy and daddy.

Todd's gay.

It's not libel if it's true.

Jim:

I don't see the problem as "my being a troll", I see at as anyone you can't shout down. chase away and disagrees with you, "is your definition of a troll", well so be it, others may decide for themselves... you all look like the child who "called wolf" all the time--you have now confused everyone and they are unable to tell a real troll from someone who disagrees with you--childish tactics at best...

N2EY:

From my experience here and on the bands, it is obvious the MAJOR MAJORITY
of hams are vastly behind the times, I think your small group here, and
your "net buddies" are all in agreement, I am also quite sure that hams
fearful of what they don't understand are going around crying "wolf."

You won't find any in the computer industry with these strange and bizarre
views you guys have here...

Course, everyone knows, a "hobby amateur license" makes hams some kinda
"damn authority", unfortunately, one which makes up the truth... who was
that newscaster who got fired for doing that?

Jim:

First of all, compaction is MUCH more important than bandwidth, with out data compaction you would shortly be out of bandwidth...

First of all, binary trees is one super method of compacting data... if you understand the simple concept of binary trees, and especially in relationship to data compaction, much of this "I can't believe it!" will quickly disappear. Indeed, your head should become filled with "what if?" and you will start trying to figure out ways to do it yourself, wondering why you didn't do it before!

This will probably lead you to homebrewing a couple of hardware devices and experimenting with a friend... and, a good starting place just happens to be those "junk" discarded "USRobotics Courier Modems" everyone seems to think is a joke... there is better equip but my access to state of the art equip is rather limited for experimenting, but I do hunt electronics surplus dealers with a keen eye... ya never know what might just be in the next box in the corner...

It's not about getting you to stop posting.

It's about getting you help for your deviancy and character
issues.

> > What "failure"...?!?!
> >
> > complete failure

What failure?

SNIP

> > That you keep making false accusations ie:
> > bully/stalker/blackmailer is MY proof that YOU are the bully...
> >

> support so I know) is all you can mange

No, that's not all I can "mange".

And you no doubt "know" since I am willing to bet that since they
took your case on, they've had to significantly increase thier budget.

> if you think otherwise please call, want me to look up the Numbers for
> you? I'd rather you dropped this harrasment but since you will not I'd

"Gamester", Mark, and neither is true.

> > You wouldn't know PROPER medical statements if you were hit in the
> > head with a Mosby Medical Dictionary, Markie.
>

> More threats? or just more evasion? or just another lie

Congratulations. You got a capital letter in there along with a
proper question mark. The second "sentence" had proper punctuation,
but no capital. And on the third you just lapsed back into Markism.

> > > > > again you are admitting to stalking me since you went looking for it

>
> with a net search like when you went looking in other newsgruops for
> dirt finding out I in other newsgruops, that I was Bisexual

Nope.

Your tag line.

And any revelation as to your deviancy was at your own hand. Not
mine.

> > > > No...Brian has lied. Repeatedly.
> > >

>
> absolute truth
>
> Phones are unlicensed and seeking to maintian them is plays major role
> in emergency communications planning.

Nope.

Cellphones ARE licensed devices.

> Maintianing Lan links another unlicensed service play a major role in
> emergency communications planning

And most LAN's in FEMA facilities are hardline systems to avoid
EMP interruption.

> > Are they USED..?!?! Of course. We even use them in CAP.
>
> > Are they a part of PLANNING or play a "MAJOR" role?
> >
> > Absolutely not.
>
> Bull#####
>
> Fema uses Phone system and the internet in making their plans

But are not a part of major disaster plans.

MOST disaster plans assume the worst and establish the hierarchy
of fall-back communications protocols in case of infrastructure
failure.

The availability of the landlines and Internet access are assumed
a "given" in less-than-disaster" scenarios.

> therefore they are part of the planning of emergency comms.

Markie...enlighten us as to which programs of emergency planning
YOU are a participant?

> > You may refer to any of Brain's evasions on the subject.
>
> I need not

Sure you do.

You accuse me of making this stuff up yet there it is under his
hand in these archives.

> you are simply wrong

You're simply a coward and an idiot.

> > We can even refer to his "ARES overblown" comments,
>
> True statement

Not true.

Numerous governmental and private agencies attest otherwise.

> <cut>his assertions
> > that ARES cannot respond to major incidents due to over-extension of
>
> looks ok to me

Looks OK to you because you're an ill-informed idiot. But no news
there.

> > member's obligations, or his assertions about the validity of his
> > Somalia HF operations.
>

> nothing proven there

Sure there is.

His lack of evidence as to the validity of his operation and the
availabilty of UN resources that specify what constitues authority to
operate a radio station within UN jurisdiction.

> Still waiting for something
> >
> > > > Lennie has lied. Repeatedly.
> > >
> > > nope
> >
> > Yep.

> > reasonably valid...?!?!
>
> becuase I lie only about where you can find me

I know where you are.

And that's NOT your only lie....by a long shot.

> that simple
>
> A different tack than an Anomy like Smith and yet he is taken seriously
> too

SO far he's not published anything that isn't (1) understood to be opinion or (2) not been corroborated by other sources. Nor does he use profanity or make assinine assertions easily disproven by third party sources.

> > > > > deference in point of view is not falsehood
> > > cuting stevie paying speling cop again
> recuting spelling cop

Putting it back.

"Deference" is STILL yielding to an other opinion.

You STILL don't get the impact of how stupid you made yourself look..Something that would NOT happen if you'd address your English comprehension issues.

> > YOU, on the otherhand, have specifically expressed a diagnosis, as
> > has Brain.
>
> you have as well pathologcal liar
>
> what you can do I can do

But you ARE a pathological liar, Markie.

We have YOUR word that it's OK to lie ad lib.

> > > I have the same previledge as YOU
> >
> > No, you don't...On several levels...
>
> sure do

Nope. Can start with Amateur Radio licensure, then add Nursing and EMS certifications. Then we can add on all the supplemental certifications such as ACLS, PALS, EMS-C, BCLS-I, etc.

> > > But you Falsely claim you have the Degree and License to back it up
> >
> > I never said I have the degree, albeit I DO have the license.

> > >
> > > cuting your libel of someone else
> >
> > No libel was posted by me, ergo you've lied again.
>
> you sure did
>
> you accused Todd of a federal crime that IS libel

Nope.

Todd admitted that he's flying a TEAM HiMAX ultralight in
violation of federal regulations as to the proper configuration of the
Part 103 Aircraft.

His words.

It's not libel if it's true.

> > > > > The same reason I am not pleased at the idea of you telling your lies,

> > > > you don't know the truth
> > >
> > > Sure I do.
> >
> > then start typing it

I have been.

You refuse to accept it.

Not my issue.

> > > as is eveidenced by tyour statement that you are going to "show them"
> > > over a phone line
> > >

> > I didn't say I WAS going to show anyone anything...
>
> yes you did, "Nope. Just show them copies of his public postings."
>
> another lie

Nope. There's more than ONE way to "show" somebody something.

For example I show everyone what an idiot you are just by rubbing
your nose in your idiotic rantings herein...I don't have to actually
show up on thier doorstep to do it...

> > > > > If you lie to the officals here convincingly enough it could
> > > > > troublesome for me
> > > > >
> > > > > But I wouldn't have to lie, Markie! That's the beauty of the

Again you are LYING.

Overtly.

> > > You are a loathsome foul minded creep
> >
> > Nope. You just think so becasue I won't leave you to lie
> > uncontested.
>
> Lie

Truth.

> I think so becuase you are foul minded, and a control freak, a
> frustrated one

Well...at least you got a capital at the beginning of THAT rant,
Markie. Structure and punctuation were incorrect, as usual.

> > > > People like you and Todd are your OWN worst enemies!
> > >
> > > another lie stevie
> >
> > Nope.
> >
> > Proven.
>
> nope you are the enemy

Nope.

If I were your "enemy", there'd be no discussions.

Lying is not acceptable, period.

There are alternatives...such as just NOT telling someone who or
where you are in the first place.

> > Clear enough?
>
> maeing you are lying of course you are lcrea enough

"maeing" "lcrea"

Nope. You asked me a question. I answered it directly.

Whether or not you like or agree with the answers is irrelevent.

# 1287. Re: chuck the shuttle, we need an alternative fuel source

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-11 18:51:01 UTC
From: John Smith <assemblywizard@gmail.com>
Message-ID: <pan.2005.08.11.18.50.59.226618@gmail.com>
Source record: 115638

N2EY:

As far as the danger of hydrogen, it is safer than gasoline, in an accident--hydrogen being lighter than air heads for the far upper atmosphere, gasoline lays around you burning (really bad if you are trapped in the vehicle.)

In a hydrogen explosion more energy is directed upwards, in the direction of the hydrogen itself, with gasoline the energy is expended outwards towards people and property... hydrogens danger from a "spill" quickly disappears, gasoline/diesel stays there a long time...

Gasoline/diesel is toxic and is devastating to the environment, hydrogen is almost benign (but large scale use would have to evolve to truly know the real consequences.)

Danger is not a good reason to skip hydrogens use, propane is much more dangerous than hydrogen and used inside buildings on forklifts and other industrial equipment (even some city buses (and natural gas too) and other vehicles.)

Hydrogen is a scam at this point in time, I think it always will be, when you finally have enough energy to remove hydrogen from sea water--why bother, the energy can already be used! But, if some alchemist discovers a way to remove it from sea water with little or no energy, GREAT!

But, even hybrid vehicles are mostly a scam at this point, you are wearing out two different systems, maintaining them, with all the related use of energy to do so. And, this ignores the the manufacturing expenditure of energy which occurs in making the extra electrical components for the vehicle. It is mainly a "feels good campaign" used by politicians to soothe the people, and manufacturing for "gov't pork money." It looks to me a lot like putting props on jet aircraft...

Today's Scorecard in the NCTA v. PCTA Amateur Championships!

As of midnight EDT on 10 Aug 05, WT Docket 05-235
Comments on Test Element 1 Elimination/Retention are:

Total 1367

Indeterminate/duplicates (note 1) 56

Unambiguously Against NPRM (note 2) 376 28.68%
Unambiguously For NPRM (note 3) 758 57.82%
Code test ONLY for Extras (note 4) 177 13.50%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, individuals not understanding the
scope and purpose of the NPRM, and one foreign citizen
submission.

2. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

3. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
midnight of 10 Aug 05 that sub-total would be 1311.

10 August 2005 is the 16th day of submitted Comments. A notice
about FCC 05-143 or Docket WT 05-235 has NOT YET BEEN MADE in
the Federal Register so it is unknown if these 15 days of Comments
will be accepted by the Commission for decision on any Report and
Order. Note: The Federal Register 2005 Contents page on the GPO
website has NOT had any entry for 9 Aug 05 or later as of 3 PM EDT
on 11 Aug 05.

Stay tuned...the future of U.S. amateur radio is being made,
like it or not.

... sorry, the post above is mis-placed, I hope he is able to find it!
<grin>

... don't fret, I do that all the time--make mistakes, no reason to point
it out, I already am aware of it and working on the problem--problem is,
alzheimers is on the way and most likely defeat the efforts of a lifetime.
<frown>

No MD or MSSW that is what count

By I have a ham license too, nothing in it pretains you make medical
judgements

as to class of licesne wait a few months

>
> > > > But you Falsely claim you have the Degree and License to back it up

becuase I choose to

>
> You "remember" someone's alleged nickname, but then can't recall
> who it is...?!?!

No I don't recall his name, and I have granted that you may well be
right, and that I have no intention of argueing with you about what his
name was

and still you bitch and moan

>
> > > He was never known by anyone as "Mad Dog".
> >
> > He posted with the name
> >
> > and I knew him as Mad Dog
> >
> > therfore your statement anyone is another lie
>
> Nope.

yep

I am someone therefore your statement inclduing anyone is a lis

>
> > > > > > > How is talking to Todd's parents a threat unless he's doing

> > "blaming"
> >
> > Nope. Just the one responsible.

put up or shut up. either I am a danger and can be locked up or not, in
the latter case you have been lying in claiming I am, in the former you
are endangering the public by not acting.

>
> > nothing is stevies doing
> >
> > I'm not the one lying here, Markie.

NO YOU FUCKING COCKING BITCHWHORE BECAUSE YOU FUCKING BASTARD CAN'T GET IT THROUG YOUR FUCKING RETARDED HEAD THAT I'M NOT FUCKING GAY.

> But I am certain they've had plenty of opportunity to see your
>other comments in other forums.

So, if there were here I would tell them exacally what I think of those lying Cocksucking assholes known as the FCC!!!

>First of all, other than speaking with Phil Kane in this forum, I
>don't have ANY kind of "buddies" at the FCC.
> Secondly, how do you know they didn't "look" at your application?

>In order to have dismissed it as being out of the filing window,
>they had to know when it was filed.
>Maybe Carnac the Magnificent read it through the envelope?

A waiver must either granted or denied, if it is denied the FCC must in writing explain why it was denied. All facts and finding must be shown so the applicant if he waiver is denied can file in the US Court of Appeal. there is a BIG difference between a dissmal and a denial. When I file the application in the mail on one day and three day's later it returned well, you get the hint. The MASS MEDIA section of the FCC has had a long history of not looking at waivers. for example between 1978 to 2000 there was a ban on low power FM however the FCC repeatly stated that a person can apply for a license and ask for a waiver. In the 22 years of the ban only 2 waivers were ever consider for low power FM, and that was after the US Court of Appeal told the FCC to consider them.

> It certainly wasn't by calling the FCC names in public forums, nor
>was it submitting an application in crayon with "GIMME MY ####ING
>LICENSE YOU MOTHER####ING ###HOLES" written on it.

First off dickhead I didn't put that on the application secondly I became very opinionated about the FCC LONG AFTER I HAD APPLIED FOR A LOW POWER TV LICENSE.

The infrastructure would be interesting. The best looking way for
hydride storage that I've heard of so far, is the replacement tank

method. Interesting, and I suspect that teh real quick stop for fuel
would become a thing of the past.

> The big question is whether such processes can be made economically

Maintenance would *probably* be improved. I suspect that engines would
last longer, and be a lot cleaner to be around.

Good process, and an old one. A lot of places in the middle east use
those type of towers (usually lower) to bring cooling air into the house.

> also

Nope.

Brian P Burke evades answering the questions because the greater
truth of thier answers lays bare the fallicy of his claims against
Dave.

YOU answered the questions and the answers were as they should
be...However YOU were not the one making the claim.

Ergo YOUR previous suggestion that Brain's silence on your
comments were tacit approval or agreement with them means that he has
acknowledged that he doesn't have a leg to stand on...

As everyone else except you and he seems to know.

Steve, K4YZ

SHOW US WHERE DAVE WAS REQUIRED TO KNOW THE AUTHORIZED OPERATING
PARAMETERS OF THE OTHER STATION!~

FCC regulation? Tanzanian? French? Lower Slobovian?
ANYone...?!?!

> Once Dave knows they are not allowed he isn't allowed to talk to them

WHO SAID...?!?!

Where is it stated that Dave cannot radiate a signal on a band
that he IS allowed to operate on REGARDLESS if the other fellow
isn't...?!?!

> (that is the rules, myself Id bend them to point of telling they are of
> band and if they want to know what frequency they are on, a few things

There's nothing to bend.

There's either a rule or there isn't.

And in this case, THERE ISN'T.

> > The French guys are responsible for the proper operation of >their own< stations

What crime?

WHERE DID DAVE COMMIT A CRIME?

Please cite appropriate American or Tanzanian regulation as proof.

Steve, K4YZ

The plug into the outlet thing is kind of a day late and a dollar short
IMO. My desktop computers are plugged into the walls, but all of the
family laptops are wireless. So it might be a hard sell to tell someone
that they will just have to plug into the wall socket to get their
internet, when they now don't have to connect to anything!

AT THE TIME, did he know?

From what >>I<< have read, he didn't know until AFTER THE FACT.

> I have already agreed that he was not required to know, but once he
> knows he is responible for his actions with that knowledge

And it still does not answer the question, WHAT REGULATION
PROHIBITS HIM FROM TRANSMITTING ON A BAND >>HE<< IS ALLOWED TO OPERATE
ON???

> > > Once Dave knows they are not allowed he isn't allowed to talk to them
> > >

No, you've not. You've only said "Because I say so".

CITE A SPECIFIC RULE.

Steve, K4YZ

PS: You're the one in the "Put Up Or Shut Up" seat, Markie.

Poor Lardass, always gets it wrong every time.

Hey Lardass, how do you feel about your life coming out in a
film this month - "The 40-Year-Old VIRGIN"
BWHAHAHAHAHAHAHAHAHAHAHAHA..And, did you find a new menial labor
job yet, since that's all you are qualified to do.

Think of Laura, Lardass...BWHAHAHAHAHAHAHA!!!!!!!!

Michael:

Chlorine and sodium a BIG problem? The temperatures involved in
separating the base elements, sodium and chlorine, from sea water are not
found during the extraction of hydrogen and oxygen. Indeed, you would
have to take the salt byproduct (sodium chloride) and melt it using
carbon-graphite electrodes and ending up with chlorine gas and the sodium
metal.

What, now we must suffer your pseudo-science in chemistry? Having you
generate further false "facts?" And, forcing me into the part of a
"troll" as I attempt to correct falsehoods being perpetrated on those
challenged in the knowledge of chemistry?

John

John I think you are blowing this one, not a biologist but as I recal
from dim memeroies of a class I was bored to nearly to tears by we are
a salty (baring over eating on salt) as the oceans were somewhere about
the Cambrian (gelolgical people think in such timelines about 650M if
memeroy serves) and the ocean is slwoly getting slatier over time (as
an average gets saltier in age ages and less salt in between but the
trend line is up

Hmmm, challenges to "false knowledge" from yesterday and new knowledge
sometimes come from unexpected sources, I stand corrected... you will
have me paying a bit more attention to your words and much less to your
spelling and imperfect grammar from this point forth!

Thank you, I had honestly picked that "knowledge" up and had helped
perpetrate that myth for years! I am guilty of the crime! I will now
spend the rest of my life fighting that falsehood in an attempt to repent...

Yea always been more evolved than some hanging arround here.

but then I never realy saw the conflict between eveolution and even the
Bible, In the bible they just step WAAAYYYY back and gives a big
picture,

Faith is faith, sicence is science

As a ham operator for over 50 years, I am apalled at the lack of
civility in this newsgroup. It's a shame there can't be serious
discussions of radio.amateur.policy without resorting to the "lowest
common denominator" rhetoric.

BPL will benefit no one. In the markets large enough for it to have a chance of flying, consumers already have a choice among several competing technologies (phone, DSL, cable, WI-FI, and satellite), some of which are better than BPL.

To compete, it will have to be as cheap as phone and as fast as cable. Won't happen. To cover operating costs, it will cost in the same range per month as DSL or cable with NO advantages and several disadvantages to the actual users.

See it isn't just throwing the signal on the power line and then having a special modem at the consumer end. Substantial investments in hardware are required. There has to be a signal booster every mile or so OR the signal has to run via cable almost up to the consumer and then be shifted to the power line. In addition, every transformer has to have a bypass installed for the broadband signal.

While we need to keep alert to the problem potential in BPL, I'm not too excited about it as there are independent industry analysts showing that it will be a loser due to financial considerations even if the system is mature and fully "loaded" to achieve the lowest possible price.

Besides the speed at which Dad will drop BPL when Junior interferes with his ballgame on TV or radio would make your head spin.

I hadn't really considered that before but I can see where the wireless home
network is going to diminish the value of "plugging into any electrical
outlet" sales pitch. Many of my friends, as well as myself, have wireless
networks for the laptops and desktops. BPL is going to lose a lot of ground
here as by the time they get deployed, if they get deployed, will be a late
entry into that game.

Your laptops would likely continue wireless via your home network. But just
like now, somewhere you'd need to "plug in" to connect to your ISP.

>
>Get real!

Another history lesson, John. Ed Hare (W1RFI) is a lead spokesperson for the ARRL on radio interference matters affecting radio amateurs. He got enthused about that job (he gets paid for what he does) enough that he got a vanity call to reflect his work.

In truth, Ed Hare doesn't have much experience in metrology anywhere else but at the ARRL "laboratory." He does possess enough smarts to analyze data and find sources of information from those WITH experience in metrology. FOR the ARRL he appears to be doing a good job.

However, the ARRL is not the be-all and end-all of any BPL problems' information. ARRL has actually hired a commercial firm to do RFI measurements at one Market Test location. ARRL website used to have a link to download that report, may still be there (haven't looked myself). The ARRL has (or had at any rate) several links to other sites which DO have quantitative data on RFI problems.

A REAL source of information on BPL is in the Comments to the FCC from 2003 to 2004 on the FCC's NOI (Notice of Inquiry) into "industry suggestions on measurement methods of RFI in the field." That alone touched off a tirade, a flood of angst by radio amateurs against BPL's very existance...without a whole lot of "suggestions on measurement methods."

Lost to the majority of Commenters is the FACT that the FCC COULD NOT FORBID the existance of BPL. All the FCC could do is to determine if RFI exceeded a regulatory-set power level and regulate the service-provider aspect of BPL providers. The FCC has since done that and is refining some of its regulations. The Office of Engineering and Technology (OET) is handling Access BPL.

>> (perhaps a year?) which allowed folks to view the video of some of W1RFI's
>> work. What he found was a tremendous amount of interference caused by BPL.
>> Interference that did not stop at the ends of the amateur bands.

Slight correction, Jim. Ed Hare didn't find out all this
"tremendous
amount of interference" all by himself. OTHERS found it and
reported
it. Government agencies have made quantitative measurements to a
high metrology accuracy and documented that...such is publicly
available. Ed Hare pointed to the sources of information. The
ARRL itself did very little but publicize the matter. Certain
localities (a club organization in Iowa) have done far more in
their own area in terms of effort and maintaining high metrology
standards as well as reporting it.

"Tremendous amount" is a very subjective statement. Subjective
statements aren't good for regulation law. The law should state
some exact limit levels on that interference, including the
general method (peak v. average, measurement bandwidth, comparison
against known physical standards, etc). Some of those exact limit
levels will be argued and they may be arbitrary...but they will be
far more correct that using the subjective "tremendous amount."

>> A lot of good folks have left this group as the bickering keeps getting
>> worse.

True, but irrelevant to the subject thread... :-)

>> You continue to miss the fact that at least some of the BPL that was
>> demonstrated *does* cause harmful interference. You suggest that the fact
>> that it interferes with amateur radio means nothing whilst you neglect that
>> it *does* interfere with other licensed services (I believe I mentioned
>> channel 2 and 3 television, but there are many more services that it can
>> affect).

Those radio services (including broadcasting) have been noted
and explained by industry/business groups involved in those HF
and low-VHF services on the FCC NOI. It isn't the job of the
ARRL to safeguard anything but the wishes of its membership.

>> It is posts such as yours that seem more intent upon trolling than engaging
>> in meaningful discussion that tend to upset some folks. By trolling I mean
>> that you post with a leading subject line and ignore a lot of facts (as if
>> BPL couldn't cause a problem with other services).

"Trolling" seems to be the essence of many folks' participation
in here...including some of your own postings! :-)

Insofar as "some folks" are concerned, it's NOT everyone's job (or goal in life) to placate them, to commisserate, to capitulate to their mighty opinions. [especially true about the PCTA extras in here] If you don't like controversy, newsgroups are NOT for you!

On the same token, postings should have some semblance of civility which is often thrown aside by some. John posts provocatively but he is also civil (as much as possible) to his 'opponents,' most of whom have NOT bothered with much civility in denigrating him. I give John credit for talking back to these other anony-mousies (and identifiables) who have increased the intolerable noise level in this newsgroup.

Dee:

I say, if it is technically possible, we WILL have it, if not, we WILL NOT have it--I hear "authority hams" on the bands--I avoid them--what they say just doesn't matter... if you really want to look into that crystal ball, look much harder--radio and tv WILL BE over the internet, so will your landline phone... no one is going to have to worry about interference to the bands now existing, even now, many radio stations simulcast and can be heard on your computer, I listen to east coast am stations all the time, if I had a faster connection, I'd watch some internet tv... SDP is a free program which does internet radio quite nicely, audio is superb...

BPL will be in testing for years, somewhere along the way the guy with the right idea will show up and/or the technology will advance, the rest will be history...

As you mentioned in another post, sodium hydroxide.

However I don't see that as a big problem. Either the electrolysis
process can be made to not split the NaCl, or it can be recombined and
the energy recovered.

The main byproduct problem I see is that you'll have lots of salt.

The process also works for a limited amount of time after the sun goes
down. The warm ground heats the air above it.

The ground under the greenhouse roof can be farmed, if there's water
available for irrigation.

*IF* it really does what is claimed. That's the problem with a
lot of new technologies:

If they're for-real, the developers are very secretive about the actual
process because they're afraid it will be stolen.

If they're a scam, the developers are very secretive about the actual
process because they're afraid it will be discovered to be a fake.

I see no such rule in Part 97. But of course Part 97 does not apply in
Tanzania. Do you have a copy of the Amateur Radio service rules effective
during the time that Dave was licensed there. If not, your case is pure heresy.

Case dismissed.

Next case please.

But once you have a wireless router, then it doesn't usually matter where in the house you have it as none of the computers need to be connected directly to it. Thus the "plug it into any power outlet" for the ISP becomes moot, i.e. it has no extra sales value over a cable, DSL, etc connection.

I think the "plug it into any power outlet" notion is a marketing play to the idea of not needing another phone line, coax, fiber, or other "pipe" out to the world.

You think way too small, John (if you've even thought about this at all).

A single subscriber just might (doubtful, but maybe) be able to be served via an under-300KHz pipe at xDSL-like speed (which is decidedly slow by comparison to other "broadband" delivery options available).

But we're talking about scores of subscribers (maybe hundreds in a high density housing area) sharing that power-line "trunk". Every BPL scheme that I've heard about extends from around 2MHz up into the low VHF range at 60MHz or higher.

Take the time to examine the technology before you embarass yourself more.

K0HB:

I just love you guys, now you have me claiming that I know how it is going to all work and am a "hardware authority."

Only homebrew here is linears, antennas, swr meters, and various other "little projects" (and yes, I know, my SWR meter actually measures the proper loading of the transmitter and NOT real SWR--but hey, I think they keep my finals running a LOT cooler--kewler too.) Line radiation, take off angle (because of mismatch), and increased losses don't give me nightmares anymore.

NOPE not me, I am a software engineer (I like the title "White Hacker" better, coder has a "ring" to it too.)

Read my past posts, I say the hardware/software guys working on BPL have some ideas to check out, they are doing that now. If it is feasible it will come to use, if not, it too will go the way of the dodo bird. I am saying any number of "authority hobbyists" which don't know a fifo, lilo, circular queue, linked list, doubly-linked list or binary tree from a banana tree don't count. And, most likely, don't even have the beginning of knowledge to make a statement on its' feasibility.

On RFI, they are collecting data, re-thinking, re-engineering and re-working algorithms--after "real world data" I would imagine testing will move indoors and be done in software--mostly... I will take a look at the data--when it has been explored throughly (well, I might not, not that interested really--if there is noise I will know it.)

But, your argument seems to me that you are more qualified and knowledgeable and should be telling them not to even bother, go tell them, see what they say... I am telling you, I know better than to do that!

You feel somehow a group of idiots got in charge of BPL and no one is noticing, I think you are wrong. If my past experience is any indication, they are the very best designers, R&D people, engineers, mathematicians, etc. which have the confidence of the industry, that it should at least be investigated.

But, what do I know? Maybe they got three mexican laborers--one with a wire, one with a calculator and one with an old TV they are going to use for parts. Hey, ya never know!

Too bad they didn't consult with arrl and you--would have prevented them from looking like the fools you claim and expending uncounted bucks! Yanno, someone save them that kind of money, they might consider making you their CEO! Maybe it isn't too late!

I am saying, data compression will be the real key in the end, no
matter what the medium of transmission... and I do know that! It will be
the guy which knows the difference between a binary tree and a banana
tree...

Wasn't arguing it's feasibility --- it's proven to work.

I was challenging your expressed notion that the frequency of operation could likely be held under 300KHz.

Dee:

Let me appeal to your feminine side, that side where "religious zealot-ism" is absent.

My grandfather claimed the first phone companies used peoples' barbed wire fences, metal buildings, abandoned wiring, railroad tracks, etc. for the very first phone lines. I wasn't born back then, and have just taken his word for that, until someone points out is false, I like dreaming about it. It is darn near as good a story, to me, as a romantic novel is to heart sick teenager!

Now, what these old amateurs see as the "frankenstein monster", I see as hope. I am wondering if we are not seeing history repeat itself and people in the future may reflect back on the first crude methods we implemented in BPL? And, what will BPL become when we are able to stop using the "fences and railroad tracks?"

And, surely, you realize someone able to hold a "third-person point of view" here would see all the players here, the self-serving, the petty, the liars, the special interests, the con-artists, those of a "good ole boys mentality", etc.

Gawd, haven't you ever had to sit though such a boring play that it almost brought you to tears. Look at the opportunity here, free entertainment, raw emotion, evil doers, the protagonists and the antagonists... you could never purchase a ticket to such a show. And, it is real, it is/"will be" history.

Enjoy the entertainment and keep in the mind, whatever the outcome, most probably, we ALL win... this is not the end of the world...

K0HB:

I see BPL as spokes on a wheel, no matter what degree they are measured
in the circle, they all return to the central hub, the internet. How many
users a "spoke" can accommodate, that is what we are finding out and the
evil doers attempting to halt. You are just attempting to play the end
game, there are many moves in between.
We can't even argue that point before the real data is ALL in...

If those who jumped the bandwagon, over-reacted, already attempted to try
BPL as if it where on trial, and ended up looking self-serving are
correct, well, won't they crow as roosters that "WE WERE RIGHT!"

But, if they are wrong, a way is found, let us see if they can behave as
gentlemen and accept the criticism...

Frankly, I think you are all wet on what to get worried and upset about...
I am much more concerned how such a system could be used to spy on the
citizens of this country--and I am voicing that in other forums... a
hobby I can abandon--if ABSOLUTELY necessary.

My freedom I cannot, and my attempting to maintain that/those freedom(s)
and oppose counter forces could easily kill me...

One of the biggest problems I see for many of these technologies is that
they often don't have the scalability needed to provide fuel for many

vehicles, let alone fuel the countries needs. If this plant went into serious production, it might run out of feedstock pretty quickly.

I think that until the next big fuel comes along, we are going to enter an age of "niche" fuel production.

That is okay, as long as we don't get involved in feedstock that might otherwise be food, ie corn/ethanol production. There are possible ethical considerations that will crop up in that case.

One of the statistics that is trotted out when speaking of airline
safety is passenger miles. I suspect the shuttle would fare *very* well
if we applied passenger miles to it! ;^)

Correct, they would have to plug in somewhere. But it sure takes the
wind out of that "advantage" of BPL. Right now, I plug into my cable.
The only selling point is that they could run into your house without
having to physically come into your house. Big deal. Gimme the fiber!

Michael:

Don't you think chinas' appetite for fuel will eventually (soon?) consume
the elephants share, we can probably scale back and ride bicycles so there
is enough fuel for trucks to bring us food and toilet paper--but, maybe
not...

Bingo! All it means is that you plug your router into the wall, and get
your net from there. I for one would prefer to get mine from a source
that doesn't have high voltage on it also!

hmmm, must not be enough people out there with my problem. The more BW I get, the more my kid hogs up. I have the ultimate solution though. When he gets to using too much of my BW, I reach over and unplug him from the router for a while. And no, he is not amused! 8^) What I would prefer though, is some sort of Ethernet throttle.

Mike:

Look into NetLimiter, you can run it on any computer you wish to limit
upload/download speeds on, can also run it on a computer which is serving
as a router--it will do what you want I believe...

Google netlimiter and read about it.

What these devices are is "bandwidth throttles" or "shapers", google with
those terms and it will give you quite a bit to look at.

Linux has many methods, windows is a bit limited, I ended up using
netlimiter for home use...

The vendors are waiting in the wings (Alcatel, ADC, Cisco, etc.) with equipment,
and they'd like nothing better than to provision a SONET OC3 (155.52MBPS)
termination to your home router! Now all you need to do is convince your
service provider to drag the glass under your street.

OBTW, I forgot to mention that the current going-rate for a base OC3 circuit (glass lit at the provider end, but customer provides the premise termination electronics) starts around $20K/mo. But hey, it'll haul about 100 T1 circuits for your kids online gaming needs.

Self-closing snap-on connector for the hydrogen supply. Similar to what
is used for compressed air.

Very doable.

That's where so many people miss the point, Mike.

There's probably no single technology that will solve the
"energy crisis". Too many people want a single magic

silver bullet solution that will solve it all at once.
Extremely unlikely.

As you say, even if TDP works and is
economically competitive, the limiting factor may be
lack of raw material (imagine - not enough trash/waste
to feed the plants!)

The solution is almost certain to be a collection of
good ideas and new technologies. TDP may be one piece,
hydrogen another piece, geothermal, solar, wind, etc.

Then there's conservation and increased efficiency - a
penny saved really *is* a penny earned. For example, one
of the biggest users of electricity in most homes is the
refrigerator. Some new models use much less electricity
per year than their earlier counterparts of the same size
and features - to the point that replacing a 15-20 year old
fridge with a new one may pay for itself in energy savings
even if the old one was working fine.

It's possible to build air conditioners of very high efficiency,
but they cost more. However, using them means we don't have to build
new power plants and new power lines, because the electrical system
will have less peak load. (The peak load typically comes on an August
afternoon - from all the AC units).

Too many folks want one solution to solve 100% of the problem, without
requiring them to change anything, be responsible, or worst of all have
to think.

A more realistic and mature approach is to find a number of
solutions, each of which solves a piece of the problem.

Say you find 10 solutions, each of which solves 10% of the
problem. There you are.

"We can't solve problems by using the same kind of thinking we used
when we created them" (*)
>
>I think that until the next big fuel comes along, we

> ethical considerations that will crop up in that case.
>
All of engineering involves ethical considerations. Heck, all
of *life* involves ethical considerations!

Is it ethical to import a large percentage of something - anything -
needed to keep a country's economy and way of life going? Particularly

when such importation requires dealing with,
and empowering, people whose values are very different from your
own?

--

Now someone will probably ask what any of this has to do with amateur radio policy. The answer is that we see the same sort of oversimplification of problems. We are told that the solution to all of amateur radio's problems is to get rid of the Morse Code test. When that fails to bring about a New Golden Age, then what?

> > > CITE A SPECIFIC RULE.
> >
> already has been done, several times

No, it's not.

Not even once.

A SPECIFIC rule would START OFF with the specific paragraph
number, then quote the rule in it's entirety:

IE: " 97.3(a)(4)Amateur service. A radiocommunication service for
the purpose of
self-training, intercommunication and technical investigations carried
out by amateurs, that is, duly authorized persons interested in radio
technique solely with a personal aim and without pecuniary interest."

THAT, Markie, is a SPECIFIC RULE

YOU have NOT done that.

I just got back from the Pomeroy area helping a friend evacuate from
the path of the School Fire. While there I made a few observations:

- CB radio is being used -extensively- for emergency communications,
mostly by civilians but to some extent by firefighters and support
organizations.

- CB radio traffic is NOT chaotic -- operators are well behaved, there
is very little channel bleedover, and no idiots jamming the channels
or yelling "A-U-D-I-O";

- CB radios are just about everywhere while hams are nowhere to be
found (and yes, I looked. There was only a rumor that a ham had set up
shop in Tent City (where the firefighters are camped) but was still
trying to get his equipment working!).

Now all you CB-hating hams who -still- can't swallow this bitter pill
have the opportunity to go there and listen for yourselves. Even
better, you can go there and lend your communication 'expertise' to
the effort (which is the very activity you claim makes ham radio so
important -- so what are you waiting for?). Or you can sit on your fat
asses, stuff your face your nachos, and continue to fabricate reasons
why it's impossible for CB radio to be a practical mode of emergency
communication when, in fact, the impossible is occuring despite your
best efforts to deny it.

Minnesota is one of the most "liberal" places in the nation,
Hans.

> Such societies exist (in Europe primarily) --- if you want to
> live in one, move there.

I see. You get to determine what America should be like,
not me. Why is that?

> Personally, I prefer my fuel-inefficient 6.0L 32-valve
> turbocharged engine to your "50mpg highway" wimp-mobile.

"Any....fool can make things bigger, more complex, and more
violent. It takes a touch of genius - and a lot of courage -
to move in the opposite direction". (*)

"Wimp-mobile", huh? Is your masculinity and maturity measured
in horsepower, cubic inches displaced, and foot-pounds, Hans?

Mine isn't.

> Since I'm willing to pay the price to run it,
> and enjoy the freedom it gives me, your "walkable towns" have
> zero appeal to me.

*You* don't pay all of the price, Hans. All of us do. We pay it in
pollution, we pay it in the trade deficit, and we pay it in
having to deal with the folks who sell us the oil, and what they
do with the oil money.

Most of all, we pay for it in being dependent. Freedom? How much
freedom exists when a nation's economy is at the mercy of imports?

Nobody is saying that *you* would be forced to live in a "walkable
town".

Sometime back you bemoaned the lack of the community that you
used to see in the radio store/club meeting/etc.

I submit to you that the lack of community problem isn't limited to
amateur radio, but has become a part of American life, and is driven in
part by the detachment of people from the places they live, work, shop,
etc. And that detachment is driven in part by overdependence on
automotive transportation as opposed to walking, running, biking, etc.

> Sooner or later, of course, the democrats will again ascend to > power and attemp
> to social-engineer such crapola into the law of the land,
> rather than
> inconvenience a few reindeer with drilling rigs in the
> neighborhood.

Alaska doesn't have enough oil to end imports, Hans.

It would be interesting to see your reaction if they wanted to drill
for oil under one of your favorite Minnesota lakes. Or build a nuke
plant on one, using the lake water for cooling.
Or something similar.

I seem to recall a quote from Vonnegut about "they were too damn cheap"
or some such. Cheapness involves more than not spending money.

Well gee willikers, Mr Wizard, YOU did the exact same thing in another thread just last night. (At 2:23 and 2:24 11 August 2005 under "An Even BETTER Question for Brain...")

Any reason for THAT...?!?!

Or just exercising your Hypocrite option?

You talkin' to ME?

Dear friend, I *have* 2 Citizen Band Rigs. And I use them extensively
for travel. I am fully aware of the conditions on that band.

Your Jeramiad is just that.

As an intercom in a very short range area. Nothing more. It
never was.

> > - CB radio traffic is NOT chaotic -- operators are well behaved, there
> > is very little channel bleedover, and no idiots jamming the channels
> > or yelling "A-U-D-I-O";

That one on it's own merits is false, proven by switching on even
the simplist CB and listening for 10 seconds.

The ONE rule you'd think that everyone would adhere to is "Channel
9 is for EMERGENCIES only...It's as bad as the rest of them.

KEQ1570 and KBIW1619. CB radio was how I got introduced to
Amateur Radio via the station of WA8FMT (SK) in Streetsboro, Ohio. I
use it occassionally for road trips too...Or to just stay awake!

Dad had one of the "19Q" calls, I believe, and that was changed to
KHG8459. He and a friend co-owned the "Sunoco" station at the
intersection of 82 (Aurora Road) and Som Center Road in Solon, OH. (I
ahven't been tehre in a while, but I believe there's a modern Sunoco
there now...) He had one of the Lafayette HE15's, and I remember the
mic was bitter than my hand by almost twice!

Memories, huh...?!?!

Started off strong, Mark. But then your mouth over ran common
sense and you started rambling again.

E N G L I S H C O M P O S I T I O N

> The privileges of the entry class, Technician, after this action are
> frankly unclear to me.

I guess you missed the part where the FCC said it was dismissing
all those other petitions and was focusing on the Code issue at the
moment.

> As perhaps one of the few members of that class
> making comments it is a subject near and dear to my heart.

Also guess you haven't been paying attention to some of the
demographics of the respondents. You are far and away from being
"...one of the few...", Mark...

> It is also
> a question vital to the future of the ARS, and thus in some degree the

Congratulations.

104 words before you managed to get a period in there.

And the FCC could care less about the price of radios.

> From personal experience...(SNIP)

Goat sacrifice counts here?

> I can tell you that this is a hard thing to do, and thus tends to imped
> the progress of the Techs and separate them from the rest of the ARS.

The only thing that impedes ANY licensee from operating on ANY
band or mode is just DOING it. I know several NCT's who rarely touch a
2 meter rig.

> This separation is not god for the ARS or it abilities to serve in the
> public interest .

Signing this comment with an Amateur Radio callsign will be even
WORSE for the Amateur Service.

Whoa right there, Mark......

(1) Dave was, again, correct. What you typed was "SOSO"

(2) You've already demonstrated that you WON'T help yourself
despite having acknowledged that numerous resources are at your
disposal and within your capabilites to use and implement. So why
would Dave (or anyone else, for that matter..??) waste any time on you
for anything?

(3) As for "procoders" aiding others, I have "elmered" and/or
proctored tests for dozens of folks and helped who-knows-how-many folks
ON the radio...regardless of thier class of license.

You've "helped"...how many...?!?!

Nope.

Not a word of it.

Just paranoid delusional rantings on your part.

> > Look it up in Websters.

> then put up or shut up

Put up what? Are you TRYING to elicit a threat?

That's all you did before, you know...You tried to use language
that would elicit a threat and at best you were able to cobble some
words out of a response that you thought sounded "threatening"...But
only because you were LOOKING for something threatening.

Now that this is years old and you STILL don't have the desired
result, you're getting more angry by the minute.

Your demands to "put up or shut up" and seemingly backsliding on
what has been a slowly improving grammar state is indicative of it.

We have 15,121 lakes in Minnesota (don't believe the "10,000 Lakes" motto on my license plates). Who'd miss a few?

Your east-coast roots are showing. Take a view of Minnesota from 30,000 feet and measure the distance across the wheat fields, forests, and lakes....

The analogy does not take into account that the Amateur Radio hobby occupies a significantly valuable public resource to the exclusion of other potential beneficial uses. If/when the public (through its appointed regulators) no longer sees value in our occupancy, we will be toast.

N2EY:

If EVERYONE where to change the light-bulbs in their homes with the new
LED bulbs, that single action would make one heck of a difference in the
usage of power!

If all business did this too, would probably postpone the whole energy
crisis for a little bit longer...

of course

I missed it in all you shit

but it of course is mostly bullshit

since the issue is not broadcasting but you claiming the right to
contact other other and "inform them" they are comiting a federal
crime, that landed Baxtae in hot water

and you are claiming the right to contact people tell them they are
comitting a crime, and claiming the right to contact people PERenat and
tell them they are comiting a federal crime by allowing thier sons to
transmit

and you deny that you are threatening Todd, you lying sack of shit

>
> Any reason you can't explain to me the rationale for your last set

just missed it that is Usenet for you

as I said before it is NOT rational for you to expect I am going to see
your post in the order you make them, and here in this thread you made
so many so close together I simply missed one

so sorry

There ya go!

The big draw of DSL, besides the speed, is that you can use the voice
'phone and the DSL at the same time over a single pair. The monthly
cost of two lines is often comparable to the cost of one line plus DSL.

Xtal filters in ham receivers and noise blankers can be traced to the
same guy: Jim Lamb, at ARRL Hq. Mid 1930s.

> around!

Because there's no point to building one!

Somebody put an HBR-16 through its paces and it bettered 0.5 uV
sensitivity
on 80/40/20. That's not .05 uV but the point is the same: There's a
limit to how much sensitivity is usable on HF, with typical HF
antennas.

As you go up in frequency, that situation changes.

> > You don't need a noise generator, lab full of gear or an EE to know if

> matching issue.

That's the more-correct way to do it, but the point is the same: If the noise coming in from the antenna exceeds the noise generated by the rx, you've already got all the sensitivity you can use with that setup.

you know it is truely amazing the lies you tell Stevie

I have never heard anyone yelling audio, never experence jamming of any
sort, and only rarely seen bleed over into other channels,(although
when it is there it is REALLY there)

only experenced any real porblem in/near some of the large cities where
due to the silliness of allocating that small amount of specturm to so
many people problem are bound to occour

I wonder if we will have to go back to having actual people dispensing
fuel, that is changing tanks. Otherwise we'll have to have a standard
tank and undercarriage shape - unless of course we opt for some goofy on
top of the car solution. And in that case

Kind og like the guy who runs used oil from french fryers in his
biodeisel car. Says he spends 5 dollars per week for fuel. But that is a
one person solution.

I wonder what that smells like? Fries anyone?

> There's probably no single technology that will solve the

I think this one is a real doozy though. Imagine in times of strife
having to make the decision between fuel and people starving because you
need the food for fuel.

> Is it ethical to import a large percentage of something - anything -
> needed to keep a country's economy and way of life going? Particularly

I don't have anything against importing oil, save that it can introduce
vulnerability. But using it up is not a problem at all. Hopefully we'll
have replacemnt sources ready when that happens.

>

Stevie for years now, I am the rest of the Newsgrups has endured your abuse, your threats and your lies

You ahve accused me and crime and threatened with Murder arest and comitment to a mental inistitution, claiming the porfessional credentcial to make the judgement

I am not seeking to elecit yet another threat. I seeking your action.

Put up or shut up, My preference is of course that you shut up your phycobabble, and you lies but it is your choice

you have stated that I am a danger to myself and others, If that were a true statement I should locked up by the authorities, you know that. You also obviously Know it is not true, that you are lying when you say it is true

I am calling your bluff

Coward
Bully

those are the names properly aplied to you

put up or shut up

N2EY:

That doesn't make any sense, you text. I am suspecting you mean the total
cost of DSL is roughly equivalent to phone + dialup?

I am not being picky, I knew what you meant right off, just to clarify for
those few which might not...

John

Michael:

No problem. Everyone sharing a ISP with a teenager needs this survival
kit! The 28 day free evaluation is great!

For Linux rshaper (free of course) is great, just download, build, insert
the module "rshaper.o" into the kernel and use the "rshaperctl" app to
set, for example:
insmod rshaper.o
rshaperctl 192.168.X.XXX 5000 1
(above will limit upload/download to 5K limit--change 5000 to any value
needed--the 1 is the time factor on queuing, set as needed)

Good answer, Jim!

"Way back when" the Saturday Evening Post (or maybe Colliers) had a periodic reader-contribution column called "The Perfect Squelch". With this, you'd have won the $50.00 prize offered.

# 1417. Re: Docket 05-235 Scorecard

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-12 18:41:31 UTC
From: LenAnderson@ieee.org
Message-ID: <1123872091.181317.216170@o13g2000cwo.googlegroups.com>
Source record: 115767

Today's Scorecard in the NCTA v. PCTA Amateur NPRM Opinions!

As of midnight EDT on 11 Aug 05, WT Docket 05-235
Comments on Test Element 1 Elimination/Retention are:

Total 1414

Indeterminate/duplicates (note 1) 62

Unambiguously Against NPRM (note 2) 386 28.55%
Unambiguously For NPRM (note 3) 783 57.91%
Code test ONLY for Extras (note 4) 183 13.54%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, individuals not understanding the
scope and purpose of the NPRM, and one foreign citizen
submission. It should be noted that at least two
individuals (one for, the other against the NPRM) have
been spotted making multiple entries over following
days; all such multiple entries are considered
duplicates and relegated to Indeterminate sub-total
regardless of their opinion position.

2. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

3. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
midnight of 11 Aug 05 that would be 1352.

11 August 2005 is the 17th day of submitted Comments. A notice
about FCC 05-143 or Docket WT 05-235 has NOT YET BEEN MADE in
the Federal Register so it is unknown if these 17 days of Comments
will be accepted by the Commission for decision on any Report and
Order. Note: The Federal Register 2005 Contents page on the GPO
website has NOT had any entry for 9 Aug 05 or later as of Noon,
EDT, 12 Aug 05.

Stay tuned...the future of U.S. amateur radio is being made,
like it or not.

dah nit

>termination to your home router! Now all you need to do is convince your
>service provider to drag the glass under your street.

...or drag it over his street, depending on the local municipal
code on above-ground or underground utilities. :-)

In this neighborhood, Comcast brings in broadband fiber to the
end of this street, converts the optical digital to analog
digital AND analog-analog, sends that along on two coax cables
on the utility poles for very local distribution. No problem,
been in there for three years and a bit more. Digital TV (the
basic routing) has plenty space for broadband downlink of high
speed data to serve several thousand potential data subscribers
in this neighborhood. Uplink data is a tad slower rate but
that may be for compatibility with the older analog system
still here, still providing some profitability.

But, in line with Miccolis' contention that EVERYTHING is
related to amateur radio (ergo, every permissible subject is
desired in his personal chat blog), Coslo's parental problem
is indicative of something else -

There IS a tremendous competition for activities of personal
entertainment against morsemanship contacts with faraway lands,
has been for years and years. Even with the POTS (Plain Old
Telephone System), the Internet provides a near-immediate
contact with MOST of the world WITHOUT the vagaries of the
ionospheric layers. Even staying within national boundaries,
complex interactive role-playing games are a rapidly-expanding
activity, popular with many age groups, "high-speed" or POTS
connection access. [instead, there is limited role-playing
of devout morsemen busy in their mental dungeons, trying to
slay the dragons of change in HF radio in here...:-) ]

The combination of encroaching middle-age angst and irritation
that "my kids don't appreciate MY activities" complaints should
be an indicative symptom that the old ways are NOT as glorious

or noble or fantastically whatever to younger generations.
[it's a very old complaint, repeated every generation for
countless generations since time began] [unfortunately, the
complainants all think they 'just discovered it' and bridle
at the remarks of others who've seen the same complaints voiced
by previous generations...;-) ]

Now, I view the technical aspects of Access BPL as being the
equivalent of fairly high-speed broadband data sent over wire
in a DIFFERENT method than other wired broadband data service
providers. A different METHOD to yield equal results to
subscribers. The difference to everyone else is that Access
BPL has EMI/RFI up the ying-yang compared to other methods.
Enough that everyone in the immediate vicinity of Access BPL
can kiss their HF-VHF receiver sensitivities bye-bye...they
would be swimming in a terrible gumbo of QRM that leaves a
terrible aftertaste.

gum bow

# 1421. What Is Ham Radio - A Weekly F.A.Q.

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-12 19:34:33 UTC
From: Polymath <aiyr.r.bean@lycos.co.uk>
Message-ID: <1123875273.411151.190000@o13g2000cwo.googlegroups.com>
Source record: 115771
Cross-posted to: uk.radio.amateur,rec.radio.amateur.homebrew,rec.radio.amateur.policy

What is Ham Radio?

(Nothing whatsoever to do with Mrs.Nugatory and
her infantile obsessive habits, that's for sure!)

Ham Radio is a technical pursuit for those who
are interested in the science of radio wave
propagation and who are also interested in the
way that their radios function. It has a long-standing
tradition of providing a source of engineers who
are born naturals.

Ham Radio awakens in its aficionados a whole-life
fascination with all things technical and gives
an all-abiding curiosity to improve one's scientific
knowledge. It's a great swimming pool, please dive in!

This excitement causes a wish to share the experience
with ones fellow man, and shows itself in the
gentlemanly traditions of Ham Radio.

Radio Hams are in a unique privileged position in that
they can construct and operate their own equipment! No-one
else has this privilege. Users, such as broadcasters,
the po lice and armed farces, CBers and mobile phone
users have to purchase ready-made gear. Manufacturers
are not licensed to operate their gear. Radio Hams
are qualified to design, build and then
operate their own pieces of equipment. They do this
with gusto, and also repair and modify their own
equipment. This is a privilege well worth the effort
to gain, and one to be jealously guarded.

The excitement that drives a Radio Ham starts with
relatively simple technologies at first, perhaps making
his own Wimshurst machine and primary cells. Small pieces
of test equipment follow, possibly multimeters and signal
generators. Then comes receivers and transmitters. It is with
the latter that communication with like-minded technically
motivated people takes off. The scope for technical
development grows with the years
and now encompasses DSP and DDS. There is also a great deal
of excitement in the areas of computer programming to
be learnt and applied.

The technical excitement motivates Radio Hams to compete
with each other to determine who has designed and manufactured
the best-quality station. This competitiveness is found in DXing,
competitions and fox-hunts.

-----OOOOO----

However, beware! A Ham Radio licence is such a
desirable thing to have that there are large
numbers of people who wish to be thought of
as Radio Hams when, in fact, they are nothing
of the kind! Usually such people are a
variation of the CB Radio hobbyist; they buy their
radios off the shelf and send them back to be
repaired; they are not interested in technical discussion
and sneer at those who are; they have no idea how
their radios work inside and have no wish to find out;
they are free with rather silly personal insults;
they have not satisfied any technical qualification
and their licences prevent the use of
self-designed-and-built equipment.

These CB types engage in the competitive activities
with their Cheque-Book-purchased off-the-shelf radios
in a forlorn effort to prove that they are Radio Hams.

No _REAL_ Radio Hams are deceived by such people!

PM:

Most of that is fictional... lots of "could have", "should have", "would have" which it suggests though...

Computer related hardware/software is where all of the engineers are coming from today.

If you feel that it is fictional, then it is almost
certain that you are one of the latter-day recruits
whose style is that of CB Radio, the very type that
I warn against.

Perhaps the horse has already bolted?

You're joking, of course. You can't even get an >approximate< measure of your receiver sensitivity/noise floor from that test. Suppose, for example, that an active electrical storm is brewing and you're tuned to a 40M QRG. All but the most stone-deaf receivers will give you some room-filling background noise which will disappear when the antenna is removed.

My state grows no oranges, and must import them from Florida, home of the hanging chad and other values not compatible with "Minnesota nice". Is it ethical to drink orange juice in Minnesota?

Or maybe ethics hasn't a damned thing to do with it. I like citrus products, and I'll buy from whoever sells them at a price I'm willing to pay. Meanwhile we grow some damned good corn, wheat, and soybeans here on the prairie. We'll be happy to sell it to whoever meets the going price, regardless if their "values are very different" from ours.

PM:

No, new technology came, amateur radio was too slow to adapt, it began the
way of the dodo and has progressed along that course beginning in the late
60's leading right up to today, and continuing...

Classic FTTC (Fiber To The Curb) application using SONET OC3. Very cost effective service delivery model because one (very expensive) optical/electrical/optical equipment pedestal serves several dozen customers with oodles of bandwidth for each.

The cost/revenue model falls down the toilet when you serve a single residence with an OC3 (or even OC1) pipe. Granted this is waaaaay more bandwidth than any single residence will ever use, so some telcos have field-trialed PON FTTH rather than SONET (less electronics investment), but only the equipment vendors are enthused.

... it is the "Control Freak Mentality." Once an individual adopts it,
seems to become a way of life, as addictive as heroin too, it seems...

Manipulation of sovereign nations seems to be in vogue these days... if
their ideas are just different, no problem. If they plan on
enslaving, depriving citizens of freedom, "poverty-izing" people, killing
people, BIG PROBLEM!

We have enjoyed the redneck jokes for years. It's time to take a reflective look at the core beliefs of a culture that values home, family, country and God. If I had to stand before a dozen terrorists who threaten my life, I'd choose a half dozen or so rednecks to back me up. Tire irons, squirrel guns and grit -- that's what rednecks are made of. I hope I am one of those. If you feel the same, pass this on to your redneck friends. Ya'll know who ya' are...

You might be a redneck if: It never occurred to you to be offended by the phrase, "One nation, under God."

You might be a redneck if: You've never protested about seeing the 10 Commandments posted in public places.

You might be a redneck if: You still say "Christmas" in! stead of "Winter Festival."

You might be a redneck if: You bow your head when someone prays.

You might be a redneck if: You stand and place your hand over your heart when they play the National Anthem.

You might be a redneck if: You treat Viet Nam vets with great respect, and always have.

You might be a redneck if: You've never burned an American flag.

You might be a redneck if: You know what you believe and you aren't afraid to say so, no matter who is listening.

You might be a redneck if: You respect your elders and expect your kids to do the same.

You might be a redneck if: You'd give your last dollar to a friend.

God Bless the USA!

PM:

Let me give a summary of the "real world."

If you were a child today, you would grow up with the computer.

In elementary school your first "pen pal" would be in a foreign country
and you would communicate with them via the internet. You would learn to
IM, IRC, EMAIL, MSN CHAT, YAHOO, WEB CAM, etc....

By high school you would be picking up a computer script and/or language
and at least have a basic knowledge of programming. Your first hardware
project would most likely be computer related.

Somewhere along this line, you bump into a ham or a few. You look at them
using their equipment, it is apparent the internet is superior. They lack
the ability to exchange pics, apps, music, videos, documents, etc. by
transmissions taking seconds or minutes. Then, they show you a CW key and
you are dumb struck, and leave. You return to the internet and current
technology, never to stray again... you begin a web site and consider
what position you would like in the computer field, when you grow up...

I guess you never put together a crystal set or a 1-tube radio, or designed your own VFO-controlled transmitter. I did, and from those days in 7th grade, I knew what I was going to do the rest of my life. By sophomore year in high school I learned to send and receive Morse Code at 15 WPM so I could be sure to meet the 13WPM requirement for my Ham license. At 21, my Engineering education was interrupted by the draft, and I joined the Navy to become an Electronics Technician and service radar and communications equipment for 4 years. Resuming my education, I became an Electrical Engineer and worked in industry for the next 38 years, continuously learning new things as they became current technology. I was never laid off or a victim of "reduction in force" through that entire career - - because I was a "natural" and kept my skills up to meet the needs of my employer. Ham radio is an excellent start for anyone who has a curiosity and fascination about electronics, be it represented by radio communications or computers or industrial control technology.

I was inspired by Polymath's description of the good effects of ham radio on its devotees. He should be congratulated on his explanation - - a very readable and true to life presentation.

Chuck:

Your text reminds me of some of the "motivational speakers" on TV.

I don't dispute it may well be true, for a past age, just not accurate
under todays technology and the state amateur radio now exists in...

... yesterday just doesn't matter, today is only useful for being able to
plan tomorrow, tomorrow is where it is at!

John

And ham radio is an intergel part of official emergency plans on both
the local and federal levels as well as NORAD and homeland defense. CB
isn't. Swallow that pill.

nope I am just better infromed Cmdr Sir maybe you should read your
reports more throughly Cmdr Sir

but in some areas CB is used in inter agency matters

We have been promised that evryone will soon be using the 800Mhz system
of the Michigan Sate police and that the system will be upgraded to
coover the entire area ( arther than just along the state and federal
highways) but somehow when it has come down to PAYING for all this what
you see is a lot of finger pointing, and wring of hands

Maybe in few year we will have in place the pormised system the system
promised to these people here back in 1998 (they swore it would be rady
in case of Y2K) I showed some years after that and still much arguing
over costs and who was going to pay, Homeland Defense does seem to have
played a role in building some of the Twoer needed for the system but
still a whole of NIMBY on the permits

not at all

you simply never hear anything like that here int eh UP or in Central
Illinois where I used to live

You may hear some of it round major cities, but I don't hear in in
Milwalkee or Indy or St louis where I travel regularly

I hear some clear problem around Chicago when I am there, sound like
too many radios users not enough spectrum

But you claim that turning on the simplest CB will prove what you
calim is simply a LIE

The condiction vary from place to place

>

"Polymath" <aiyr.r.bean@lycos.co.uk> wrote

> What is Ham Radio?

This message is a VERY brief attempt to explain the hobby and give some pointers on where to get more information. Almost certainly I won't answer all your questions, so feel free to ask for help. Hams are famous for their eagerness to help newcomers. I should also point out that this explanation assumes you live in the USA. Almost every country has hams (amateur radio operators), but each has their own name for the various classes of license, and the test requirements vary from country to country.

(First I have to explain something you might not have realized. In doing so, I'm going to paraphrase something written by Steve Ford, WB8IMY, in his introduction to a book entitled "The ARRL Operating Manual".)

In case you didn't know, belief in magic is a necessary requirement for all Amateur Radio operators. Of course, you won't see a question concerning magic or metaphysics on the test you take to obtain your license, but in your heart you will come to believe in that powerful, intangible force.

All of us in the hobby have felt its influence at one time or another. Some night when the band is dead as a doornail you'll be tuning aimlessly, not expecting to hear a single signal because NOTHING could be coming through at that hour. But then, rising out of the noise like a ghost, there will be a faint call from another stalwart explorer thousands of miles distant. You pounce, establish contact and both of you marvel at the fact that the conversation is taking place at all. A few minutes later, however, the signal vanishes as quickly as it came. Your rational mind will shrug it off as a quirk of propagation, but that little tingle in your gut will tell you otherwise.

If you could travel back in time to, say, 1305 AD, you'd probably be burned at the nearest stake for even suggesting that two human beings could communicate with each other over great distances without a physical connection. No doubt they would accuse you of dabbling in magic -- and they'd be right!

As Amateur Radio operators, we work feats of magic every day. Many of us have become jaded about our powers and we tend to dismiss them as commonplace. We hardly think twice when we use our equipment to sommon the elemental forces of the universe. But every so often we need to

pause and remind ourselves of what we are really doing. We need to remember the essence of what drew us to our unusual avocation in the first place: the wonderful magic of wireless communications.

So how can YOU become a magician?

First, you need to prepare to obtain a Magicians License. The Federal Communications Commission calls them Amateur Radio Operator Licenses, and they come in 3 "classes".

The Technician class license, is currently the most popular class, providing the "first taste of magic" to most new licensees. There is no Morse code examination for this license, and the written examination is not considered difficult by most applicants. The frequency bands for this license are largely "local" in nature. (You can gain access to some "long distance" bands if you pass a slow (5 words per minute) Morse examination, but this option may soon be history if a recent FCC is adopted.)

The other two classes of license are General and Extra.
These two classes have access to portions of all amateur bands, with progressively more difficult exams, and a requirement requirement to pass a 5 word per minute Morse code exam.

To prepare for the exams you will need some study material and more information about classes, examination points (the exams are given by volunteer Hams in your community), and clubs in your area. A number of organizations will be more than willing to help. One such organization is the American Radio Relay League. They are on the Web at http://www.arrl.org.

Or you can write them at:

ARRL 225 Main Street Newington, CT 06111

or call them at 1-800-32NEWHAM

Ask for their "Prospective Ham Package". It will include more detailed information, a list of classes and clubs in your area, and a list of scheduled examinations in your area. Include your ZIP code in your query so they can send you info tailored for your location.

If you are near a Radio Shack store, go there and ask for a book entitled "Now You're Talking". This book is also available from the ARRL. It contains all the information you need, including study material and sample questions for the examination for the Technician license.

Good luck, and welcome to the "magical" hobby.

Regards,

Hans, K0HB

Christy:

I certainly DO NOT hold with the desecration of graves, still, it WAS only Regans' and Nixons', certainly an exception could be made there! Perhaps if they find that kid, they could give him a medal instead?

wrote:

they are nothing
>of the kind! Usually such people are a
>variation of the CB Radio hobbyist...

Actually it was CB band competition between a friend and I combined with my desire to understand radio that turned me in to a ham. When I was back in school my friend and I started trying to see who could put out the strongest signal. His father bought him an amplifier to get over me. I was not going to ask my parents for an amplifier, and I did not have any money to buy one since I was a full time student. I had heard the phrase "Knowledge is power", so I decided if I could not buy a bigger amp to get over my friend I would have to out smart him with brain power.
I went to the school library and started reading radio handbooks like Bill Orr's handbook. When a radio repair tech at the local ham store realized I truly wanted to learn the science of radio he gave me a copy of the 1983 ARRL handbook for free (it was 1984 at the time). I read that book until it fell apart. Then I bought another ARRL radio book, and then another radio book, and then another radio book. I'm still doing that all these years later. The radios I talk on (a Tempo 2020, Drake 4 B line twins, Yaesu FT-101ee, and a Midland 79-892 40 channel sideband CB) were all someone else's broken door stop. None of them worked when I bought them. I repaired them all, and I made most of my antennas. When I talk on those old radios part of me smiles, because I know the only reason those radios are still working is because I put them back on the air.
Anyway after deciding to ignore all the CB radio folklore I had heard on the CB back in the 1970s and early 1980s, I learned the truth about radio from reading the ARRL handbooks. I quickly became the strongest CB station on the airways, and much of that was with self taught radio know how.
A local ham noticed I was emerging from the CB pack as a potential ham, and he started talking to me about ham radio. I aced the 5 wpm Morse code test three weeks after listening to my first ARRL code tape, and I don't even like Morse code. I aced all my exams, my 13 WPM code test, and now I am an Advanced class ham. When I passed my Advanced written test a bunch old timers circled around the VE examiners desk looking for a mistake on my test, but there was none to be found. I made a perfect score, and out of all my test I only missed one question.
One of the reasons I have not taken the Extra test is because the

old timers spit on the new no code Extra. I'm proud of my Advanced class license, and I would not take kindly to an old timer spitting on me if I had the new no code Extra.
In the past I used older equipment because I could not afford anything else. Now I can afford the best, but I find myself poking around in the old tube types and tube hybrids, because I don't know if I can service the new surface mount technology stuff. If all I could do was talk on the radio that would take all the fun out of it for me.
I think the best compliment I ever received on the ham bands was when an old timer listened to all the things I was building and doing and he said; "You are a true ham". That phrase from an old timer meant more to me than any signal report or any DX contact. I am a true ham, and I started on the CB band back in the 1970s just like most other hams my age. I am not ashamed of my CB heritage. The truth is I had a blast on the CB band back then.

>> organizations.
>
>well then, yours is a rare exception

Well gee, Eric, considering your decades of experience of trotting
around the US and monitoring CB comm during disasters and emergency
situations, you are most certainly qualified to make such a judgement,
so I suppose your opinion -must- be the truth, huh?

>> - CB radio traffic is NOT chaotic -- operators are well behaved, there
>> is very little channel bleedover, and no idiots jamming the channels
>> or yelling "A-U-D-I-O";
>
>where was this?

Don't know how to google "School Fire" and "Pomeroy"? Oh, that's right
you're blind or deaf or something else that you use as an excuse not
to use your brain.....

> I can assure you that such wouldn't be the case here in
>Phoenix or any of the other major urban areas.

You have previously noted your "experiences" in Phoenix. Yet you now
refer to the past as a theoretical possibility. You aren't very
consistent with your lies, Eric.

>> - CB radios are just about everywhere while hams are nowhere to be
>> found (and yes, I looked. There was only a rumor that a ham had set up
>> shop in Tent City (where the firefighters are camped) but was still

>> trying to get his equipment working!).
>
>then you didn't look hard enough.

If ham radio was as prevalent in emergency communications as you and
some other ham claim then I shouldn't have had to look -at all-, let
alone "hard enough". But I most certainly did look, because I wanted
to find out whether these hams were working emergency comm, pushing
papers, washing dishes, or just getting in the way of people actually
doing things. So you may not understand this, Eric, but I was actually
disappointed when I couldn't find any hams. Consider it a compliment.

> btw, the quantity of radio sets still has
>no bearing on the argument over what (or who) can provide better service.

I'm sure that's true under your own biased and narrowly restricted
definition of "better". The fact is that reality is proving you wrong
even as you sit there and try to convince me otherwise.

>> Now all you CB-hating hams who -still- can't swallow this bitter pill
>> have the opportunity to go there and listen for yourselves. Even
>> better, you can go there and lend your communication 'expertise' to
>> the effort (which is the very activity you claim makes ham radio so

>> best efforts to deny it.
>
>you assume much and you provide very few facts.
>
>please try again... only this time, back things up with some sourcable
>materials if you please?

The facts are available right now -- you just have to observe them
firsthand like I did. But it's clear that no facts are going to stand
in the way of your holy-ham opinions.

Cool John. This liberal freedom of expression is great! I heard your Grand papy was a prick. Can we go lay a warm one on his grave? LOL! Don't get mad. I'm just trying to clarify if it's ok to piss and shit on everyone's grave?

Brian:

... as a kid, my grand-dad did much worse, he related some of those stories to me when he would kill a couple of beers on his back porch in the evenings. These girly-men youth of today couldn't even approach his "style."

My favorite story was about when he and a couple of other youngsters didn't like one old guy in their neighborhood (this was when he was about 12 mind you!) They snuck over in the night and tipped over the guys outhouse! Only problem, the old guy had got up during the night, went out to said outhouse, and fell asleep!

Needless to say, the old guy got one rude awakening, and my grandfather, one good "butt tanning!"

or in the more likely verision has been caught in another whopper

Stevie claims it is his public duty to save the NG and the World from
asomeone that he claims is a"danger to themselves and others" and yet
he refuses to spend the effort of making the one phone call it would
take to save the nation from this grave peril.

The turth or at least close to it is one or more of the following

1 Stevie may simply be the one sick and suffering Delusions etc

2 Stevie may simply be lying about My "condiction"

3 Stevie may simply be a coward and a Bully

4 or it is possible that I am turely mad as he says in which the
headline of this peice is absolutely true

I'll report you time will decide

one Dancing on a grave is in no way a descration, Pissing on Nixon,
well between the likely political comment it was making I suspect if
fought out it would come under the flag burning though, although it is
more questionable

However neither site was harmed so it is hard to say that a desecration
occoured

So why don't you contact Federal agencies and local agencies around the
country and report just how many intergrate cb radio in their emergency
plans? Also contact NORAD and Homeland Defense. Then tell us who will
count on cb and who will call on ham radio if needed. You, the toad and
wogie somehow related?

Look up word "vandalism"

Look up word "Disrespect"

Learn difference

you are suggesting vandalism, what was done was disrespect

Not pleased with it but it is likely protected speech

Dave did. It was in his claims to have worked out of band Frenchmen on
6 Meters. Best of Luck.

Michael:

Thanks for your post. (A real "BLAST-FROM-THE-PAST!")

Back in the 70's, on CB, some of the best radio years of my whole life where there... I miss them... (there was a "rubber duck" under every rock--we still got "mud ducks" though :)

Amateur radio has changed too, the bands are not as interesting... the personalities stagnant and without humor, without fun, without excitement, without youngsters, without harmless pranks, without mystery. Bunch of old guys attempting to play "James Bond", "secret agent" and attempting more structure to communication than the NSA uses! :(

I hope-against-hope the good old days of radio will return, but, I would like it to do so on new technology... some of us which remember the old CB days (days when even, good, hams had cb rigs!--or, we made do with 10 meter equip. <grin>) are on ch. 38-39 LSB (27.385, 27.395) in the central valley of calif, we are a stagnant number, be nice to have the company. Lot of mobiles so they escape the harassment of hams still waging the "old war." If you mention your call, be prepared to take some kidding...

If you ever get an opportunity--come join us! Real CB still lives in isolated pockets!

John

Here's a "bullitin" for you!

Frederick H. Kleber (K9VV) reported Baxter's interference to health and welfare traffic handling during the Mexico City earthquake
disaster:

"During the third or fourth day of passing health and welfare traffic during the Mexico City disaster, Mr. Baxter appeared on the primary net frequency and began to disrupt communications. I vividly recall my frustration due to the interference he created by insisting he speak with me, even though it was evident that I was passing traffic. Baxter insisted that his station serve as net control, in spite of being politely informed that his assistance was not needed. Baxter's interference became so disruptive that I ultimately called him on the telephone.

Carlos (XE1HC) and I were speaking in Spanish, and we discussed how to avoid Baxter's interference. Baxter was insistent on gaining control of the frequency and running net operations. In between Baxter's transmissions, Carlos and I managed to communicate, and to change to another traffic frequency. Once we moved to a new frequency, we were able to resume passing traffic. Baxter followed us to our new frequency and interrupted us, just as he had before. Carlos and I were forced to changed frequency several times in order to avoid Baxter's interference. Each time, Baxter would show up shortly thereafter and continue to try to gain control of net operations. Becoming increasingly frustrated with Baxter's interference, I telephoned him again. I attempted to explain to Baxter that he was interfering with a health and welfare operation. He did not listen and he interrupted me frequently. In frustration, I finally hung up and returned to handling health and welfare traffic.

The health and welfare traffic operation lasted approximately a week. During that period, my partners and I (NJ7E, XE1HC, W9GIG and W7MY) were able to pass approximately 7,000 pieces of health and welfare traffic. On numerous occasions over this period, Mr. Baxter operated his radio station in a manner that created interference to an established Mexico City earthquake relief health and welfare net. Mr. Baxter was a constant hindrance to the operation and he later attempted to leverage publicity from the disaster (often inaccurately reported) for his personal gain. In subsequent "press releases," Mr. Baxter attacked the actual participants of that health and welfare net."

Just because somebody in government erects a "security" fence doesn't
mean it's legally off limits to the public. The government has a long
history of thinking it can do any-damned-thing it wants.

There's nothing

Hey, ya know what? We could change the name of the "Steve and Mark Shit Fight" to "The Confabulators"!

From a discussion in another venue, I captured this....

"A confabulator often appears to be unable to recognize the erroneous nature or absurdity of his statements even in the face of painfully apparent contradictory evidence. Hence, his replies to questions or statements may appear tangential, circumlocutious, irrelevant, and delusional. Moreover, rather than relinquishing an incorrect belief when confronted with contradictory information, these individuals may make further erroneous extrapolations or partially incorporate some aspects of the contradictory information within the confabulatory schema."

For example, when a 20-year-old individual who had lost control of his auto and suffered a serious head injury was questioned about his accident and injuries, he responded by"attributing his hospitalization to having been in an atomic explosion which occurred when his rocket ship had crashed. He stated that he was still filled with radioactive fluid and pointed to the numerous scars on his body to show where the doctors used needles to remove fluid".

Having read that, doesn't it put Mark and Steve both in a whole new light?

That depends.

Are Minnesota and Florida different sovereign countries?

Does Minnesota's economy and way of life rely heavily on
imported Florida orange juice to keep going?

I thought of mentioning California as an alternative source
of citrus beverage, but the reply to that is obvious...

> Or maybe ethics hasn't a damned thing to do with it.

Ethics has everything to do with it.

> I like
> citrus products,
> and I'll buy from whoever sells them at a price I'm willing
> to pay.

So if, say, North Korea was selling citrus products (yes, I know they
don't grow any, but it's the principle of the thing), and the
money was going straight to helping that dictatorship build nuclear
weapons, you'd have no problems dealing with them?

> Meanwhile
> we grow some damned good corn, wheat, and soybeans here on the > prairie. We'll
> be happy to sell it to whoever meets the going price,
> regardless if their
> "values are very different" from ours.

So if Osama BL wants some, and can pay the price, you'll sell to him?

---

Back in the late 1930s and very early 1940s, Japan was aggressively
taking over Manchuria and northern China.
(see "rape of Nanking" et al)

The USA was selling all sorts of stuff to Japan at the time -
electronics, oil, steel, aluminum, etc. They paid good prices
and paid in hard currency.

It became clear over time that at least some of those exports
were supplying the Japanese military expansion. So FDR & Co.
moved to cut off those exports - because of what Japan was
doing with them.

Was that an unethical thing to do?

Or should the USA have continued to sell Japan whatever they
wanted, as much as they wanted, regardless of what was done with it?

>Dan wants his own private catagory I guess he is specail, specail what
>I will not venture to say but he thinks he is specail, as I expect does
>his mommy and Stevie, from what I read

Anyone can venture an opinion on who is what. :-)

I'm just looking at EACH AND EVERY COMMENT that appears on the ECFS for WT Docket 05-235. As of about 7 PM EDT on 12 Aug 05 there were a total of 1,437 documents under that docket; more will be arriving until midnight and perhaps a few inserted (by the FCC) the next day.

The tallies I make are done as objectively as I can. For the vast majority of Comments that is a fairly easy task since the subject is one of high polarization of opinion in U.S. amateur radio. Sometimes there are oddities such as 5 of those for 12 Aug 05: Two duplicates (one For, the other Against) plus 3 that are NOT even on this NPRM, not on amateur radio at all! :-)

Mark, if someone wants to "challenge" my numbers, they are welcome to dig right in and read EVERY document in WT Docket 05-235, tally them up, and then SHOW the results. They will also have to show the duplicates, made by both the For and Against folks. Or wait for the Ultimate Authority in U.S. amateur radio (the FCC) to do their final Report & Order. Makes no difference to me if someone wants to "challenge" the numbers...some of these southern-fried double-dips will challenge anything just to start a fight. :-)

The days of kids being computer gurus have already come and gone. Now they just play video games and chat. Very few get interested in programming. Very few do a hardware project. They take their computers to the shop for upgrades. They only people that I have observed doing their own hardware upgrades, rebuilding computers, etc are the middle aged and the "old farts" that you seem to despise so.

I spend countless hours teaching our interns how to use email, spreadsheets, etc.

N2EY:

Isn't it interesting that the feds walk all over states rights?

In california we voted to legalize marijuana (under some condition, i.e. medical use) the feds seem to think we can't. Since we adopted the law all we have are fewer lawyers ripping off marijuana users, fewer marijuana users in jail and less wasted time by law enforcement in peeking over fences attempt to catch them in commission of a "crime" (the crime being growing, smoking--and no, I don't smoke marijuana--but did when I was a teenager for a bit.)

Now the feds are back busting people and wanting to make the california law enforcement help them... insane... if the feds wanna bust 'em, let some other state(s) pay for all of it!

Not really.

Let's do the math...

The following are rough numbers. Those willing to do more looking-up
are invited to give more exact numbers, and see how close my
approximations are.

IIRC, there have been 113 Shuttle missions that "went the distance" so
far. Missions last about a week and have about seven astronauts on each
one.

Orbital velocity is about 18,000 miles per hour and a week is 168 hours
long.

So a typical mission is about 3 million miles long. With seven
astronauts aboard, that's 21 million passenger miles per mission.

113 x 21 = about 2.4 billion passenger miles in the entire shuttle
history.

But two missions ended with total loss of the crew - 14 deaths. That's
one death for every 171 million passenger miles. Compare that to the
commercial airliner rate...

Or take a look at another measure: Number of deaths per million aircraft departures. Commercial airlines are well under one per million. The Shuttle is around 1 in 8.

Of course both measures are a bit off the mark. Most commercial airline accidents have some survivors.

Perhaps the most accurate measure would be "what are the chances that a flight will be completed without an accident that results in the death of a passenger? In the case of the Shuttle, the demonstrated odds are 1 in 57. Commercial airliners are a lot better....

I know one thing, you are an idiot. I know you even lack the
where-with-all to stop behaving as such.

If I am the only one to notice, so be it, but don't kid yourself, such a
manner, mental state and uncivilized manner such as yours is quite plain
to see.

You live in a world of "high drama." This is usually the sign of one with
an unstable mental state and prone to bizarre exaggerations. I have not
fostered a sheltered life for myself, I have seen many like you before...

Your vain attempts at creating a "larger than life" image for yourself
look like a childs finger-paintings to me...

finaly at least something that might be relavant

It would be nice to hear from others about the incident, but at least
this an allegation, no date given though which earthrquake are we
talking about here

If this is another old recylced charge

Fortunately the rest of the military brass aren't in your family. You cbers just can't handle the fact that amateur radio is considered by emergency officials to be far and above cb radio when it comes to providing additional emergency comms.

AOF:

Making slurs to anothers' mental state is more a form of making a point,
doing a wake-up call, striking them over the head with a "text 2x4", etc...

Don't take it so personal and you will not be so tempted to drop into
vulgarities... a slightly better tactic, don't you agree?

If I drop into a newsgroup, and see one using vulgarities (yes, I have
done it, and regret it)--I tend to form a negative opinion of them,
sometimes I am unable to reform that opinion--others probably have my
failing... do you see my point?

Don't get so "blinded" you focus on the personality of the individual,
focus on what he is saying, form your attacks to the principal(s), not the
person... now making helpful suggestions on how an individual can improve
his short-comings is a positive venture. <sly-grin>

... just a suggestion, of course you will do as you see fit ...

Dee:

Redneck? Hey girl, that is a hickie on your neck! Isn't it? <grin>

Yes, not ashamed to have a deep allegiance to my country, my fellow citizens, my forefathers who shed their blood for my freedom, or the principles this great nation was founded upon. I may disagree and argue vehemently with another, but I would just as soon turn and risk life, limb and property and stand shoulder-to-shoulder to oppose our common enemy...

I am proud to be an American, I am proud of my fellow Americans--I would like to effect changes which could make me proud of my public servants, but they seem to have lost value for having those they serve respect them...

I think most here, most likely down to the last man/woman hold this country and its' citizens in such high reverence as I, and if tested, they would demonstrate it... the Star Spangled Banner still brings a swelling of pride in my chest and a tear to my eye. Watching a classroom stand and pledge allegiance to a flag which represents America, the giants of men which were our forefathers, and all Americans almost drops me to my knees with a physical weakness caused by intense emotion...

You know what I mean girl, I am a redneck...

Warmest regards,
John

I call things by there right name, calling shit caviar would not change
the taste

But it is quite personal

I am tired of receiving email of stevie's picture and the phrase "the
thing your ever see"

Tired of the threats and tired of watching him threaten others

I can call his bluff on these matter, so I will, it is a matter of
principle

>
> If I drop into a newsgroup, and see one using vulgarities (yes, I have

you know in the long run I choose to judged on who I am, that is person
that would answer stuff like stevie with the word "Bullshit" if that is
how I felt. I 'd address Stevie the same way if were in the same room.

anyone that wants to not like me for that, well that is ok by me,
plenty of people don't like me, but those that do like me like me and
can be trusted generaly

If stevie wants to even get near principlas you might have a point

but stevie has some problem not sure just what since he is an LPN. My
mother in RN and could have her license pulled for claiming someone was
"a danger to themselves or others" without properly reporting it and

BEING able to back it up

you will note that Stevie hasn't responded after trying another threat
to "be carefull what I ask for posts"
>
> ... just a suggestion, of course you will do as you see fit ...

of Course I will but thank you for your concern

AOF:

Trust me friend, with the way I boldly put my mind to text here, my email looks like it speaks to the son of satan... you are not alone...

If you empower anothers' opinion, that is your error... nor do I find that an excuse for someone to drop to as low, or even lower in behavior in their defense (yes, I have been guilty of this error, you are not alone.)

I, myself, may disagree with you, your lifestyle or your views... however, ... no less than the trees or the stars, you have a right to be here... (from a favorite song of mine, and I value its' statement.)

Behave in a manner which others respect, in doing so, you assist me, then I am not so tempted to drop to low tactics... perhaps if we both do it, it will inspire others, ya think?

Warmest regards,
John

It's illegal, and it's called "desecration of a venerated object". Google the phrase. Laws vary from state to state, of course, but my guess is that if you find a state without such a statute, it would be an exception to the rule. I'm betting they all have similar codes.

For another thing, it's malicious mischief that's sure to cause emotional harm to the living relatives; as well as incurring the wrath of the criminal justice system, I'll bet that's actionable in civil court. I also have to wonder if some plots are considered private property according to local statutes. They're paid for, and they're inherited by the descendants of the lot owner in some cases. There's another violation of law. And of course, don't we all know someone who was cited by a cop for public urination? And how about disturbing the peace if someone saw him do it? Those sites are visited by followers of the deceased; seeing someone pissing on the grave of your favorite president is bound to stir up some trouble. (I admit, that one's a bit iffy.) ;)

That's not even mentioning the fact that the putz ran away from the security detail. That ought to tell you something right there. Several somethings, in fact.

Honus:

Perhaps you missed my earlier post. I acknowledged it was a "no-no."

On a scale of one-to-ten, about a 1.001. A good spanking when they get
the kid, and it is all over.

Now, if he urinated on Kennedys' grave, a night in jail! Maybe two!

Not paying attention again, Markie

> I would rather someone danced on Reagun grave than burned a flag so I
> would say the morals are imporving

I'd say neither one is acceptable. The guy in the picture should be
hunted down and incarcerated until circumstances arise that he can
apoligize to the person on whose grave he is defiling.

Markie's an insufferable creep, just like his buddies Lennie,
Brain and Toiddie. What a bunch, eh?

Markie's been flattering himself as Self Appointed Cutter Of The
Irrelevent lately, no doubt from the latent "Super Moderator" psyche of
his.

Markie is all about "defending free speech", but just like his
other semi-literate buddy, Toiddie McDocherty, overtly works to try and
censor others comments. IE: every post where he put "cuting"...

Each "cut" is censorship, and more evidence that Mark Morgan is a
hypocrite of unlimited bounds.

David wrote:
>
> How is treating something with disrespect in and of itself
> possibly illegal, let alone a felony?

Good question!

(insert standard "I am not a lawyer" disclaimer HERE)

Several ways:

Trespassing - Whether it's public or private property,
a person's mere presence can be a crime

Improper Behavior - I don't know the legal terms, but in
almost any situation there's an expressed or implied
contract of behavior as a condition of admission. For
example, if you go into a supermarket and rearrange the
shelves against the owner's wishes, you can be prosecuted, even if you
don't damage anything at all.
And that's minor compared to showing disrespect to a gravesite.

Then there are all sorts of special rules about gravesites,
current and former presidents, their families, etc.

It's not protected speech/expression at all. Might even come under the
heading of "hate speech".

Now if a person were to speak about *wanting to* do the things
pictured, that would probably be protected speech. Or if they
constructed a replica of the gravesites and carried on the
way they did, they might be protected.

Just IMO. The guy's a real dummy, if for no other reason than
that he showed his face.

And while I have very little (if any) regard for either of those
former presidents, does that guy think anyone will change their
mind about them because of his antics?

Guess what?

Silence is only silence. It is not a statement of law.

And this is not England, the use of the English language
notwithstanding.

BBBBWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHA
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHA
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Then since hte FCC doesn't "make any law", just go ahead and
ignore Part 97 when you operate your radio station again...

Then you get to explain yourself in front of an FCC
"Administrative LAW Judge"

> > Sheeeesh! I bet Brain, Toad and Lennie sure are glad to have a
> > genius like you on their "side"... ! ! ! ! ! !
> >

> Put up or shut up

It's already up there, Boyo!

A ton of your assinine, ill-concieved and unfounded rantings all
for the rubbing of your nose in! You've outdone yourself this time,
Markie!

So, Markie, PUT UP OR SHUT UP!

Where's the applicable law? Cite it. Volume and paragraph,
please.

Failure to do so is admission of error.

Steve, K4YZ

Ok John, most of my ham friends are in Southern CA, and some are mobile, so it is a heck of a struggle to copy them at times on 40 m. It would be nice to receive a good signal up here in Calgary. My antenna is just a low dipole, with 1.5kW, and they all seem to hear me just fine. Guess you mean Art Bell. Have not heard him (or Wayne Green -- is he in CA?) on 75, but have heard his splatter on 40m.

Our sked is kind of tentative, and sometimes nobody shows up. I am usually around from about 7PM Pacific time.

73,

Frank

Just one thing, Lennie. I am a foreign citizen myself. However, I am a US permenent resident and have a US ham licence (not only a US licence, mind you). My comments say nothing about my citizenship. I suggest that it isn't relevant, and it's the country of residence that is important. Of course, I can't vote in elections, but the FCC comment process is specifically open to anyone who cares to comment, even non-hams like you, LOL!

Voiding one comment because the person specifically said they were a foreign citizen doesn't make much sense, as there are in fact others from foreign citizens that simply don't say (at least one, i.e. me, but statistically there must be others).

In fact I suspect that out of 1414 comments it's statistically likely that there are some signed with bona fide US calls that are from foreign citizens who have never lived in the US. You know there is US VE testing in all the countries that have US bases, and it isn't just the military who take the tests, but plenty of locals too. You would have to look up everybody's address to find out who lives outside the US, and information on citizenship of hams simply doesn't exist, so there is no way to verify it.

BINGO! As Jim would say. With just a rough guess, I am surrounded by approx. 70 or so people that would know me well enough to be inclined to call for computer help. Of those, probably 50 percent are less than 35. Of those, none are really what I would call "intermediate" users of the computer. Some are above average (average being relative to the overall community of people I am exposed to concerning computer users), but certainly not self-sufficient on computer-ese.

I consider myself a very average computer user. I used to be right there with technology, keeping up, etc. But, it's been about 30 years and I am just wanting to get through each day on mine at work now...LOL At any rate, as you mention above, Dee, I am still their immediate computer consultant for my workgroup on spreadsheets, all the MS Office stuff, email, attaching documents, finding things on their machines, cruising our network, etc. I am happy to do it for them and I don't think of them with the disdain that some seem to. I don't measure one's value by their efficacy on a computer.

I got my husband started in the computer world about 10 years ago. He's way surpassed me now and I just ask him...LOL

I disagree!

Citizenship and residence *are* relevant/important, Alun. Neither
is a prerequisite for commenting, of course, but they *are*
relevant facts.

> Of course, I can't vote in elections, but the FCC comment
> process is specifically open
> to anyone who cares to comment, even non-hams like you, LOL!

It's interesting to note that nowhere in Len's comments does he mention
that he is not a licensed radio amateur, never has been, nor does he
intend to become one if the rules change. Yet he seeks to have FCC
disregard the comments of those already licensed, as if rules changes
will not affect them.

Most US elections are decided by who gets the most votes. The
comment process isn't like that at all. There's no requirement
that the majority of comments, or commenters, get what they
want. That was clearly demonstrated with 98-143 and again with
BPL.

Anyone with interest is welcome to comment. There's no requirement
of licensure, residency, citizenship, age, etc. In fact a comment
doesn't have to be from an individual - organizations like clubs,
manufacturers, etc., can comment as well.

There's also no universal FCC validation that a comment is actually
from the person who claims to have sent it in.
>
> Voiding one comment because the person specifically

There are quite a few FCC licenses issued to noncitizens who are also nonresidents.

I see no reason to invalidate someone's comments because they are not a citizen, or not a licensed amateur.

Not only that, but some nonresident noncitizen FCC-licensed amateurs use a US mailing address, so even if you did all the checking, a nonresident noncitizen could be missed.

>right wind lunacy zapped into the cornfield

Sorry all you Fascistas. Looks like you need to intend to damage
something for ''desecration'' to be a crime:

S 145.22 Cemetery desecration in the second degree.
A person is guilty of cemetery desecration in the second degree when
with intent to damage property of another person, and having no right
to
do so nor any reasonable ground to believe that he has such right, he
damages any real or personal property maintained as a cemetery plot,
grave, burial place or other place of interment of human remains.
Cemetery desecration in the second degree is a class A misdemeanor.

S 145.23 Cemetery desecration in the first degree.
A person is guilty of cemetery desecration in the first degree when
with intent to damage property of another person, and having no right
to
do so nor any reasonable ground to believe that he has such right, he:
(a) damages any real or personal property maintained as a cemetery
plot, grave, burial place or other place of interment of human remains
in an amount exceeding two hundred fifty dollars; or
(b) commits the crime of cemetery desecration in the second degree
as
defined in section 145.22 of this article and has been previously
convicted of the crime of cemetery desecration in the second degree
within the preceding five years.
Cemetery desecration in the first degree is a class E felony.

band

You are stupid, aren't you, Marky? Sieg Heil can't deviate from
his OWN band restrictions, but foreign countries have their own
band restrictions. Heil (or any other licensee) is responsible
for proper operation of their OWN stations. Not anybody else's.

> Once Dave knows they are not allowed he isn't allowed to talk
to them

That would be hard to prove in a courtroom, drunkard.

> (that is the rules, myself Id bend them to point of telling
they are of

N2EY:

Oh no, you are one who thinks an ex-president is more entitled to
rights, protections or laws than any other citizen?

The Egyptians used to think their rulers were Gods, you are one step
closer to that assumption... a very false one... no matter how well they
preserved those mummies--not a one has ever come back to life. Why would
a president be any more important than any other public servant employed
by the people?

I tell you, if they dug up regans' corpse, and were able to reanimate it,
it would have so many peoples lips glued to its bottom--it couldn't even
walk!

What is a scary thing, some of these people think they have the sense to
comment on policy and laws!

Besides, I don't think regan even got wet... making the kid clean the
cement with a toothbrush and bleach would be a fitting punishment...

David:

Let's face it, burning a dummy in effigy would have been very fitting (the dummy part especially!) Not only was regan a b-grade actor, he couldn't even act the part of president well enough to fool a large number of people--in many ways it still was a b-grade movie.

Urinating on the grave is not the best method to make the statement that regan was an idiot, and a large segment of americans idiots for letting the man finish his presidency without impeachment.

In California we still are attempting to cope with all the mentally ill he threw out of asylums and onto the streets (looks like some made it here to usenet!) His attacks on the flight controllers union still is having a devastating effect on wage earners... the list goes on and on...

Kim:

I am inclined to agree with you, and yes, it is a shame companies are sometimes forced to take inferior employees because they fail to meet the pay scale the most capable demand. There have been moves to go that way in my area of employment--however, this seems to becoming a moot point as design and production slips off shore. With less and less people paying into SSI, or paying less into SSI because of slipping salaries, jobs disappearing--wonder if the oldsters ever sweat losing their benefits? There may not be any by the time we get there or our children, a crime really.

However, we should be careful, or we will look like this self-serving bunch here who thinks themselves very special just because they possess a hobby license and have their picture taken in front of a radio. I shudder to think of how I would look walking around draped in the clothing of false vanity...

Other skills besides computers are very valuable...

Question: What are some of the allegations in the Petition?

Answer: Here are a few of the various allegations:

+ Baxter used Rockwell Collins Marks and Logo without permission.

not an FCC matter

+ Baxter uses Walter Cronkite's Voice ID without authorization.

not an FCC matter

+ Baxter interfered with Health and Welfare traffic.

Is an FCC matter

+ Baxter was fired as an Engineer because he made threats.

Not an FCC matter

+ Baxter uses his radio station to threaten others

An FCC matter

+ Baxter fails to respond to FCC directives.

an FCC matter

+ Baxter threatens other Hams.

on or off the air?? if on the air An FCC matter

+ Baxter wilfully interferes with other peoples communications.

An FCC matter

+ Baxter advertises his business over Ham radio.

Questionable, but an FCC matter

+ Baxter interfered with 80 Boy Scouts during their Jamboree On the Air.

An FCC matter

+ Baxter broadcasts over amateur radio.

Very Qestionable, an FCC matter

+ Baxter uses his radio so as to injure others.

In what way???

+ Baxter has used his station with a pecuniary interest.

you Just repeated this one

+ Baxter has demonstrated a lack of requisite character qualifications.

An FCC Matter, and the US Court of Appeals

Bierbarrel:

yeah, yeah, I have that real failing, not very concerned about urine on my grave after I am done with this world. If I ever make it back here (slim chance) it will be by reincarnation--the way that works--you get a new body... this old body will need to be used to feed the trees and other creatures of this planet--it is the natural way of things... what becomes of this body when my use has expired is just not a concern of mine, you would think most would have better things to worry about.

I guess if you are confined to an institution making paintings, weaving rugs and making bead necklaces your world is so small one can be concerned over such, I can't.

yes and no, the FCC can make laws and the public can comment on those laws through Purposals for rulemaking. A person can also file a purposal for rulemaking and the congress can also make laws which the FCC must enforce.

You have a total lack of understanding. It's not the person. It's not
the urine. It's the actual act of doing that intentionally to
someone's grave. It amounts to you walking up to a person and saying
"fuck you" as you flip them off. It's also disrespectful to all of the
deceased's living relatives. I figured that at least you would
understand. I knew that David did not have a clue and he never will.
he just does not get it.

No Jim is making a fair point, for once pointing Stevie faults

Ie Since Stevie claims my posts are not worth responding Jim askss why
he does.

That is a fair question and I conmend him for it

Now if Stevie would just have the courage to answer

or follow through

# 1613. day 3 of Stevie the coward

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-13 16:59:38 UTC
From: an_old_friend <konstans@hotmail.com>
Message-ID: <1123952378.218880.225520@g49g2000cwa.googlegroups.com>
Source record: 115913

in the saga of Stevie the coward
quote

Where did I say it was a "public duty"...???

Who said calls have not been/are not being made...???

unquote

we have him weaseling back and forth like the bug he is

have you or haven't put up or shut up?

When are you going to put or shut up?

The turth or at least close to it is one or more of the following

1 Stevie may simply be the one sick and suffering Delusions etc

2 Stevie may simply be lying about My "condiction"

3 Stevie may simply be a coward and a Bully

4 or it is possible that I am turely mad as he says in which the
headline of this peice is absolutely true

I list all the possibities and Stevie just goes on with bluff and
bluster

BTW I admit to the Stevie charge of Flaming him here, but if Stevie has
not been lying one or two phones call stop that

we shall see

right and the status of the 2 is regs are undr laws which are both
under the constitution (the later including Treaties)

Now if Stevie would understand this he get along a lot better

Nixon said ''fuck you'' to every American. What's wrong with
returning the gesture?

if you are going to cut down to single out of 40 or so don't expect to
understand it

Stevie made charges and claims there were true everywhere

they were not showed in other parts of the post you hacked apart that
this was so

gee been looking forward to KY4Z's SK notice than my next trip through
Tennessee

and yes I think John understands I certainly do David was telling
Reagun and Nixon to "fuck you" he can't do it thier faces anymore

: "Yes, YOU Stagger Lee:Idiot-at-Large Village Idiot Perpetual
: Moron
: You have shown your ignorance, your inability to
: rationalize a situation, your inability to show even
^^^^^^^^^^^^

Bwa HAHAHAHAHA! The writer of that quote was an ignoramus. You can't
even pick out an intelligent SIG, can you Woger?

---
Definitions of rationalize:

- to pretend that ones desires are caused by impartial reasoning.
www.willdurant.com/glossary.htm

- apologize: defend, explain, clear away, or make excuses for by
reasoning; "rationalize the child's seemingly crazy behavior"; "he
rationalized his lack of success"
---

A "rationalizer" is someone who invents reasons for conclusions he has
already reached, prior to giving the subject any impartial thought.
Therefore, an inability to "rationalize" is a highly desirable trait.

Go back to the drawing board, Woger. Better get a new box of crayons
before you do, though.

Bierbarrel:

I have had people get "in my face", "flip me off" and sling vulgarities at me, haven't we all? I can't kid you, it is upsetting at times, when I was younger and more ignorant, I thought physical force might stop it, then I realized that would never work and gave it up. Further down the road, I learned that it is actually nothing to be concerned about, their opinions and actions are not a refection on myself, however, if I grant them control of my actions--I end up looking an idiot. Hey, let behave poorly, then the rest of the world can know them for what they are...

If you ever find someone relieving themselves on my headstone, once I have left here, give 'em a toothbrush, bleach and have 'em scrub it on down--I'll be watching and get a good laugh out of it and the young man will learn an important lesson... I'll enjoy the fact sane men are running the world, I'll appreciate it, trust me...

How did you know I was spontaneously spawned?

The whole point of Homey doing this and publishing the pictures was to
make you upset. You have behaved in a magnificent manner.

I pee'd on the Picasso statue in front of the Chicago City Hall once.
I had to go, and it seemed as good a spot as any at 4 AM in the snow.

I tend to agree, the only problem becomes exactly what does that
answer mean?

In this case it could mean he is lying and thinks it is imperitve that
I be answered (and why he would think becomes an open question)

Or it could mean he is lying when hesays he can't understand

or it could mean...

It would be nice if Stevie had caurage to say what he means instead of
leting his silence answer for him

I would responding asking if they knew what freequncy they were
operating on and wether their govt allowed that band, Id offer to
answer what frequency they were on if they did not know stuff like that

During a radiosport event like CQWWDX or ARRL DX I'm likely to work upwards of 300-400 band-countries in a 48-hour period. Since I have no idea what each country allows band-by-band, I'd need to make 300-400 inquiries. Do you think I'd win the contest?

It's pretty clear to me what it means.

> In this case it could mean he is lying and thinks it is
> imperitve that I be answered (and why he would think
> becomes an open question)
>

> Or it could mean he is lying when hesays he can't understand
>

That he thinks *you* are lying...

Or that he really can't understand...

Or that there's no real point in answering

> It would be nice if Stevie had caurage to say what he means
> instead of leting his silence answer for him

Seems pretty clear that Steve is taking his own advice.

Which I will do, too.

> No, illiterate drunken deviant, we aren't.

Steve, just because someone calls you doesn't mean that you must reply. There is no FCC rule stating that you must reply. After all, Heil would ignore an "OSOSOSOSOSOSOSOS..." signal. So in the end, it is your choice to reply or not.

A person who lacks judgement will reply to any and all callers, even if he knows they are out of band. A wiser person would be more selective in who he replies to. Especially if the callers are out of band, as it was with Dave/K8MN. It is poor amateur practice to reply to out of band Frenchmen calling you on 6 Meters, no matter how vigorously you defend such operations.

IndeedSuch campassionate ops exist on CW

I would try to answer something that sounded like SOS or If I hread it
on my Shortwave receiever try and someoe that could answer it or
failing that Fire up the HF freqs on My Ft 847 sat rigs and answer it
myself or call for other staions to tune and help

IF I heard a CW Sos or something like Id try and help even as much as I
detest the mode itself

True enough, but he made CA his home. It's where he made his mark in
showbiz and politics.

IIRC, Nixon was a California native.

Assholes like you are the reason why I abandoned ham radio years after earning a general class ticket at age 13. If I wanter to associate with foul mouthed jerks like you, which I don't, I'd hang around in cheap bars.

What is it about ham radio today that appears to attract the very lowest end of the food chain? Perhaps it's time that the license requirements were elevated to include a comprehensive knowledge of civilized behavior.

Source record: 116064

>Just one thing, Lennie.

Are we now down to denigrative dimunutives of everyone?

>I am a foreign citizen myself.

Not a dispute with me. However, an Australian citing Australian
radio regulations, with a clearly-identifiable Australian postal
address, NOT having a U.S. radio license and NOT being affected
by U.S. radio regulations is considered "foreign" in my unofficial
tally of respondents to WT Docket 05-235.

> However, I am a US
>permenent resident and have a US ham licence (not only a US licence, mind
>you). My comments say nothing about my citizenship.

I have no dispute with that. If you have a U.S. radio license
then you are bound to U.S. radio regulations when transmitting
from U.S. territory using that callsign.

>I suggest that it isn't
>relevant, and it's the country of residence that is important. Of course, I
>can't vote in elections, but the FCC comment process is specifically open
>to anyone who cares to comment, even non-hams like you, LOL!

The FCC is "open" to ALL Comments on Mass Media Radio
(broadcasting) Regulations REGARDLESS of whether or not a
Commenter is IN Mass Media radio services.

The FCC is "open" to ALL Comments on Private Land Mobile
Radio Services' Regulations REGARDLESS of whether or not a
Commenter is IN Private Land Mobile radio services.

The FCC is "open" to ALL Comments on Aviation Radio Services'
Regulations REGARDLESS of whether or not a Commenter is IN
Aviation radio services.

The FCC is "open" to ALL Comments on Maritime Radio Services'
Regulations REGARDLESS of whether or not a Commenter is IN
Maritime radio services.

The FCC is "open" to ALL Comments on Personal Communications
Radio Services' Regulations REGARDLESS of whether or not a
Commenter is IN Personal Communications radio services.

However, in HERE whenever someone's particular personal ox
is gored or merely irritated with a scratch there seems to be
a sounding of the Hue and Cry! with all the outraged and

offended forming a posse to Hang Them High! :-)

>Voiding one comment because the person specifically said they were a
>foreign citizen doesn't make much sense, as there are in fact others from
>foreign citizens that simply don't say (at least one, i.e. me, but
>statistically there must be others).

Tough snit, Alun. I am doing a private unofficial tallying of
opinions on WT Docket 05-235. If my "voiding" of ONE Australian
Commenter's Comment in this tally is offensive, then simply add
in that ONE Comment in the "appropriate" category (of your
choice) after, of course, finding it and reading it to determine
what that Commenter is saying.

>In fact I suspect that out of 1414 comments it's statistically likely that
>there are some signed with bona fide US calls that are from foreign
>citizens who have never lived in the US.

Tough snit, Alun. I am doing a private unofficial tallying of
opinions on WT Docket 05-235. If my "voiding" of ONE Australian
Commenter's Comment in this tally is offensive, then simply add
in that ONE Comment in the "appropriate" category (of your
choice) after, of course, finding it and reading it to determine
what that Commenter is saying.

>You know there is US VE testing in
>all the countries that have US bases, and it isn't just the military who
>take the tests, but plenty of locals too. You would have to look up
>everybody's address to find out who lives outside the US, and information
>on citizenship of hams simply doesn't exist, so there is no way to verify
>it.

Tough snit, Alun. I am doing a private unofficial tallying of
opinions on WT Docket 05-235. If my "voiding" of ONE Australian
Commenter's Comment in this tally is offensive, then simply add
in that ONE Comment in the "appropriate" category (of your
choice) after, of course, finding it and reading it to determine
what that Commenter is saying.

As I wrote on Mark's posting, ANYONE is free to go into the FCC
ECFS and READ EVERY Comment and decide for themselves, do their
own unofficial "poll" of opinions and post that. As of midnight
EDT on 12 August 2005 there were a total of 1437 Comments on WT
Docket 05-235. [that includes the very first document there, the
NPRM of the FCC which, by its own statement, would be in the "For"
category. The entirety of the ECFS contents is "open" to ALL
who have Internet access, foreign or domestic, citizen or alien.

Let me remind you and others of one important thing that the
"clubhouse" mentality hams don't fully understand: Neither the
FCC Commissioners NOR FCC Staff involved with U.S. amateur radio
regulations are required to hold any amateur radio license grant
in order to MAKE and ENFORCE U.S. amateur radio regulations.

[see Part 1 of Title 47 C.F.R. for a comprehensive set of
regulations on what the FCC is about, how it is organized, what
it is required to do by LAW as described in the Communications
Act of 1934 and as amended in the Telecommunications Act of
1996...those Acts passed by the Congress of the United States]
The First Amendment of the United States Consitution specifically
states that CITIZENS are given the freedom to "speak" to their
government on anything they so wish. As a citizen of the United
States of America that is what I am doing, have done, will
continue to do. That is the RIGHT of ALL United States citizens
on United States LAW.

law now

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-14 00:07:36 UTC
From: LenAnderson@ieee.org
Message-ID: <1123978056.245699.47860@f14g2000cwb.googlegroups.com>
Source record: 116072

Today's Scorecard in the NCTA v. PCTA Amateur NPRM Opinions!

As of midnight EDT on 12 Aug 05, WT Docket 05-235
Comments on Test Element 1 Elimination/Retention are:

Total 1438

Indeterminate/duplicates (note 1) 62

Unambiguously Against NPRM (note 2) 390 28.34%
Unambiguously For NPRM (note 3) 797 57.92%
Code test ONLY for Extras (note 4) 189 13.74%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, individuals not understanding the
scope and purpose of the NPRM, one foreign citizen
submission, and three who were commenting on another
matter having nothing to do with amateur radio regulations.
It should be noted that at least two individuals (one for,
the other against the NPRM) have been spotted making
multiple entries over following days; all such multiple
entries are considered duplicates and relegated to
Indeterminate sub-total regardless of their opinion position.

2. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

3. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
midnight of 12 Aug 05 that would be 1376.

12 August 2005 is the 18th day of submitted Comments. A notice
about FCC 05-143 or Docket WT 05-235 has NOT YET BEEN MADE in
the Federal Register so it is unknown if these 17 days of Comments
will be accepted by the Commission for decision on any Report and
Order. Note: The Federal Register 2005 Contents page on the GPO
website has NOT had any entry for 9 Aug 05 or later as of Noon,

EDT, 12 Aug 05.

Stay tuned...the future of U.S. amateur radio is being made,
like it or not.

yes non

If you say that the cell network was overloaded, then just maybe...
----

Frank, I'm no radio snob. I'm glad the situation got handled by the
use of CB or any other means of communications at the citizen's

disposal. Good show!

I believe the part where he listens for a whole 10 seconds before he
starts blabbing, probably an amateur protocol he carried over to CB
radio.

Yes, Wogie, that IS your photo. Many of us saw it on the Yahoo! singles site before you were outed and took it down.
One thing I've always wanted to know. Did you get any takers after posting it? I mean, from women.?
I have a twenty dollar bill that says there were no women out there that were that hard up.

> as you like YOUR picture, Wogie Wimp.

That's not Roger's picture, Lardass Davies.

How many ISPs have you been booted from now, Wogie? Four? Five?
No wonder you are forced to use anonymous remailers.
You are fast running out of internet providers in your area and it is all
because
of your foul mouth.
Nobody else is to blame.

more of your cuting context
I don't realy care what you knew some time ago, your remarks TODAY show

you as a pretty unfeeling SoB

And so that you think SOS signals are a subject for jokes , then you
are sick as well as unfeeling

Chuck:

You ask me if I ever put ham gear together from old radios, tv's and army surplus equip., Yes, gobs... my uncle had a chain of army surplus stores. Most of that equip you just took to the air...

But, born right around 1950, I got in on the tail end of tubes. In the late 60's we were already attempting to run transistors with multi-parallel-push-pull circuits to get higher outputs on low HF. The 70's provided some decent high power transistors, in the 70's seen a lot of hybrid equip (tube/transistor), in the 80's-90's mainly transistors, even multi-KW linears designed around transistors.

Now I awaiting the next generation equip., you see it in commercial and industrial use, but very rarely in amateur shacks.

Now I play with single chip wide band oscillators... buffers, amps and finals in personal experiments, all transistor. The tube, except for greater than 2KW linears/transmitters is pretty much dead... most new homebrew amps I see are using the russian tubes, cheap if you get the right source... but the filament draw on those big amps can heat a shack!

Just look at the number of hams still running the old tube equip. henry 2KW linears, drakes, heathkits, hallicrafters, gonset, johnson, etc.... although a lot of it is still in use, it isn't built anymore... some hams just haven't adapted to building with transistors... don't ask me why...

What does spark-gap transmitters, crystal radios, regenerative, TRF, etc have to do with today? Collectors items? Junk sold at hamfests?

Most high power stuff is custom made mosfet, or commercial adapted to amateur use--if you are into homebrew...

Oh no, Mark, I think that the very idea of you responding to an SOS sent
in morse, is a good subject of a joke.

I think your expounding at length on my HF operations from any DX spot
on the earth would make a good subject for a joke.

I would also find your lifetime of professional victimhood a good
subject for a joke.

Where did I mention a "joke"? Where did I mention "funny"?

I mentioned "satire". Satire isn't often "funny". I was holding Brians SOS question up to ridicule (because it was ridiculous). For that you call me a son-of-a-bitch?

By your email address, I thought you might be into programming in
assy. After I read your posts, I realized that you must work at the
Chrysler plant installing lug nuts. No wonder the wheels fell off of
those K-cars.

Tracy Fort's necrophilia and a deceased seventy two year old cancer victim, who happened to be my mother:

==========
==========
Dug her ass right up! She was too damn ugly to have sex with before she died. The old bag o bones fell apart in my hands! She didn't complain about much either other than the lousy sex she got from those foursomes with you, Mike and her husband.

love dem bones....dem bones....dem bones

rattllin' bones!

squeek...squeek...

Skeleton rides 50 cents a pop! If you can stand the smell....I wonder is she stunk that bad in life?

She is very fresh but not that fresh!

hehe...I love dem bony women....rotten to the core.....

Please accept my apology for abusing her. I'm sorry that I did not toss her back into the black depths that she came from. Next time,I will be sure to take care of that. I promise that I will refill the hole with the dirt that came out too. In addition, I will re sod the plot at no additional charge. Let me also apologize for the milky substance in her left eye socket, that was an unavoidable accident. please feel free to include this post in your sig file!

You might as weel keep it up there...I love the ole boney bitch!

Dem Bones! Dem Bones! Dem Bones! I loved playing dem Bones!
Dem Bones! Dem Bones! Dem Bones!

I loved playing dem Bones! I ran my fingers uo and down dem bones and she began
to come alive!
I played dem bones like they never been played and she smiled for me all the day.

Pork and bones....

DON'T HURT CANADA! I'll miss those nights with the ole bony lady!

==========
==========

This .sig file will continue until Mister Fort posts a sincere apology to all cancer victims and their families. His refusal to do so says more about his attitude and upbringing than any of his thoughtless and hurtful postings in rec.radio.shortwave. He seems to be very proud of the fact that he can buy expensive radios using the refunded deposit money from his empty beer containers and has frequently posted the fact. It appears he is well on his way to purchasing his next radio. Anyone caring about his well-being should mention the good work of Alcoholics Anonymous to him.

You should stay off the computer when you're drunk. Remember how you embarrassed yourself the last time? There IS help available for alcoholism. Try it, you just may return to being a human being again.

mike

This .sig file will continue until Mister Fort posts a sincere apology to all
cancer victims and their families. His refusal to do so says more about his
attitude and upbringing than any of his thoughtless and hurtful postings in
rec.radio.shortwave. He seems to be very proud of the fact that he can buy
expensive radios using the refunded deposit money from his empty beer containers
and has frequently posted the fact. It appears he is well on his way to
purchasing his next radio. Anyone caring about his well-being should mention the
good work of Alcoholics Anonymous to him.

Garsh dangit, who am I now? I have been around for years and you guys ain't bullshitting me. As sure as my name is Roger Wiseman, I know you guys are using false names.

Stagger Lee is Brian Burke and we all know where Brian lives. Give me another week or so and I'll stalk Brian and post all of his personal information. And what I don't know, I will make up.

I'll trace your ISP's and post them, too. Then I'll make up some fairy tale about your kids being arrested for heinous crimes, and nobody will be able to disprove them because I hide behind anonymous remailers.

I live alone, have no family, have no future and have lots and lots of time to attack you assclowns.

I'll be back.

Why?

Suppose that Australian was considering moving to the US
and getting a US amateur radio license. Or he might want a US license
for some other reason. He would be affected by US regulations.

Except for one claim here more than 5-1/2 years ago, *you*
have not expressed any desire to obtain a US amateur radio
license. So you are no more affected by US regulations than
the Australian.
>
> > However, I am a US permenent resident and have a US ham

Yep, that's how you behave, Len. All the time.

FCC is open to the comments of all interested parties, regardless of
age, gender, race, creed, ethnic origin, whether a commenter is a
citizen or resident of the USA, whether they are an FCC licensee or
not, etc.

You're not nearly so open to comments.

> >Voiding one comment because the person specifically said they > >were a

Lots of others. They don't count to Len.
>

>Tough snit, Alun. I am doing a private unofficial tallying of
>opinions on WT Docket 05-235.

How is anyone to know if your "tallying" is reliable, Len?

Why should anyone trust your reading of the comments, given
your behavior here all these years?

>If my "voiding" of ONE Australian
>Commenter's Comment in this tally is offensive, then simply add
>in that ONE Comment in the "appropriate" category (of your
>choice) after, of course, finding it and reading it to determine

Bingo.

>As I wrote on Mark's posting, ANYONE is free to go into the FCC
>ECFS and READ EVERY Comment and decide for themselves, do their
>own unofficial "poll" of opinions and post that.

Why should anyone bother? It's been shown that the majority
opinion is not binding on FCC. They do what they decide to
do, and majority opinion is only one small factor.

Why do *you* bother? It's clear what FCC wants to do - been
clear for years.

>As of midnight
>EDT on 12 August 2005 there were a total of 1437 Comments on WT

>regulations on what the FCC is about, how it is organized, what
>it is required to do by LAW as described in the Communications
>Act of 1934 and as amended in the Telecommunications Act of
>1996...those Acts passed by the Congress of the United States]

I don't know a single US radio amateur who doesn't know and
understand that fact, Len. What's the big deal?

>The First Amendment of the United States Consitution specifically
>states that CITIZENS are given the freedom to "speak" to their
>government on anything they so wish.

And the FCC extends that right to noncitizens and even nonresident
noncitizens as well. Who are you to rescind it?

>As a citizen of the United
>States of America that is what I am doing, have done, will
>continue to do. That is the RIGHT of ALL United States citizens
>on United States LAW.

well, bully for you, Len! Do you really think all your spamming
of ECFS makes one bit of difference to FCC?

Why shouldn't Alun and the unnamed Aussie have the same ability?

Then it's probably because dimwit Markie has his 11 meter rig fed
to a 2 meter antenna.

> You may hear some of it round major cities, but I don't hear in in
> Milwalkee or Indy or St louis where I travel regularly

Obviously you don't travel to anyn of them often, otherwise you'd
hear even more...And M I G H T learn how to spell them along the way.

> I hear some clear problem around Chicago when I am there, sound like
> too many radios users not enough spectrum

Sounds like too many people with no radio discipline and nothing
better to do.

> But you claim that turning on the simplest CB will prove what you
> calim is simply a LIE

No, it's not.

>
> maybe luck, maybe being polite to people helps

Maybe because you're one of the uncivil creeps that do those sort
of things and you just consider it normal...

> But your statement is lie

Nope.

I'm listening to a trashmouthed idiot on Ch 16 as I write
this...Claims to be "One Bodacious Bad### in Chi-town...come back..."

I'll let you look it up on Mapquest, Markie, but I am more than a
couple hours drive from Chicago!

an_old_friend wrote:
> cuting all materail relavant to radio or law or even the people in the
> NG

"cutting"

"material"

"relevent"

> Nothing left

Plenty left...Just none of it pertained to YOU.

Instead of "...or even people in the NG", you SHOULD have wrote
"...or nothing that even resembles me".

Restoring what Markie was "cuting" for comment.

W4NTI said:

We have enjoyed the redneck jokes for years. It's time to take a
reflective look at the core beliefs of a culture that values home,
family, country and God. If I had to stand before a dozen terrorists
who threaten my life, I'd choose a half dozen or so rednecks to back me
up. Tire irons, squirrel guns and grit -- that's what rednecks are made
of. I hope I am one of those. If you feel the same, pass this on to
your redneck friends. Ya'll know who ya' are...

A-yup.

You might be a redneck if: It never occurred to you to be offended by
the phrase, "One nation, under God."

I make it a point of saying it just a little bit louder hoping I
induce a stroke in some ACLU twit.

You might be a redneck if: You've never protested about seeing the
10 Commandments posted in public places.

People who protest them are the same one's who usually aren't
anywhere near a church unless it involves a wedding or funeral...All
that "don't lie, don't cheat, don't steal" stuff make's em nervous.

(Probably why pagans don't have any "commandments"...)

You might be a redneck if: You still say "Christmas" in! stead of
"Winter Festival."

Or "KAWANZAA!

You might be a redneck if: You bow your head when someone prays.

Markie said he "cut" everything that didn't pertain to anyone, yet just 3 days ago he was talking about respect for others religion...Guess that was only while it was productive to his rants to do so.

You might be a redneck if: You stand and place your hand over your heart
when they play the National Anthem.

I lock up.

I still can't sing it all the way through as it makes me teary-eyed.

Again, another "problem" I am sure Markie doesn't suffer.

You might be a redneck if: You treat Viet Nam vets with great respect, and always have.

If I see a guy with any kind of "Been There" patch, I'll ask them if they were...I give them my thanks and a hand shake.

You might be a redneck if: You've never burned an American flag.

Hmmmmmmmmmm....Whelp, have to own up to this one...Of course it was a Ceremonial Retirement, and the tattered flags were being "retired" from service. A very solemn event.

You might be a redneck if: You know what you believe and you aren't afraid to say so, no matter who is listening.

Hence no anonymous remailer for me.

You might be a redneck if: You respect your elders and expect your kids to do the same.

Markie can't wait to share body fluids with a REAL "female" so he can raise kids to lie and cheat. Said so himswlf.

You might be a redneck if: You'd give your last dollar to a friend.

What's a dollar...?!?!

God Bless the USA!

OOOOOOOOOOOOOOOORAAAAAAAAAAAAAAAAAAH!

Markie...WHERE in that post did either Hans >>OR<< I "insist" that
you do something?

Hans correctly stated "Willy Weeper hasn't made a case for "poor
amateur practice".

Brainless then states that Riley says "good amateur practice" is
enforceable, which it is. However he STILL has not "made a case" that
demonstrates "poor amateur practice"....

But Markie...Depending on which rant you're foisting off on us
today, you're NOT disabled...Or are you?

> > Don't take it so personal and you will not be so tempted to drop into
> > vulgarities... a slightly better tactic, don't you agree?

Most mature adults refer to it as feces.

So that pretty well leaves you out, I guess, Markie.

> But it is quite personal
>
> I am tired of receiving email of stevie's picture and the phrase "the
> thing your ever see"

So who's sending you my picture? Sure isn't me.

You need to take that up with whoever's doing it.

> Tired of the threats and tired of watching him threaten others

What threats?

> I can call his bluff on these matter, so I will, it is a matter of

Not more than once you wouldn't.

> anyone that wants to not like me for that, well that is ok by me,
> plenty of people don't like me, but those that do like me like me and
> can be trusted generaly

People don't much care about your profanities, Markie...It just
further delineates you as the unsupervised child that you are...

It's the lying and the silliness that prevails with your
profanities that gets you laughed at.

> > Don't get so "blinded" you focus on the personality of the individual,

# 1754. Stevie Claims "action" more like missing in action most likely

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-14 15:40:37 UTC
From: an_old_friend <konstans@hotmail.com>
Message-ID: <1124034037.029636.17080@o13g2000cwo.googlegroups.com>
Source record: 116105

KY4Z, that great bully and bragard alleegded Marine and Nursie aleegs that he has made good one of his long standing threats, of course he does not bother to say which threat he has crarried out

But If he called the Cops they would have acted in a few minutes, if they Beleived him

If He call the mental Health people then that would take a bit longer IF they believed him, But by law in Michigan a serious allegeation that a person is a danger to himself or other must be investigated witin 24 hours

We will see, assuming I am still a free man tomarrow at say 1 pm local time that should show Stevie wasn't believed

Of course the most likely possiblity is that stevie is just lying , again

-=jd=-:

Funny you should think in terms of fear, most who do so are usually afraid little children or an kook attempting to intimidate others, or supporting those who do, either just as disgusting.

You mistake my intolerance of bullies and kooks tossing around threats--with fear--I make no such mistake... I simply find threatening mental cases intolerable... that punk intimidates no one...

However, I don't believe that ISP is going to like ignoring him making threats. If those threats are made know to the ISP (by a number of complaints), and they do nothing, they can be sued big-time in the event that kook harms anyone or another property, they DO have an obligation by law.

John

well gee you will have to wait a bit longer People Like Stevie, Dave
and Jim Still think there is life in the issue yet, that is what all
the personal attacks are about

The first thing I'd notice is that there were no static dots in front of the first "ayday". I'd thus assume that it was you, actually yelling "adyday".

> Indeed If truely stuck and needing help but with a big batery Id just

Why not admit that you'd have no idea whether anyone was coming with assistance since you couldn't read the response? It might help if you mixed your distress call with information about your estimated position. Then you and your big battery could hope for the best.

Dave:

Lost with no character/personality to attack, confused?

Focus on what is at discussion, forget who is saying it, may help.

Alun:

Agreed!

Some suggestions of mine:

1) How to attract large numbers of new general+ licensees.
2) How to set examples of civil conversation, debate, and exchange.
3) Discussion of other amateur policy which can be adjusted to promoted
increased and improved exchanges.
4) Attempting to encourage arrl into reformation so they do represent all
amateurs and gain additional membership.
5) etc.

but as you say I can't use morse code so obviously I can't mix in my
position nor receive, therefore my Only Hope is RDF, but obviously Not
from MMM like you. only folks that Might try and help me are the
NoCoders

which is ofc ourse a poor coment on the users of the Morse Code, and
the proponents of continued use and testing for same

Unlike you If I heard such a signal, (where would such a spark gap
signal end up BTW?) I world try to find the sender some help, or to
have him arested if this was a bad joke, ether way, round here I'd call
the Coasties, if I could not find a ham to help me, and heard such a
signal. I know they have RDF gear. I saw some of it at the open house
this spring

John,
That is where you have a total lack of understanding. There is a big
difference between myself and a bully. I'm trying to bully no one.
Bullys pick on people just to pick on them. I have no intention of
harming anyone. I simply stated that if I caught him pissing on one of
my relative's graves I would take the law into my own hands. I would
do the same to you or anyone else that I caught doing it. Let me
rephrase it for you.

IF I CAUGHT ANYONE PISSING ON A RELATIVE'S GRAVE THEY WOULD NOT HAVE
TO WORRY ABOUT THE POLICE

That is a long way from a threat. Is it simple enough for you? Does
your childish mind understand?

Now, go tighten some more lug nuts and leave decent folk alone wiil
ya?

Absolutely. 25 or 30 years ago it was true. Then I could ask an exam question
which required writing an ISR in assembly, or even object.

Now, forget it! Such questions would never be allowed because the students wouldn't understand the question.

My grandkids live for the computer. the blackberry, cellphone and their gadgets, but have no idea what goes on behind the screen, despite the fact that their mother is a specialist in advanced secure systems. The kid who used to cut my grass thinks he is a programmer because he can copy a script from the internet - but say things like "object", "hex", "bus" and this teenage expert looks at me llike I have one eye in the middle of my forehead.

If I want to talk to people who build hardware, write efficient imaginative software, and can actually do hex math I go to the QCWA breakfast; where someone always has a new piece of homebrew microwave hardware or some neat little Unix trick to show off.

The last QCWA convention I attended had fascinating discussions on cell phone hacking, unix programming, software defined radio along with the old standards of antennas, propagation, etc.

Yes, I'm an old fart who can hand key 25wpm (but doesn't anymmore because e-mail is easier, not faster), use the net, write assembly programs and even use a soldering iron. I even have some idea how the telephone system works and made phone calls from my HT before the cell phone was invented. And I certainly do not rank myself anywhere near the experimenters and explorers in Ham Radio; I'm not that talented.

Hi! You must be well thought of where you work. I hope you're at
least getting shift-differential.

> Not even getting the chance to rub either of your noses in your
> silliness is enough fun to interrupt my schedule.

All work and no play?

"Billy Beeper" has been paroled, and has to live in Hans half-way house
for code junkies.

> Won't help, though.

Nooooo body hides from the Super Sleuth Steven J. Robeson,
K4YZ/K4CAP/K4MARS.

Branch Water Dave strikes again!

He has the Spanish Inquisition over in Pakistan. Hi!

# 1779. Re: Echos from the past, code a hinderence to a ticket

Dave:

There is no man but Jesus who could be trusted, the rest must all be
controlled by the people they serve...

Ideas, logic, principals, methods etc. must be judged on their merit
alone, and not who presents them. A bad idea presented by bush, congress
or courts is still a bad idea.

A good idea presented by a wino looses no value...

Was the transmission blocking an emergency communication on channel
16? Does your statement hold for all 40 channels? IOW, if you turn to
a different channel (say, for example, channel 9), is it not silent
for more than 10 seconds?

If what you say is true, no harm has been done, if not, only good can come.

I suppose that is why no one would take one suggestion that someone is "out-of-line" too seriously, it there are more voices added one should investigate... all I did was show what one of their users was using their service for, they may well approve, who knows?

David:

I must say, nancy leaping up with his dead corpse and packing it all over the nation like some object of worship was one of the most disgusting things I have ever witnessed in a civilized country established "... of the people, by the people and for the people.."

Regan was actually a fool which a bunch of "hollywood worshipers" managed to place in office. With out a doubt, he should never have been president, suffering alzheimers as he did. Looking back on his interactions with the press and his speechs to the public it is now easy to see. I just wrote him off as a "dummy", but was no less confused at how such a poor actor (pun intended) could have ever gained office...

If you are experienced as you claim, then you would have known how to
answer the question. As it is, you failed, even though the FCC does
not require you to respond to "OSOSOSOS..." or to even operate a radio
at all. Your answer falls into the category, "Poor Amateur Practice."

Well number 4 is doomed to failure as not all amateurs will join no matter what the enticements are so it is impossible for them to represent all the amateurs. Plus they don't even have 100% agreement on issues among the existing membership so if they try to represent all their members, they are in an impossible position and will end up doing nothing.

Dee:

You are a smart girl, in your text you pin-point the problem exactly!

They fail to focus on the issues which ALL amateurs can work out
agreements on. If they run an agenda which only supports a few hams, or
course they are seen as ineffective and a special interest group.

They will either figure that out, or die when the influx of ideas and
demands simple moves them aside...

John

I properly answered a stupid patronizing question with a stupid ridicule(ous)
answer.

> Your answer falls into the category, "Poor Amateur Practice."

"Poor Amateur Practice" happens on the amateur bands. My answer falls into the
category, "Good Usenet Practice", that of poking holes in puffed up balloons.

Dit dit

Dee:

Again, you are right on! Your suggestion will fill a real need and help advance the society of amateur radio.

I like you better all the time girl!

John

Hi!

Hans, not so fast.

That was a nice little cover-up for your pal, Dave. Now that you've
covered the short answer, I'll be standing by for the long answer.
Remember that rules codified in Part 97 are explicit, but "Poor Amateur
Practice" covers operating practices not codified. Your black/white
dismissal above is dismissed.

Best of Luck and all Kindest Reguardses.

I'm just curious how Steve will handle this obvious liar?
